

AMAN GUPTA

Call: [+91-8827994543](tel:+91-8827994543)

TECHNICAL SKILLS

- ❖ Tableau
Desktop/Public/Server
- ❖ Tableau Prep
- ❖ SQL
- ❖ MS Excel (Advance)
- ❖ Power Bi
- ❖ Python
- ❖ Statistics
- ❖ Machine Learning
- ❖ Data Warehouse
- ❖ Data cleansing
- ❖ Requirement Gathering

OPEN TO WORK FOR

- ❖ DATA ANALYST
- ❖ MIS EXECUTIVE
- ❖ BUSINESS ANALYST
- ❖ RESEARCH ANALYST

STRENGTH

I have very good knowledge in tableau and excel. I can compare myself to those people who have 3-4 years of experience.

EDUCATION

B TECH (CSE)
AKS UNIVERSITY
7.8 CGPA
SINDHU HIGHER SECONDARY SCHOOL
12TH 68%
SINDHU HIGHER SECONDARY SCHOOL
10TH 80%

LANGUAGES

English
Hindi

OBJECTIVE

Experience in dashboard design, analysis development and implementation of various applications using BI Tools. Develop and maintain dynamic data visualizations and dashboards using Tableau desktop.

WORK EXPERIENCE

Apsis Technologies Private Limited, APSIS • October- 2023 - present

- ❖ Understanding business requirements and plan solutions to address data needs, through Designing & Creating interactive dashboards and developing reports using visualization tools like Tableau Desktop.
- ❖ Develop, design, and maintain Tableau dashboards and analytics.
- ❖ Manage and utilize the Tableau platform to extract meaningful insights from it.
- ❖ Prepare reports using various visualization and data modeling methods.
- ❖ Define KPIs and consistently measure them in the datasets.
- ❖ Designing interactive dashboards with Filters like Context Filter, Quick Filter, Action Filter, Date Filter, LOD, Calculated field and Parameters to make it more user interactive.
- ❖ Drill-down data and prepare reports with utmost accuracy.
- ❖ Experience in various reporting objects like Hierarchies, Sets, Groups, and Calculated Field (Date Calculations, IF and Else, Case).
- ❖ Creating various charts such as Bar chart, line chart, Filled Maps, Dual axis chart, Pie Charts, Side by side bar, Bar in Bar, Tree Maps, Heat Maps and Line Charts, custom charts like donut chart, pareto chart, bullet chart.
- ❖ I have also worked in advanced **Excel** like **macros, index, matches, Vlookups, validation, case statement, nested if-else, Hyperlink, slicer, Pivot table, different types of formulas and charts.**

PROJECT SUMMARY

Project Description: Creating a Tableau dashboard that is interactive and can analyze year-to-year growth, weekly transaction levels, and areas of high demand by analyzing multiple measures and divisions. What area do competitors have a good level of quality in.

Tools Used : Tableau, My SQL.

Responsibilities:

- ❖ Identification of relevant Key Performance Indicators (KPI's) with respect to project requirements such as Quantity Sold, Total Sales, Discount given, Customer Count , Sales increasing or decreasing, YOY sales , YOY Quantity, YOY Customer.
- ❖ Creating Map chart for region, state & city wise analysis, Line charts for seasonal analysis, Tree charts & Multi measure chart ,Bump chart ,symbol chart for category & component wise analysis, Dual axis chart for variance analysis.
- ❖ Carry out Date Calculations like YTD, QTD, MTD to analyze the data.
- ❖ Create various interactive filters using Parameters, Calculated fields to make charts fields dynamic and also use of filter actions to send information between worksheets & Dashboards
- ❖ Used Images as the filter for dynamic charts to analyze the dashboard.

PERSONAL PROJECTS USING (PYTHON & MACHINE LEARNING)

House Prices (Advanced Regression Techniques)

AIM: Predictive model that accurately estimates the sale prices of residential homes based on various features and attributes. This competition challenges participants to apply advanced regression techniques to solve a real-world problem in the domain of real estate. By accurately predicting house prices, participants aim to enhance their understanding of the factors influencing real estate markets and contribute to the development of sophisticated regression models applicable in the industry

Tools and Technologies: Python, Python library(Numpy, Pandas, Matplotlib, Scikit Learn, Machine Learning, Seaborn), Visual Studio Code, Jupyter Notebook.

Link: <https://github.com/Aman-200/house-prices-advanced-regression/blob/master/house-prices-advanced-regression.ipynb>

Movies recommended system

AIM: The primary goal of movie recommendation systems is to filter and predict only those movies that a corresponding user is most likely to want to watch. The ML algorithms for these recommendation systems use the data about this user from the system's database.

Tools and Technologies: Python, Python library(Numpy, Pandas, Matplotlib, Scikit Learn, Machine Learning, Seaborn), Visual Studio Code, Jupyter Notebook.
