Virupaksha.Salimath@gmail.com

Summary:

- Total work experience of 25+years, 22+ years in Automotive.
- Experience in R&D and Quality functions in different business areas.
- Hands on development experience in SW Requirement, SW Design, SW Coding, Unit Testing, SW Integration & SW Integration Testing, Software Testing, Regression Testing,
- Quality Management System, Functional Safety, Supplier management, ISO standards, ASPICE
- Project & People management activities.
- International experience, global team management & global function responsibility and SW supplier management.

Specialization in Quality

- Intacs Certified Automotive SPICE Principal Assessor. Intacs Registration id: Intacs-IN21-1791-20585-03.
- Have done many ASPICE assessments for different kind of system projects across different locations for Continental & MicroFuzzy GmbH, Germany and their suppliers.
- Certified and experienced in ISO 26262 functional safety standard.
- ISTQB (International Software Testing and Quality Board) certified SW Engineer.
- Agile development Methodology.
- Certified in ISO 21434 Cybersecurity standard.
- Certified internal auditor for ISO 9001 & ISO 16949.
- Trainer for ASPICE, Problem solving methods, Change Management process, Requirement Engineering & SW development processes.
- Knowledge on CMMI standard, APQP, PPAP
- Defining and managing KPIs at different levels to monitor progress of Projects and Quality.
- SW Supplier Quality: Screening, selection, monitoring, auditing & development.
- Driving initiatives for continuous improvements in Process & Quality.

Technical Skills

Extensively worked on Automotive software development using different controllers - 16 bit microcontroller & 32 bit microcontrollers (Motorola, Renesas, Infineon Tricore & Esys family)
Programming Languages: C & C++ languages.

Tools knowledge

Development tools	: DDS, X32, TDx,
Debuggers	: Trace32 (LauterBach), HiTop (Hitex)
Simulators	: Cartslite, ETAS Lab Car & HiL systems
Application tools	: ETAS-INCA, SAM2000, GREDI
Communication tools	: Canalyzer, DTS
Design tools	: Matlab, Simulink, Stateflow, SDA, Rhapsody
CM tools	: PVCS, IMES++ VM, Integrated MKS System, DOORS, Ascent-JIRA, SubVersion, IBM Jazz, Confluence

Education Qualification

Graduated in Bachelor of Engineering in Mechanical Engineering during year 1994-1998 with 73% from Karnataka University, Karnataka. India.

Pre-University (10+2) from Karnataka P.U. Board (India) with 71% in year 1994.

SSLC (10th standard) from Karnataka Secondary Education Board (India) with 76% in year 1992.

Intacs ASPICE assessor (Provisional & Competent) training by MethodPark, Germany.

ISO 26262 functional safety standard trainings with Exida GmbH.

Professional Experience	
Period	Company/Role/Key Responsibilities
01.05.2019 to till date	ADC Automotive Distance Control Systems GmbH, Lindau, Germany (01.05.2019 to 31.05.2021) Continental Autonomous Mobility India Pvt. Ltd, Bengaluru. (from 02.06.2021 to till date) Role: Global Software Quality Management Responsible - SW Quality Expert, ASPICE Expert (from Jan-2024) Key Responsibilities: • Driving ASPICE activities at Business Area Autonomous Mobility (BA AM): Defining strategy, trainings, planning, conducting assessments, escalations, setting up team of internal assessors by coaching, preparing projects for external assessments. • Defining and maintaining global SW quality management process & Lesson learnt process in BA AM. • Responsible for Software Quality in global Software Engineering Process Group (SEPG) • Reviewing development process for continuous improvements and to comply with various industry standard including IATF, ISO 26262, ISO 21434, ASPICE. • Reporting of ASPICE status to management and steering board to manage the progress of all projects. Defined different KPIs at different level for tracking ASPICE compliance in organization. • Built ASPICE experts in quality team to manage ASPICE assessments within organization. • To support project quote process (RFQ) for aligning on development Quality goals including ASPICE & Functional Safety. • Adapted ASPICE assessment process to ISO Functional Safety compliance checks & safety checks. • I was instrumental behind achieving ASPICE results up to CL2 & CL3 in many projects. • To train the engineering members on SW Quality topics, Problem Resolution Management Process, Change Management Process, and ASPICE process areas. • Controlling tailoring of SW development process at projects as reviewer & approver. • Adapted SW QA activities for different kind of projects – classic and Agile development methodologies. • Defining suitable KPIs for SYS & SW Quality at different level, their measurement system & analyzing data regularly for development process improvement activities. • Functionally responsible for setting up of SW SQM processes, supporting screening, selection, supplier monitoring & assessments at SW suppliers. • Responsible for Built-in-Quality strategy project in India and global AM. • SPOC for Technical Compliance Management System and tracking of compliance cases from India. Continental Autonomous Mobility India Pvt. Ltd, Bengaluru (Jun 2021 to Dec 2023) Role: Global Software Quality Management Responsible, Head of Quality Management, AM ADAS India. Key additional responsibility apart from above: • Leading worldwide teams of Software Quality Managers in Romania, India & NA locations: Coaching, mentoring, responsible for SW quality reports, providing SW Release recommendation to all Autonomous Mobility (AM) ADAS projects by verifying quality of artifacts, safety case, cyber security case and adherence to internal standard development process. • Managing AM ADAS System Quality team, QMS and QM SW teams which supports worldwide AM ADAS base projects & AM ADAS QMS respectively. Responsible for Recruitment, Coaching, Guiding team members in their activities. • Responsible to IATF audits within business along with Corporate Quality team.
20.07.2016 to 30.04.2019	MicroFuzzy GmbH, Munich, Germany (Recently majority stake taken over by KPIT, Germany) Role: Software functional safety quality manager. Worked as partner team of BMW, for powertrain software of electric cars. LE125 and LEB45x projects catering to BMW i3, i8 Roadster, i8 Coupe. Our team is completely responsible for coordination, development, and verification of Functional Safety Software. Key Responsibilities: • As Functional Safety Quality Manager for SW, responsible for quality of safety SW. • Supporting Safety manager in taking care of all safety relevant activities. • Functioned as moderator & coordinator across all SW development teams for Release of Safety SW. • Managing SW Release Management activities for all Functional safety software releases: Planning of Function & SW development, verification, validation, and release activities. • Development and testing activities are spread over different teams (BMW & its suppliers including MicroFuzzy) across different countries. • Responsible for managing SW suppliers of MicroFuzzy for their SW deliveries.

Professional Experience	
Period	Company/Role/Key Responsibilities
	Continuation of Key Responsibilities as <i>Software functional safety quality manager</i> at MicroFuzzy GmbH, Munich, Germany: - Managing all SW safety life cycle activities as per defined SW safety plan and adherence to ISO 26262 along with Project manager including Safety Concept, FMEA, DFA, Tool Qualification, Test strategy, Test result reviews & etc. - Functioned as single point of contact for SW safety quality topics at System and Project level (Drive train component & complete Vehicle system is project). - Compilation and managing of Safety Case throughout the project life cycle. - Responsible to make sure all verification activities are completed as per plan & also to be part of verification reviews and selected confirmation reviews as reviewer. - Conduct Safety Audit to find issues, open points and to perform risk assessment before making release and responsible to approve the SW releases accordingly. - First contact person to project team for all process guidance & handholding project team. - Assessment of project regarding conformance with ISO 26262 standard, identify the gaps, propose, and monitor all gap closure activities till the end. - Led the project team for successful external Functional Safety Assessment.
01.07.2009 to 15.07.2016	Continental Automotive Components India Pvt. Ltd., Technical Center India, Bengaluru Role: System & Software Quality Manager for India location, Engine Systems Business Area (2011 to 2016) – Current Vitesco Technologies. Key Responsibilities: - Responsible for SYS & SW quality of Indian projects, platform projects, offshore SW development teams. - Core member of project from Kickoff to SOP of Mahindra and Tata projects. - Approval of SW & SYS releases for all Indian customer projects. - Introduced new methods/tools to measure, report and track the Quality parameters. - Monthly reporting including the defining and measurement of all quality metrics. - Continuous improvement activities. - Managed ISO audits, ASPICE assessments for BU. - Lead ASPICE assessments for different location projects & suppliers. Led setting up of Business Area Vehicle Dynamics SW Quality group in Bengaluru with six quality engineers. Role: <i>Function & SW development manager</i> (2009 to 2011) - Responsible for a group developing exhaust functions (Requirements to SW deliveries) – Planning, Technical reviews, Testing, People and Project Management activities.
10.03.2001 to 31.06.2009	Siemens Information Systems Limited (Siemens Automotive), Bengaluru, India Role: Application software developer, SW development team leader Key responsibilities: - Worked on different functionalities for engine system SW: SW development, Module testing, SW Integration, SW Integration testing & Regression testing. - Interface partner between offshore development team and customer (international delegation). - Member of Daimler (M271 & M266), Daimler-Chrysler (DC-I4) customer application projects. - Was a team leader for a team five developers.
01.09.1999 to 14.03.2001	Best Engineering Solutions & Technologies(I) Pvt Ltd, Bengaluru, India Worked as Design Engineer for a period of 18 months. Have good knowledge of design & product development tools.
15.01.1999 to 15.08.1999	Shree Ganesh SPM Machines, Pune, India Trainee Design Engineer. They are specialist in building customer specific SPM machines.
