Professional Summary

Experienced and skilled in iPhone app development with strong current background in industrial technology. Proven ability to work independently or as part of a team. Adept at technical troubleshooting and anticipating future potential problems and have strong background in Computer Science and Software Engineering. Developed native iOS based applications. Experienced with Swift, Swift UI, Cocoa frameworks, Modular Design, Apple Design Patterns, MVC, MVVM, TCA, Advance Debugging and Reverse Engineering.

Technical Skills

Programming Languages: Swift, Objective-C, Swift UI

Development Platform: Xcode

Architecture: MVC, MVVM, MVP, The Composable Architecture (TCA)

Frameworks: UIKit, Swift UI, Core Data, Cocoa Touch, Core Location, Foundation, XCTest, WebKit, MapKit.

Tools Experience: SourceTree, Azure Devops, JIRA.

Storages: Core Data, User Defaults, Keychain, Property List, File Manager.

Professional Qualifications

- Developed native iOS products compatible with iPhone and iPad devices by following Design Guidelines.
- Shipped apps to the App Store, with experience in the App Approval Process.
- Worked closely with other Development teams to improve consistency and timing of release.
- Developed the UI screens by integrating different views and windows to make it user friendly.
- Worked on Total end-end development with Restful JSON and Web Services.
- Strong Knowledge of Swift, UIKit, Cocoa Touch, Core Data and Core Location Services.
- Experienced with social logins such as Google and Facebook using SDK's.
- Solid knowledge of the Software Development Life Cycle.
- Experienced in Integrating Flutter UI's on native iOS application.

Advanced Skills

- Solid knowledge of MVC, MVVM, TCA, Singleton, KVC(KVO), Delegate design Patterns, Memory Management (ARC), Multithreading, Concurrency, Blocks Programming, Grand Central Dispatch, Core Location, Interface Builder, Spatial Reasoning.
- Familiar with frameworks such as Alamofire, AVFoundation, Foundation, UIKit, WebKit, MessageUI, MapKit, Mobile Core Services.
- Ability to store data locally using Core Data, User Default, Key Chain.
- Outstanding team work, Verbal communication skills, SourceTree, Git for source code maintenance.

Career Summary

1. GAVS Technologies, Chennai.

Period : Dec-2023 – Sep-2024

Role : Sr. Software Engineer-II

3. Photon Interactive Pvt.Ltd, Chennai.

Period : Aug-2021 – Dec-2021

Role : Sr. Software Engineer - III

5. Maestro Technology, Coimbatore.

Period : April-2018 – Nov-2018

Role : Junior iOS Developer

2. Contus Tech, Chennai.

Period : Jan-2022 – Sep-2023

Role : Sr. Software Engineer - III

4. Twilight IT Solutions, Puducherry.

Period : Nov-2018 – July-2021

Role : iOS Developer

6. eVenturers Solutions Pvt.Ltd, Puducherry.

Period : Sep-2017 – Feb-2018

Role : Trainee iOS Developer

Educational Qualifications

Master of Computer Application

Pope John Paul-II College, Puducherry.

Graduated on Aug - 2017

Marks - 80%

Bachelor of Computer Science

Loyola College, Chennai, Tamil Nadu.

Graduated on Feb - 2015

Marks – 83%

Frontier Airline

Scope: This application is under the development and using Swift UI language and TCA architecture to Book flights & check-in with the Frontier app to save time and money. Travel is easier than ever before with the Frontier Airlines mobile app.

Roles and Responsibilities:

- Designed UI screens for Book a Flight, Flight Summary, Flight Trip Card, Change Flight, Cancel Flight.
- Integrated Flutter view on native iOS application.
- Triggered actions in native iOS application from flutter views user defined action (Button action, Notification) through invoke method and method channel.
- Bug fixing across the application.
- Maintained source code in Azure Devops using SourceTree.

Device: iPhone

MirrorFly

Scope: MirrorFly is a secured Real time messaging, Live video calling, and high quality voice calling application. It's a product of Contus Tech. The application has all the features of the What's App application in it. The user is able to chat and make calls between another user by identifying their contacts from the user's device contact list.

Roles and Responsibilities:

- Changed UI with suitable icons across the new application such as YOo.
- Developed each module using Swift 5 language and SourceTree is used for module integration.
- Bit Bucket used for the source code maintenance.
- Integrated Restful API using JSON object serialization.
- Responsible for making sure the application is running fine in iPhones and iPad, which runs iOS 12 and later.

Device - iPhone & iPad.

Yabsys

Scope: Yabsys is an integrated MirrorFly application to helps the user to raise the complaints about the environmental department with the proof of the attachments such as audio, video, documents and images. The user will notify about the raised concern whenever the status has changed. The application has a status tracking system about the raised concerns.

Roles and Responsibilities:

- Grievance List - Designed UI's to list the raised concerns. Synchronized concern status on UI and updated the status of the concerns with JSON Restful API service.
- Developed each module using Swift 5 language and Source Tree is used for module integration.
- Integrated Restful API using JSON object serialization.
- Responsible for making sure the application is running fine in iPhones, which runs iOS 13 and later.

Device - iPhone & iPad.

MYn - SUPER APP & BEYOND

Scope : MYn, India's 1st super app is a strive towards a healthy and engaging digital experience for the local creators, local business, enterprises and consumers .This application has the feature that allows users to watch the online streaming videos and tv shows based on their subscription. Also allows users to ride from one location to another location.

Roles and Responsibilities

- Designed UI's for the end to end ride booking and ride status.
- Displayed and updated the values of the booking status, distance, fare, driver details with ratings with Restful api services.
- The product framework is written in Objective C language and used in application.
- Developed each modules using Swift 5 language and Source Tree is used for module integration.
- Integrated Restful API using JSON object serialization.
- Responsible for making sure the application is running fine in iPhones, which is runs iOS 11 and later.

Device – iPhone

Boots

Scope: Boots is developed the UK's & ROI's leading pharmacy-led health and beauty retailer. This application is to help our customers look and feel better than they ever thought possible. Boots UK & ROI's is part of the Retail Pharmacy International Division of Walgreens Boots Alliance, which is a global leader in pharmacy-led, health and wellbeing retail.

Roles and Responsibilities:

- Designed UI's such as Offer indication on dashboard after advantage card linked.
- Designed UI's for Advantage Card Existence with copy code action.
- Developed each modules using Swift 4.4 language and Source Tree is used for module integration.
- Integrated Restful API using JSON object serialization.
- Responsible for making sure the application is running fine in iPhones, which is runs on iOS-11 and later.

Device – iPhone.

Languages

- English – To speak and write
- Tamil – To speak and write

Personal Details

Father's Name: Mr. A. Augustine

Marital Status: Married

Date of Birth: 14-Nov-1993
