

Wasim Khan

Frontend developer with **5+ years** of experience building scalable, accessible web applications using **React, Next.js, TypeScript, and Redux**. Proficient in modern **JavaScript (ES6+)**, React ecosystem tools, and UI/UX best practices. Adept at optimizing performance, ensuring Web accessibility guidelines, and collaborating with cross-functional teams to deliver user-centric solutions in Agile environments.

TECHNICAL SKILLS

- **Frontend Technologies:** ReactJS, TypeScript, JavaScript (ES6+), NextJS, HTML5, CSS3, SCSS, Redux, Context API, RESTful APIs, GraphQL, Axios, React Hooks, React Router
- **Styling Libraries:** Material UI, Chakra UI, styled components, Bootstrap
- **Testing Frameworks:** Jest, React Testing Library (RTL), Storybook, SonarQube
- **Best Practices:** Agile/Scrum, SEO, Web Accessibility(WCAG 2.0), Responsive Design, Cross-Browser Compatibility, Atomic Design Principles, Generative AI
- **Additional Tools:** Git, GitHub/GitLab, Vite, Figma, Yarn, NPM, VS Code, Cursor AI

WORK EXPERIENCE

Publicis Sapiient

04/2022 - Present

Associate Technology Level 2

Bengaluru, India

- **Delivered high-impact features** such as Q&A, rating/review, discounts/promotions, brand-aligned component libraries, PDP, Cart, Checkout, and Order pages for enterprise clients including **Lloyds Bank, Wawa, The Children's Place, and BJ's Restaurant**.
- Ensured compliance with **non-functional requirements (NRF)**, including web accessibility standards (**WCAG 2.0**) and Google Analytics (**GA4**).
- Built **cross-browser compatible, mobile-responsive** UIs using **SCSS** and **styled-components**, ensuring a seamless experience across devices and browsers.
- **Optimized application performance** through **code reviews**, unit testing (**Jest/RTL**), and profiling.

Techsophy

01/2020 - 03/2022

Associate Software Engineer

Hyderabad, India

- **Developed Techsophy Foundation Framework**, a SAAS-based low-code business automation platform, from scratch by analyzing business requirements, collaborating with cross-functional teams, and delivering scalable solutions.
- **Participated in knowledge-sharing initiatives**, delivering monthly technical presentations and mentoring freshers to accelerate team onboarding and competency development.

PROJECTS

Wawa (Associated with Publicis Sapiient)

- **Tech Stack:** React.js, Next.js, TypeScript, GraphQL, Storybook, Jest, SonarQube
- Implemented item-specific discounts and promotions across **customer-facing pages** (PDP, Cart, Checkout, Order Confirmation), improving upsell opportunities and user engagement.
- **Resolved 50+ SonarQube quality issues**, improving **code coverage to 85%** and application stability.
- Incorporated **Storybook** into the Wawa design system library, improving component documentation and testing processes.

The Children's Place (Associated with Publicis Sapiient)

- **Tech stack:** React JS, Next JS, TypeScript, Pixlee, GA4, WCAG 2.0, AEM, Cirrus UI, Jest
- **Led the migration** from the existing BazaarVoice **review and rating system** to Pixlee, ensuring alignment with the brand's design language.

- Integrated a Question and Answer (Q&A) capability for products in the application, **boosting customer engagement by 10%**.
- Built AEM-based content-authorable components, **ensuring cross-browser compatibility** and WCAG 2.0 compliance.

BJ's Restaurants (Associated with Publicis Sapient)

- **Tech Stack:** ReactJs, NextJs, Typescript, Redux Toolkit, GraphQL, React Query, SCSS, Styled Components, Chakra UI, Jest, RTL
- **Applied atomic design principles** to implement **30+ reusable atoms/molecules**, optimizing development efficiency.
- **Unit-tested code** using React Testing Library(RTL) and Jest to ensure error-free functionality.
- Implemented Next.js SSR/SSG to **improve SEO performance** for high-traffic product pages.

TechsoPHY Foundation Framework

- **Tech Stack:** ReactJS, TypeScript, Context API, Redux, React Router, Material UI, Axios, Jest, RTL
- Researched and **implemented 10+ micro-frontends**, improving application scalability and **reducing build time by 35%**.
- Created a **centralized design system** adopted across micro-frontends, standardizing UI components and **reducing development time by 50%**.
- Integrated Keycloak for **identity and access management**, securing the application with **role-based access control**.
- Collaborated with backend teams to **integrate REST APIs** and **implement theming** via Context API.

CERTIFICATIONS

- React - The Complete Guide (incl. Hooks, React Router & Redux) | [Udemy](#)
- Creating Accessible Websites | [Udemy](#)
- JavaScript Algorithms & Data Structures | [freeCodeCamp](#)

ACHIEVEMENTS

Google India Challenge Scholarship (2018)

Recognized as a potential scholar in Front-End Web Development, focusing on modern practices and responsive design techniques.

EDUCATION

Future Institute of Technology

Mechanical Engineering

2015 - 2019

LANGUAGES

- **English:** Professional Working Proficiency
- **Hindi:** Native Proficiency
