

OBJECTIVES:

Willing to work under a challenging and professional environment with exposure to new technologies as an SQL and MSBI developer in the area of SQL SERVER 2012, 2016 with Enterprise Portal and where there is ample scope for Organizational growth as well as individual growth.

SUMMARY:

- **4 Years of experience in Development and Support of Microsoft SQL server 2012 & 2016 in Development and production Environment on various business domains like health care & Insurance.**

SQL Server:

- **Very good experience in writing simple and complex queries using Joins & Sub queries.**
- **Having good experience in system defined functions like String, Ranking, Aggregate and Date Functions.**
- **Excellent experience in Designing Database Objects like Tables, Constraints, Views, Joins etc.**
- **Hands on Experience in using Temp tables, Table Variables and CTE (Common Table Expression).**
- **Experience in constructing Stored Procedures, Triggers, User Defined Functions, Views, Synonyms, and Indexes.**
- **Good Knowledge in Transactions and Isolation Levels**
- **Good Experience on using Identity property.**

SQL Server Integration Services:

- **Very good knowledge in using Foreach loop container to load multiple source files into database tables.**
- **Expertise in using Data flow task, Execute SQL task, FTP task, File system task, Execute Process task, Send Email Task.**
- **Having very good experience in using Transformations like Data Conversion, Merge, Merge join, Union all, Conditional split, Derived column, Sort, Aggregate.**
- **Expertise in Incremental loading and also able to maintain historical data regularly by using transformations like Lookup and SCD.**
- **Having very good knowledge in implementing SSIS Loggings, Checkpoints, Break points and Package Configurations.**
- **Having very good experience deploying the packages into integration catalog and packages can be automated by using SQL server agent jobs.**

SQL Server Reporting Service:

- **Having good knowledge in creating Table matrix, Sub reports, Drill down reports, Drill through reports.**
- **Expertise in creating Parameterized report and cascading reports.**
- **In report manager level, having a very good experience in creating Linked report, Snapshot, and Cache report.**
- **Hands on Experience in deploying the reports to report server and having a better knowledge in creation of subscriptions to schedule the report.**

Power BI:

- **Implementing SSRS Data sets in Power BI reports.**
- **Created Tabular Reports and worked on Migrating the Reports.**
- **Created Matrix Reports and added filters based on Client requirements.**

C BABY
Mobile: +91 9502648402
Email: babybc084@gmail.com

Technical skills:

Relational Databases : SQL Server 2012/2016
BI Tools and Packages : SQL Server Management Studio, SSIS, SSRS and Power BI Desktop.
Languages : T-SQL, SQL
Application Packages : MS Office, MS Outlook (Microsoft Office Suit)

Professional Experience:

- Working in Capgemini Technology Services as Consultant, Bangalore since Aug-2021 to Till Date.
- Worked in Medi Assist as Software Engineer, Bangalore since Jul-2019 to Aug-2021.

Education:

B. Tech 2018 from JNTUA.

Project Experience:

PROJECT#1

Title : Royal & Sun Alliance (RSA)
Client : RSA
Role : SQL, T-SQL, SSRS, SSIS and Power BI Developer.
Duration : Aug-2021 to Till date.

Project Description:

RSA is one of the world's leading multinational insurance groups and offers both commercial and personal insurance and through subsidiaries **Codan and Trygg-Hansa**. This project is about loading the Data warehouse from different source systems (Legacy and TIA). Data from Data warehouse is loaded into DataMart for reporting services. Datawarehouse is loaded with different SSIS packages, Stored procedures, SQL objects. This project involves Maintaining the ETL Packages, SQL Objects in the SQL server.

Roles & Responsibilities:

- ETL Design & development to populate staging tables with different sources.
- Analyzed the requirements & tasks and worked on the same.
- Involved in ETL development on converting one source system to another main source system for staging tables.
- Involved in Unit Testing & Functional Testing.
- Worked on scheduling Job in SQL Agent to run SSIS package.
- Proper Error Logging and Email Notification from ETL Package.
- Build and Deployment of the ETL solution into higher environments and support the same.
- Worked on defining Subscriptions to trigger email for SSRS report in Share point.
- Monitored the business daily loads and reports which are running on production server.
- Worked on updating monthly reports and shared with business users.
- Involved in month end activity on monitoring and execution monthly jobs and sending reports in email with business users.

PROJECT#2

Title : Common Data Storage
Client : Piramal Swasthya Management Research Institute (PSMRI).
Role : SQL, T-SQL, SSRS and SSIS Developer.
Duration : Jul-2019 to Aug-2021.

Project Description:

CDS main objective is to get the data from **MHS(Mobile Health Services)**, **Telemedicine** and **HIHL(Health Information Helpline)** which are different modes of healthcare services of Piramal Swasthya, with the use of SSIS the data is extracted from the above stated operational sources and transformed into unified format and loaded into the Data Base for providing Piramal Swasthya with patient centric reporting as well as other necessary Business Intelligence based on the available data, which answers the analytical questions related to a beneficiary as well as the service providing analytics of Piramal Swasthya Management Research Institute.

Roles & Responsibilities:

- Actively participated in interaction with team lead and technical manager to fully understand the requirements of the system.
- Loading data from flat files, excel, and databases to the staging area and Data Bases.
- Developing **SSIS** packages according to the **ETL** specifications using various transformations.
- Creating **views, functions, and stored procedures** as per the client requirements.
- Writing complex **SQL** queries.
- As per the requirements developed the reports which involve more number of grouping and multi value parameters.
- Developing various **Parameterized, Matrix, Drill-through** and **Drill-down reports** using **SSRS**.
- Analyzing the problem and solving **SQL** related issues.
- Ensured delivery of expected results on time.
- Developed reports and deployed them on server using **SQL Server Reporting Services(SSRS)**.
- Scheduling the **SSIS** packages and **Jobs**.
