iOS Developer

Experience 3.6 years,immediate Joiner

Noida 

SUMMARY

iOS Developer with 3.6 years of experience in Swift, Xcode, and mobile app development. Proficient in MVC/MVVM architecture, I have developed key modules for the A360 product at Droisys, focusing on reusable components, API integration, and performance optimization. Skilled in Cocoa Touch, UIKit, Realm, GCD, ARC memory optimization, and Firebase, I am adept at resolving bugs and enhancing app efficiency in an Agile environment. My project experience includes A360, a CRM platform, Gallo AI, an image recognition app, at IDS Logic, worked on a pregnancy club app that provides advice and baby information through print and digital media.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

B.Tech in Computers Science
2016 – 2020

SKILLS

- [Pregnancy health](#)
- [Due date calculator](#)
- [Baby's monthly development](#)

iOS Developer

Droisys | 2021 - 2024 (April)
Project Name - A360 and Gallo AI

A rich CRM and retail execution platform for suppliers and distributors, enabling permission-based data sharing and reports. Account360 CRM is revolutionizing how Producers and Wholesalers in the beverage industry collaborate. With a unified platform, they can perfect retail execution while addressing industry needs efficiently. Benefits of using Account360ai include enhanced customer insights, improved customer service, and targeted marketing. By leveraging AI capabilities to analyze data, predict customer behavior, and automate tasks, businesses can improve operations and deliver exceptional customer experiences. An Account360ai app that analyzes images captured by the device's camera or gallery to identify the brand and supplier of detected bottles.
