CAREER OBJECTIVE:

Motivated and detail-oriented data enthusiast with a strong foundation in data analysis, SQL, and visualization tools. Seeking an entry-level Data Analyst role to leverage analytical skills and drive actionable business insights. Passionate about working with data to solve complex business problems and support decision-making processes.

EDUCATION:

Bachelor of Technology in Electrical and Electronics Engineering

Sri Venkateswara College of Engineering Tirupathi, Graduated:2023

CGPA:7.7

TECHNICAL SKILLS:

- **Data Analysis:** Proficient in SQL for querying and managing relational databases.
- **Visualization Tools:** Power BI and Excel for creating reports and dashboards.
- **Programming:** Python (Pandas, NumPy) for statistical analysis.
- **Data Management:** Knowledge of ETL processes, data cleaning, and preprocessing techniques.
- **Statistics & Analytics:** Descriptive statistics, hypothesis testing, and predictive modeling.
- **Soft Skills:** Strong analytical thinking, problem-solving, and effective communication skills.

INTERNSHIP:

Data Modeling Intern:

- Collaborated with business analysts and stakeholders to gather requirements and design conceptual, logical, and physical data models using tools like Erwin Data Modeler.
- Optimized schemas through normalization and denormalization techniques to ensure scalability and performance.
- Developed a Data Warehouse for Sales Analytics by defining facts, dimensions, and measures, and implementing star and snowflake schemas to improve query efficiency.
- Centralized customer data through an integration model, reducing redundancy by 30% and enhancing data consistency.
- Performed data profiling to ensure data quality and supported ETL workflows to align pipelines with data models.
- Documented data definitions and lineage to maintain transparency, reducing data retrieval time by 25% and enabling accurate, actionable insights.

CERTIFICATION:

- Certified from “**Tap Academy**” platform for completing Java Full Stack
- Certified Big Data Engineer, proficient in managing and analyzing large datasets with expertise in technologies.

PROJECTS:

Big Data Metadata Processing:

- Automated metadata file merging and transformations, improving processing accuracy by 40%.
- Technologies: Apache Spark, Hadoop, Google Cloud Platform

Data Warehouse for Analytics:

- Designed and implemented a data warehouse to centralize sales data, boosting analytical capabilities.
- Created dashboards in Power BI for actionable insights.
