SOFTWARE ENGINEER

CAREER SUMMARY

Experienced .NET Developer with 3 years of experience in developing, delivering, and supporting applications specializing in .NET Framework. With Proficiency in developing Web API projects, MVC projects, and WPF desktop applications I am seeking for challenging opportunities in future.

SKILLS & EXPERTISE

Programming Languages & Frameworks: .NET Framework, .NET Core (.NET 8), C#, Entity Framework,ADO.NET

Databases: SQL Server,Version Control: Git CI/CD

Tools: Azure DevOps, GITHUB

Code Repos: Azure Repo

Project Management: Agile methodologies, JIRA

Project Types: Web API, MVC, Microservices

Web: HTML, Javascript, JQuery

PROFESSIONAL EXPERIENCE

2021 - Current

Organisation :- Indus Valley Partners (Software Engineer)

Project name: P&V(Pricing & Valuation)

Description:

- Application for maintaining security data for different portfolio managers
- Daily pricing and other attributes calculation from various sources like Bloomberg, Reuters ,Markit etc via different Integration Methods.
- Daily reporting and Data Processing tasks
- Deployment using Azure CI/CD pipelines

Responsibilities:

- Built and implemented backend application modules using C#, .Net, SQL, Entity Framework,ADO.Net,WebAPI
- Efficiently integrated multiple vendors into Project for Security Pricing
- Successfully integrated with several downstream systems like Geneva and Everest.
- Streamlined data processing by designing, developing, and debugging stored procedures in SSMS integrated with application libraries
- Contributed to the design and development of various desktop modules utilizing WPF.
- Created WCF REST APIs and tested, integrated, and deployed them on Windows IIS.
- Involved in bug fixing and resolution of application issues raised by the client implementation teams.
- Designed and developed custom classes using C# and embedded them into the application to perform custom technical operations as per the client's business requirement.
- Involved in creation and testing of stored procedures for P&L and other calculation of different funds as per the business implementation
- Executed UAT testing and implemented production deployment on IIS.
- Wrote and developed new and well-tested code for different client's projects.
- Evaluated project requirements, identified challenges and proposed alternatives using research and data.
- Devised test cases to support enhancements and expansions of functionality.

Project name: EDM(Enterprise Data Management)

Description:

- Enterprise Data Management (EDM) is a data management platform designed for Asset Managers to collect data from disparate sources and integrate that data into a centralized hub
- The platform offers an enterprise-level data layer to transport data to and from internal systems and external sources.
- EDM offers Asset Management specific workflows and pre-built adaptors to every major market counterparty and market data source
- It addresses the data quality and data management needs for data masters and data warehouses.

Responsibilities:

- Built and implemented backend application modules using C#, .Net, SQL, Entity Framework,ADO.Net,WebAPI
- Efficiently integrated multiple vendors into Project for Security Pricing.
- Successfully integrated with several parsing modules.
- Worked on handling client specific data manipulation via the EDM Pipelines.
- Worked on handling the connectivity of the Pricemaster Application with the EDM Application.
- Built multiple optimized and custom pipelines based upon the client’s ask.
- Built multiple sources on the Pricemaster application for data massaging and the loading of data into the application via the EDM.
- Wrote and developed new and well-tested code for different client's projects.
- Evaluated project requirements, identified challenges and proposed alternatives using research and data.
- Devised test cases to support enhancements and expansions of functionality.

EDUCATION

2017 - 2021	Graduation:- Bachelor of Technology in Computer Science Engineering ABES Institute of Technology,Ghaziabad(AKTU) Percentage :- 78%
2014 - 2016	InterMediate:- St Paul Secondary School,Samastipur Bihar Board :- CBSE Percentage :- 68.6%
2013 - 2014	Matric:- St Paul Secondary School,Samastipur Bihar Board :- CBSE CGPA :- 10.0 cgpa

AWARDS & HONOUR

- Client centricity award (2022)
- Client appreciation award (2023)
- Upcoming Shining Star (2024)
