

Vishnu Teja Pajjuru
RPA UiPath Support and Admin
Mobile: +91 7989113578

Email: vishnupajjuru@gmail.com

Profile:

- Experience of 3.2 years in RPA Production support and Admin activities.
- Experience in admin activities like bot deployment in orchestrator, bot monitoring, bot development and provisioning VM and its configuration.
- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Providing L1 & L2 support to developer community for high performance and better efficiency of BOT.
- Used UiPath Orchestrator for deployment, monitoring and management of UiPath Robot automation activity.
- Implemented End to End Robotic process Automation (RPA) using UiPath.
- Debugging and Exception Handling.
- Good knowledge of core java, spring boot, PostgreSQL, Html, CSS, and React JS
- Extensively worked on debugging application for fixing bugs and Production support.
- Maintaining several RPA bots as batch processes on daily basis and ensure quality and high performance to the internal and vendor applications of the organization.

Certifications:

- Completed Aws certification of cloud practitioner essentials.
- Completed certification on Agile software development.
- Completed UI Path Foundation certification.

Education:

- Bachelor of technology in computer science and engineering from JNTU, Kakinada in 2021

Software Skills:

Programming languages □ Core Java, Python fundamentals

Automation tool □ UiPath

Operating System □ Windows 8,10

Employment Details:

- I am working as Software Engineer in Capgemini, Hyderabad from Nov 2021 to till date.

Project 1

Project:	GE Corporate
Industry:	Financial
Role Description:	Team Member
Technology:	(RPA) UiPath Support
Client:	GE

Roles and Responsibilities

- RPA Admin
- Health monitoring of robots in UiPath
- Resolving any Infrastructure issues which causes the bot failures.
- Coordinating monthly security patching with Core tech Teams.
- Working with CoreTech Teams on incident / Change /service requests
- Handling the tickets or request using ServiceNow tool.

Bot monitoring and admin activities

- Performing bot monitoring and VM health check every half an hour and raising incidents for faulted jobs.
- Support developer community on package move, bot migration, asset updation, Bot start, Bot stop, schedule modification and other related activities through Service request.

Server Patching and Vulnerability report

- Perform server patching every month and updating software's with latest version as new releases arrives.
- Works on vulnerabilities every week and be in compliance with the client requirements.

Project 2

Project: Baker Hughes RTS Support
Industry: Financial
Role Description: Team Member
Technology: (RPA) UiPath Support
Client: Baker Hughes

Roles and Responsibilities

- RPA Admin & Support.
- Monitoring critical robots in UiPath Orchestrator.
- Resolving any Infrastructure issues which causes the bot failures.
- Handling service desk tickets from the client.
- Involved in production support activities on monthly basis.
- Helping dev team on screen sharing session in debugging.

Bot deployment and VM configuration

- Deploying new bots in orchestrator which include machine allocation, new environment creation with bot, process creation, bot scheduling, asset creation.
- New VM provisioning, VM clean up, configuring the VM with requested. Software's and client tools.
- Monitoring month end IAP Bots.

Project 3

Project: Blackline Monthly Deactivation
Industry: Financial
Role Description: Team Member
Technology: (RPA) UiPath
Client: Baker Hughes

Description:

Basically, this process is used to deactivate the users in Blackline. Bot checking the users in different interfaces like outlook, Baker Hughes site, Termination report and Headcount report, based up on the results need to deactivate users in blackline.

Roles and Responsibilities:

- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Handled end to end implementation for processes simultaneously.
- Designed Objects, Integrated Processes, and Handled Exceptions and deployed them successfully Orchestrator.
- Automated almost all kinds of applications like Web based Application, PDF Documents, Thin Client Application using RPA tool UiPath.
- Managed and communicated effectively with new resources to automate processes.
- Helped and trained Analysts in designing the complete workflow of process to be automated.

Project 4

Project: ZP78 Bom Extractor
Industry: Financial
Role Description: Team Member
Technology: (RPA) UiPath
Client: Baker Hughes

Description:

Basically this process needs to create two bots one is dispatcher, second one is a performer.

Dispatcher:

Basically bot downloads the input file from share point validates it and adds as a queue item. Queue have file name.

Performer:

Here it downloads each file and performs each steps in SAP and then moves the file to failed or processed at the end of the transaction.

Roles and Responsibilities:

- Interacted with Client for requirement gathering and prepared documents like Process Design Document, Solution Design Document and Technical Design Document.
- Handled end to end implementation for processes simultaneously.
- Designed Objects, Integrated Processes, and Handled Exceptions and deployed them successfully Orchestrator.
- Automated almost all kinds of applications like Web based Application, PDF Documents, Thin Client Application using RPA tool UiPath.
- Managed and communicated effectively with new resources to automate processes.
- Helped and trained Analysts in designing the complete workflow of process to be automated.

Declaration:

Above provided details are true and accurate to the best of my knowledge.
