Professional Summary

Having overall 3 years of IT Industry Software Experience in Software Development that includes AWS cloud. During my career, I gained experience in the full project lifecycle from project management and build through to implementation.

Experience Summary

- Proficient in AWS services like VPC, EC2, S3, ELB, Auto Scaling Group (ASG), EBS, RDS, IAM, Route 53, CloudWatch, CloudFront, CloudTrail.
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC.
- Created NAT gateways and instances to allow communication from the private instances to the internet through bastion hosts.
- Used security groups, network ACL's, internet gateways and route tables to ensure a secure zone for organization in AWS public cloud.
- Created and configured elastic load balancers and auto scaling groups to distribute the traffic and to have a cost efficient, fault tolerant and highly available environment.
- Created S3 buckets in the AWS environment to store files, sometimes which are required to serve static content for a web application.
- Configured S3 buckets with various life cycle policies to archive the infrequently accessed data to storage classes based on requirement.
- Possess good knowledge in creating and launching EC2 instances using AMI's of Linux, Ubuntu, RHEL, and Windows and wrote shell scripts to bootstrap instance.
- Used IAM for creating roles, users, groups and implemented MFA to provide additional security to AWS account and its resources.
- Implemented domain name service (DNS) through route 53 to have highly available and scalable applications.
- Maintained the monitoring and alerting of production and corporate servers using Cloud Watch service.
- Creating and modifying the EBS volume and attaching to EC2 Instance.

Technical Skills

Technology	AWS Services
Monitoring tool	CloudWatch
Databases	RDS
Compute	EC2 Instance
Operating Systems	Windows Server 2019, Windows Server 2022, windows 10, Windows 9
Backup	AWS Backup
Storage	S3, EFS, FSX
Ticketing Tool	Service Now

Education Details:

Bachelor of Technology from JNTU with First class in 2020.

Work Experience:

Working as an Analyst software engineering in "Capgemini Dec 2021 to till now."

Project:

1	Project Names: Cloud Operations	
Role	Senior Analyst / software engineer	
Team size	10	
Environment	Software	Tools: ServiceNow Ticketing Tool Cloud : AWS OS: Linux, Windows

Roles and Responsibilities:

- Proficient in AWS services like VPC, EC2, S3, ELB, Auto Scaling Group (ASG), EBS, RDS, IAM, Route 53, CloudWatch, CloudFront, CloudTrail.
- Experienced in creating multiple VPC's and public, private subnets as per requirement and distributed them as groups into various availability zones of the VPC.
- Created NAT gateways and instances to allow communication from the private instances to the internet through bastion hosts.
- Used security groups, network ACL's, internet gateways and route tables to ensure a secure zone for organization in AWS public cloud.
- Created and configured elastic load balancers and auto scaling groups to distribute the traffic and to have a cost efficient, fault tolerant and highly available environment.
- Created S3 buckets in the AWS environment to store files, sometimes which are required to serve static content for a web application.
- Configured S3 buckets with various life cycle policies to archive the infrequently accessed data to storage classes based on requirement.
- Possess good knowledge in creating and launching EC2 instances using AMI's of Linux, Ubuntu, RHEL, and Windows and wrote shell scripts to bootstrap instance.
- Used IAM for creating roles, users, groups and implemented MFA to provide additional security to AWS account and its resources.
- Implemented domain name service (DNS) through route 53 to have highly available and scalable applications.
- Maintained the monitoring and alerting of production and corporate servers using Cloud Watch service.
- Creating and modifying the EBS volume and attaching to EC2 Instance
- Installing, Configuring, Administering and Troubleshooting RHEL, Centos, Ubuntu Server's.
- Creating, modifying, and deleting user and group accounts. Modifying file ownership and Permissions. Set up limit access to files with "special permission" (SUID/SGID/Sticky bit).
- Troubleshooting problems with the help of Event Logs.
- Swap space and Swap files system management.
- Provide the SUDO access to users as per client request.
- Installation, configuration, File system creation over LVM, troubleshooting Linux server.
- Changing File Permissions as per the client request.
- To maintain Scheduling of Automatic, repetitive Jobs using CRONTAB.
- Install, upgrade, support and troubleshoot Windows 7, 8.1 & 10 and server 2008 and 2012 OS.
- Maintain there is no downtime for the network. Coordinate with ISP providers & resolve the issues.
- Creating and managing users in server 2008 r2 active directory user management.

Certification Trainings:

AWS Solutions Architect - Associate Level in Simplilearn RHCSA Training at Entersoft Labs, Hyderabad

Personal Details:

Name: VishnuPriya Palakolanu

Date of Birth: 15-07-1999

Gender: Female

Marital Status: Married

Languages Known: English & Telugu

Permanent Address: Ramalaya street yarasala, Porumamilla,Kadapa,AP.

Declaration:

I do here by declare that the above information is given according to the best of my knowledge.

Signature.
