A Java Software Developer with a strong focus on Backend Development, backed by two years of hands-on experience and solid industry exposure. Known for a proactive problem-solving attitude, I possess a highly analytical mindset and a strong aptitude for learning. My excellent interpersonal and collaborative skills have consistently contributed to successful project outcomes. I am eager to work in a challenging environment where I can leverage my expertise to benefit the organization while continuously developing my own skills.

TECHNICAL SKILLS

- Technologies : Java, Spring Boot, Spring WebFlux, GraphQL, HTML, CSS, JSON, ReactJS, JavaScript
- Database : MySQL, PostgreSQL
- IDEs : VS Code, MySQL Workbench, IntelliJ IDEA
- Tools : GitHub, Jira, Jenkins, Kibana, Kubernetes

PROFESSIONAL EXPERIENCE

1. Software Engineer, Happiest Minds Technologies.

June 2023 – Present

Project: Wiley - Research Authors

Description:

- Developed a platform for authors to submit and publish research papers, including features for signing certificates and managing access based on user roles.
- Implemented an admin approval workflow to ensure that research papers meet quality and compliance standards before publication.

My Roles:

- Engaged in all phases of the Software Development Life Cycle (SDLC) using Agile methodologies, contributing to requirement analysis, design, development, and support.
- Developed complex modules for user authentication, integrating login and registration functionality with a third-party site.
- Built REST APIs and managed MySQL database operations to securely store and manage user data.
- Created a comprehensive mock server to simulate project environments for testing purposes.
- Assisted in frontend development using React JS, HTML, and JavaScript, and supported the Quality Engineering (QE) team for three months.

Technologies used: Java, Spring Boot, Spring Boot WebFlux, REST APIs, MySQL, Postman, Liquibase, Selenium

2. Software Engineer, Happiest Minds Technologies.

August 2022 – May 2023

Project: Wiley - EdpubConvergence

Description:

- Developed an e-book platform that included features such as books, chapters, lessons, multimedia content, dictionary, and non-editable content.
- Integrated various content types to provide a seamless learning experience for users, enhancing the educational capabilities of the platform.

My Roles:

- Conducted requirement analysis, design, and development of backend components, ensuring alignment with project objectives.
- Developed REST APIs and GraphQL services to handle various functionalities, including user authentication using JWT tokens.
- Managed PostgreSQL database modifications to support evolving project needs.
- Performed unit testing, peer reviews, and troubleshooting, ensuring high-quality deliverables and smooth project execution.

Technologies used: Java, Spring Boot WebFlux, REST APIs, GraphQL, PostgreSQL

EDUCATIONAL QUALIFICATION

Course : BE in Computer Science Engineering.
College : Vidyavardhaka College of Engineering.
Course Duration : Aug, 2018 – Jul, 2022
Percentage : 8.12 CGPA

AREAS OF INTEREST

- Mathematics • Statistics • Badminton • Chess • Volleyball • Gardening • Volunteering
- Coin Collecting • Travelling
