

Yerni Kameshwari Vanka

Hyderabad | 9553753766 | yernivanka23@gmail.com

Summary

Data Analyst with 2+ years of experience in application development, database administration, sql server development and advanced data analysis. Proficient in SQL query optimization and data warehousing, achieving a 75% boost in performance and building 3 data warehouses with SQL Server Integration Services. Implemented automated scripts for backup and recovery, improving resilience and reducing downtime by 70%

Skills

- Python
- PL/SQL
- Linux
- Power BI
- MongoDB
- Excel
- Oracle Database
- SQL
- Data Warehousing
- Tableau Functions
- Data Analysis
- SSIS

Experience

DATA ANALYST

IBM - Hyderabad

Telecommunications (AT&T)

Tools:-

Oracle SQL, Putty, WinSCP, SoapUI, Insomnia, PostMan, LeanKit, XXD, iTrack.

Summary:-

Developed applications for the tracking of transactions, storing and retrieving the data efficiently, used to perform code reviews to ensure the proper deployments of the application and contributed in fixing the bugs and adding the new features for the upgraded versions of the product Oracle 19C.

Roles & Responsibilities:-

- Performing code reviews to ensure adherence to coding standards and best practices.
- Developed, Tested, Debugged and Documented oracle PL/SQL packages and types in accordance with company policies, company Standards, and industry best practices, ensuring satisfaction in performance.
- Translated business requirements into technical requirements, delivering an application code that is fully tested, meets the business requirements and 100% compliance with all company/organizational Standards.
- Participating in the deployment and support of database changes and releases.
- Managed workload independently but collaborated with colleagues to complete larger scale tasks in distributed team environment.
- Performing the User Tests to identify and resolve the issues for the developed code according to the requirements.
- Continuously optimized SQL queries for improved database performance and efficiency, reducing query run times and enhancing data retrieval speeds.
- Collaborated with cross-functional teams to gather requirements and clarify project specifications, ensuring alignment with business objectives.

DATA ANALYST

IBM - Hyderabad

Zomato Restaurant Data Analysis

Tools :-

Power BI, SQL

Summary :-

Developed an interactive Power BI dashboard analyzing North Indian, South Indian, and mixed cuisine restaurants using Zomato data to inform location decisions for a new restaurant. Focused on identifying top-rated restaurants by area, cost trends, and online availability to uncover market opportunities and gaps.

Roles and Responsibilities:-

- Extracted, cleaned, and prepared Zomato restaurant data by cuisine type (North Indian, South Indian, both) for accurate analysis.
- Conducted data analysis to identify top-rated restaurants by area, average dining costs, and online ordering availability.
-
- Designed and developed an interactive Power BI dashboard with map, bar, and pie charts, enabling dynamic filtering by area and cuisine type.
- Interpreted data to provide market insights and strategic recommendations for ideal restaurant locations and popular cuisine types.

Education and Training

Anil Neerukonda Technology & Sciences - Vishakapatnam

Electronics and Communication Engineering

Azure Database Administrator Associate | Microsoft

Oracle Database SQL Certified Associate (RDBMS)
