EDUCATION

B.Tech - Computer Science with Specialization in Blockchain

VIT Vellore

2021 – 2025
Vellore, India

- GPA : 8.03/10
- Actively participated in athletic events and tournaments and balanced academic responsibilities alongside extracurricular involvement
- Completed a minor degree in microeconomics with Grade B

Junior College(HSC)

Pace Junior Science College, Mumbai

2019 – 2021
Mumbai, India

- Successfully completed 12th standard examinations with 88%.

School(ICSE)

Hiranandani Foundation School, Powai

2019
Mumbai, India

- Successfully completed 10th standard examinations with 95% and also received the Governors Gold award given to a students who achieved 90+ marks in all subjects

PROJECTS

Decentralized Voting Application (DApp)

- Designed and developed a secure and transparent decentralized voting application (DApp) using Solidity on the Ethereum blockchain with deployment on the Sepolia testnet.
- Integrated robust smart contracts, MetaMask for user interaction, and Remix IDE for streamlined development to ensure the integrity and reliability of the voting process.

Merkle Root Verifier

- Developed a smart contract to verify blockchain transactions using Merkle proofs for real-time validation and ensuring efficient gas usage and secure access control.
- Utilized Solidity, Ethereum, MetaMask, and web3.js for seamless integration and efficient gas optimization.

AI Chatbot

- Developed an AI chatbot utilizing OpenAI API keys for advanced NLP capabilities and 90% accuracy with a local option using LLaMA2 for enhanced privacy and control.
- Implemented automatic visualization features using LIDA to display data insights and various graphs.
- Utilized Langchain for efficient natural language processing workflows and FastAPI for building a high-performance backend.

PROFESSIONAL EXPERIENCE

AI Engineer Intern - Large Language Models

Smartavya Analytica Private Limited

2024/06 – 2024/07
Pune, India

- Developed a locally deployed, open-source AI solution for the **National Stock Exchange(NSE)** to ensure data privacy while enabling users to query databases.
- The system generates a SQL query, accompanied by a detailed table and a visual graph, providing comprehensive insights that enhance data analysis and support informed decision-making.

Data Analyst Intern

Ellicium Solutions

2023/09 – 2023/11
Pune, India

- Developed an AI chatbot for **KBR Australia**, designed to read PDF files and efficiently answer questions by analyzing and extracting relevant information from the document.
- Trained in Python and SQL, with hands-on experience in developing and optimizing data-driven applications.

SKILLS

Blockchain Technology

Ganache, Solidity, Smart Contracts, Cryptography

Data Structures and Algorithms

C++, C

AI/ML

LLMs, API Integration, Python, MySQL

Full-Stack Development

MongoDB, FastAPI, React, Node.js

CERTIFICATES

- Google AI Essentials 

HOBBIES

School Football Team Captain

Led team to 3rd position in state tournament demonstrating teamwork skills in high-pressure competitive environments.

Marathon

Secured a top 5 finish among over 1000 participants in the Powai Run Marathon
