

YESWANTH E

Snowflake developer

+91 7871685258

vijayayeshwanth48@gmail.com | [LinkedIn](#)

SUMMARY:

Nearby 3 years of experience as Snowflake Data Warehousing development & PL/SQL development. Involved creation of the snow pipe to integrate the data between the AWS cloud to the snowflake DB. Having knowledge on the time travel, fail safe and also data sharing between the snowflake accounts. Used sequences to generate the data sequence number for the primary key serial of data. Involved creation of the snow stream object to create the audit table data backup of the data whenever the DML is happening on base tables. Involved oracle PLSQL procedure to data validation in the source side to check the functional data dependency and the technical errors. Used the Clone technique in snowflake database to take the backup of the data whenever needed.

PROFESSIONAL EXPERIENCE:

ETL DEVELOPER, Ahana Systems and Solutions Pvt Ltd, Bengaluru.

CURRENT PROJECT

Feb 2022 to Now

Domain	: BFSI
Role	: Snowflake developer
Client	: RHB bank.
Environment	: Oracle, AWS S3, Snowflake DB

Roles and Responsibilities:

- Data Migration from Oracle Database to Snowflakes using Flat files for application Migration from Oracle DB to Snowflake.
- Experience in Snowflakes Object Development such as warehouses, Schemas, Database, Tables, Views, Pipes, Stages, Scaling Policies
- Utilization, Roles. Data migration for Structured Data: By creating Stage & Copy, Transforming
- Data, Copy on Error, File Format & all Copy Options.
- Have hands on Experience on Loading Unstructured data on minimal load using VARIANT Datatype, Flatten, Parquet, etc.
- Developed Snowflake Procedures, Functions and UDTF (User Defined Table Function)
- Created External table to access the data from the files, when the file access is denied in AWS S3.

PREVIOUS PROJECT

Domain	: BFSI
Role	: Snowflake developer
Client	: Alpha bank.
Environment	: Oracle, AWS S3, Snowflake DB

Roles and Responsibilities:

- Created PL/SQL packages, procedures, functions, triggers, and exception handling for retrieving, manipulating, checking and migrating complex datasets.
- Optimize query and performance tuning using indexing, partitioning, tracing query, collections in oracle PLSQL.
- Converted the business need into technical complex SQL queries and subqueries using analytical functions, joins, operators.
- Created Snow Pipe to read the data from the AWS S3 and loaded the data to Snowflake DB to ensure the continuous data integration between the oracle and snowflake DB.
- Created snow tasks as task tree to read the data from the snow stream objects which are created on the base table, to maintain the backup of data while happening DML operation in the target snowflake DB

EDUCATIONAL QUALIFICATION:

- **Bachelor of Engineering**, Government college of technology, Coimbatore. **May 2019**
CGPA: 7.0
- **HSC**, Sri Venkateshwara Mat. Hr. Sec. School. **May 2015**
Grade: 97%
- **SSLC**, Sri Venkateshwara Mat. Hr. Sec. School. **May 2013**
Grade: 94%

TECHNICAL SKILLS:

- **Programming Languages:** Python, PL/SQL
- **Visualization:** Power BI
- **Database:** MYSQL, Oracle, AWS S3, Snowflake DB
- **Data warehouse:** Snowflake
- **Operating Systems:** Windows, UNIX
- **ETL Tools:** SSIS, SAP BODS, Informatica, SAP HANA

TECHNICAL CERTIFICATIONS:

- Snowflake developer

PERSONALITY TRAITS:

- Good communication skills
- Excellent Logical thinker
- Good Problem Solver
- Excellent presentation skills
