Summary

Hi, I am a Blockchain Developer with hands-on experience in public and private blockchain network. I have led a team of developers to build multiple web3 based projects. Extensive knowledge in Smart Contracts, Consensus Algorithms, Ethereum, Hyperledger Fabric and Data Structures. I am praised most often for my quick and good decision making.

Work Experience

Kissan Global Network Pvt Ltd, Chandigarh

Blockchain Developer, Oct 2023 - Dec 2024 & CTO, Jan 2024 - Sep 2024

- Led a team in successful development and deployment of **NFT Marketplace** along with development and deployment of NFTs using **IPFS** enabling the purchase of NFT using KSN Tokens. ref: www.kissannft.com
- Created and deployed smart contracts for NFT Marketplace(**ERC721**), Token Staking, and **ERC20** token.
- Created Trading bot for multiple centralized exchanges like **MEXC**, **BITMART** etc to generate volume for **KSN Token**

Econet Technologies Pvt Ltd, Noida

Crypto Analyst, Jan 2020 - Dec 2022

- Spot and Futures trading in multiple crypto assets on binance app.

Marketing Associate, June 2018 - Dec 2019

- Managed google adwords account for UK based insurance leads.
- Led the team for user documentation and verification.

Aryatech Marine & Offshore Services Pvt. Ltd, Delhi

Naval Architect, sep 2015 - may 2016

- Intact and Damage stability analysis of Self-Elevating Drilling Rig.
- Detailed 3-D Modelling of Self Elevating Drilling Rig for multiple Analysis.

Additional Projects

Patient-Centric Healthcare Record Solution (Hyperledger Fabric 2.5)

- used hyperledger fabric to impliment a solution for keeping personal healthcare record updated with the patient and the hash of the same being uploaded on the blockchain.

DeFi - P2P lending Contract (Hardhat&Solidity)

- Written mulple smart contracts for the defi lending platform of an erc20 token. Enabled lending with ethers as collateral and also used openZeppelin to impliment the upgadeable governance smart contract for the same.

KYC Verification Implimentation for Banks (Solidity & Ether.js)

- used solidity for writing KYC implimentation smart contracts on ethereum network using ether.js for writing tests and deploying the contracts.

Trading Bot for Dex (Pancakeswap & web3.js)

- Used web3.js and node.js to write a script for automating token swap on pancakeswap whenever liquidity is added for a speciic token using pancakeswap factory and router contracts.

Skills

Java DSA OOPs Python Javascript
Solidity Node.js. Git/Github
Hardhat Ether.js web3.js
Ganache openZeppelin AWS
ERC20 ERC721 Uniswap DeFi
Docker Linux Hyperledger Fabric

Education

PGP in Software Engineering (Blockchain)

International Institute of Information Technology Bangalore
Dec 2021 - Jan 2023

Machine Learning Certification

AnalytixLabs Gurgaon,
Jan 2019 - Jan 2020

Bachelor of Technology in Naval Architecture

IMA, Chennai,
Sep 2011 - Aug 2015

Expertise

- EVM based blockchains
- Blockchain interaction using web3.js/ ether.js
- Hyperledger Fabric
- Project Management
