EXPERTISE

Operating Systems: Centos, Ubuntu, Amazon Linux and Windows

Web servers: Apache, Nginx and IIS.

AWS - Ec2, EFS, RDS, S3, CloudWatch, VPC, IAM, Route53, ELB, Auto-scaling, SES, Cloudfront, WAF, Workspaces, ACM, SNS, Compute Optimizer, Cost explorer, elastic cache, redis, Lambda, security groups, IP routing

Azure: Web apps, SQL database and SQL server

Firewalls: CSF, IPTables, Immunity360 and UFW

EDUCATION

Bachelor of Engineering, 2016

Electronic & Communication Engineering
King College of Technology

Higher Secondary, 2012

St. Mary's Higher Secondary School

CERTIFICATION

- AWS Certified Solutions Architect - Associate (SAA)
ID: 5CN481D16MBQQBK9
Validity: Nov 2022 - Nov 2025

HOBBIES

- Listening to music
- Playing Cricket & Football
- Photography

PROFILE

A dedicated and results-driven Site Reliability Engineer with more than 6 years of experience in designing, implementing, and maintaining highly available and scalable infrastructure. Proficient in utilizing cutting-edge technologies and methodologies to ensure the reliability, performance, and security of complex systems. Skilled in automating processes, optimizing system performance, and troubleshooting issues to minimize downtime and enhance overall system stability.

WORK EXPERIENCE

Cloud Engineer

WEBSCALE NETWORKS

Aug 2022 - Nov 2023

- Developing and managing infrastructure within AWS and GCP cloud environments.
- Collaborated with various AWS services, including EC2, VPC, ALB, S3 Buckets, AMI, ASG, RDS, Route53, ECS, Cloudwatch, Log Groups, and more.
- Provisioned new server instances as part of system deployment.
- Monitored customer servers using Sumo Logic and Grafana to ensure optimal performance.
- Conducted AWS instance re-imaging to maintain system integrity.
- Managed customer deployments with an emphasis on achieving zero downtime during the process.
- Oversaw disk space management to optimize storage resources.
- Administered cache management, specifically Redis cache.
- Executed logical volume management, including the reduction of LVM as needed.

Server Administrator

POORNAM INFOVISION PRIVATE LIMITED

Jan 2021 - Jul 2022

- Implemented monitoring on Linux servers utilizing tools such as Nagios and Zabbix while overseeing server management.
- Delivered hosting support to end customers through WHMCS and managed DNS configurations.
- Applied necessary file permissions for designated users and groups.
- Performed user account resets, as well as locking and unlocking accounts as needed.
- Managed disk space to optimize storage resources.
- Executed logical volume management, including the reduction of LVM as required.

Server Administrator

WIZTELSYS SERVER TECHNOLOGIES

Feb 2020 - Jan 2021

- Managed remote logins for A2 Hosting and offered hourly support to end customers.
- Oversaw customer websites and applications on cPanel servers, configuring user access permissions.
- Utilized remote login tools such as SSH and telnet for server access and management.
- Performed compression and decompression tasks using tar and gzip.

Server Administrator

METCLOUDS TECHNOLOGIES PVT LTD

Jul 2017 - Jan 2020

- Managed server security by implementing hardening measures and handling firewall administration for both VPS and shared servers.
- Installed and configured control panels and monitoring tools to ensure effective server management.
- Administered EC2 instances, handling server configurations, and served as a system administrator for user, group, and permission-related tasks including user account resets and account locking/unlocking.
