

Yash Raj Saxena

A smart contract developer and software engineer, Security Auditor/Researcher and avid learner seeking opportunities to gain experience in new technologies. Capability to work in teams and support the team by providing valuable feedback.

Work Experience

Smart Contract Developer in Neemo Finance

July 2024 - Present

- Development of a Smart Contract with Optimization.
- Testing the Smart Contract for bugs and rectifying the inconsistencies.
- Researching protocols, security, and strategies.
- Impact:
 - In Etherfi vs Swell Research, I provided the data and points that helped Neemo choose Etherfi for the collaboration.
 - In Audit our contract findings are Zero Critical, medium, and low bugs. except one informational

Other:

- Make a Omnichain app using LayerZero.
- Slither is for the static analysis of the smart contract vulnerability.

Projectes

NFT Marketplace (Website)

From Jan 2024,

- I developed an NFT Marketplace allowing users to explore, trade, and buy NFTs using React.js for the interface and Web3.js for secure blockchain interactions. I also integrated MetaMask wallet functionality for secure DeFi transactions, enabling users to manage crypto assets and acquire NFTs easily. it is a mini project done in 3-4 hours.

Health Assist(IEEE Hackathon in NITK)

Dec 2023 - 48 hours

- Real-time Collaboration & Research: Facilitates progress tracking, data sharing among professionals, and archives cured cases for advancing healthcare research.
- User-Friendly Interface: Ensures seamless navigation for patients and professionals, enhancing the overall healthcare experience.

PayShift (Bill splitting system in Hackathon)

Apr 2023 - 24 hours

- Streamline shared finances with PayShift's user-friendly interface for expense tracking, debt settlement, and financial reports.
- * Create groups, add bills and payments, and automate calculations to effortlessly manage shared expenses.

Educational Background

Bachelor of Enginneing

HKBK Collage College of Enginnering

Oct 2020 - July 2024

- Operating System, Database Management System, Object Oriented Programming, Software Engineering

Skills

Languages

- Solidity
- JavaScript
- Python
- C++
- HTML, CSS

Database

- SQL
- MongoDB

Framework/Libraries

- Foundry
- Hardhat
- Ether.js
- web3.js and web3.py
- Slither
- React.js
- FastAPI

Languages

- English (Fluent)
- Hindi (Fluent)

Certification/Short Courses

- JavaScript Essentials by Cisco Network Academy
- Responsive Web Design by Freecodecamp
- Git and GitHub by Udemy
- Python by HackerRank and Kaggle

Additional Information

- Research Paper Publication in IEEE International Conference (ic-ETITE'24) at VIT Vellore (Feb 2024)
- Led college's technical team twice for C/C++ workshops, demonstrating technical expertise and driving results in 2022
- 3rd DAN Black Belt in Taekwondo.
