

VINAYAK RAUT

DEVOPS ENGINEER

📞 +91 9850289574

🏠 At Post Nandrakoli, Buldana, India

✉️ vinayakraut297@gmail.com

SKILLS

- AWS
- Cloud Technologies - IaaS, PaaS
- Jenkins
- Shell Scripting and YAML
- Terraform and Ansible
- Docker and kubernetes
- Grafana and Prometheus
- SQL workbeanch
- Jira
- Maven and Git/Bitbucket
- Nexus and SonarQube
- Helm Charts
- Linux and Windows

EDUCATION

**Computer Science and Engineering,
G.H Rasoni Collage of Engineering,
Nagpur**

08/2018 - 07/2021

**Diploma in Computer Engineering,
Rambhau Lingade Polytechnic,
Buldana**

07/2015 - 06/2018

PROFILE

- DevOps Engineer with 2.3 Years of experience streamlining software development, deployment, and operations process for enhanced productivity and reliability.
- Highly skilled DevOps Engineer with expertise in designing, implementing, and maintaining robust DevOps processes using AWS, Docker, and Kubernetes.
- Adept at building robust CI/CD pipelines and implementing security practices for containerization solutions.
- Collaborative team player with a focus on designing and implementing scalable, reliable, and high-performance software solutions
- Strong foundation in IaaS, PaaS, and cloud technologies.
- Familiar with Agile methodologies and distributed application concepts.
- **Operating Systems:** Linux and Windows
- Good Interpersonal skills, commitment, result oriented, hardworking ability to learn new technologies and undertake challenging task

EXPERIENCE HISTORY

ASSOCIATE SOFTWARE ENGINEER

Health Insurance System

EXPLEO GROUP / 17/10/2022 – 28/07/2023

- I used to be managing tasks in both AWS and DevOps.
- Having complete hands on experience in launching EC2 and configure -ing autoscaling with web servers to provide high availability to data.
- Extensively worked with IAM user and group accounts with limited privileges to individual users as well as groups in the process of maintaining less expenditure and high security.
- Well versed in IAM roles, enabling multifactor authentication, and aware of all password policies.
- Built and managed CI/CD pipelines to streamline software delivery and releases.
- Having hands on experience in S3 bucket like ACLs, enabled versioning at bucket level to recover objects and object-lock to protect objects from accidental deletion.
- Extensively used transfer acceleration in the process of migration of data to S3 bucket.
- Extensively Worked with Docker images like pulling images from docker hub, creating images from docker file, also from docker containers.
- Well experienced in creating containers from docker images as well as from our own images.
- Extensively used Cloud Watch monitoring service, monitored many things and configured cloud watch alarms to take necessary actions when ever required and to maintain high availability by reducing downtime.

DevOps Engineer (Internship)

Southern Glazers Wine and Spirits

DELOITTE / 13/09/2021 – 13/09/2022

- Deployed, automated, and maintained applications in cloud-AWS environments.
- Implemented security best practices for containerization solutions, ensuring data protection.
- Established complete Jenkins CI-CD pipeline and automated complete workflow of build and delivery pipeline.
- Managed Kubernetes clusters, optimizing performance and scalability.
- Utilized GitHub, Jenkins, Ansible, Helm Charts, Shell scripts, and Terraform CI for efficient workflows.
- Collaborated with cross-functional teams to enhance distributed application concepts and DevOps practices.
- Participated in Agile development methodologies, contributing to agile ceremonies and iterative development.
- Having good knowledge in concepts like SES (Simple Email Service), RDS (Relational Database Server), Dynamo DB, Amazon , Elastic Beanstalk, Cloud Formation and VPC peering.

PHP DEVELOPER (Internship)

KGE TECHNOLOGIES / 23/11/2020 – 21/05/2021

- Ekart is an online portal where we can purchase products of different Categories like home supplies, utilities, stationery, and baby needs etc.
- This application runs their business by producing the products by themselves or purchased from a few specific companies. They advertise the products under their company banner.
- The second system is, e-commerce company works as a third party, where they introduce the product seller and the consumers in a single platform. In this system, they charge some commission from either the product seller or the consumers or both.
