TECHNICAL SKILLS

Language -Java, Python

UI Automation - Selenium, Extent Reports,
Cucumber, Selenide, Appium.

API Automation - Rest Assured, .Postman,
GraphQL.

Test Frameworks: TestNG, JUnit, PyTest, Robot
Framework, Allure Test Framework, Log4j or
SLF4J.

Databases: SQL, MongoDB

Build tool - Gradle and Maven

CICD Tools: Jenkins

Version Control System: Git

Testing Methodologies: Agile, Scrum, BDD,
Continuous Testing.

SDLC: Waterfall, Agile

IDE: IntelliJ IDEA and Eclipse

Project Management Tool: Jira

Other Skills:

- Test Automation Framework Design
- Test Script Development
- API Testing
- Web Services Testing
- Mobile Testing
- Cross-Browser Testing
- Performance Testing
- Security Testing
- Test Planning and Strategy

CERTIFICATIONS

Udemy- REST API Testing.

Udemy- Selenium Webdriver.

Udemy- Framework design (TestNG,
ANT, Pageobject, Maven, Jenkins, Excel
Datadriven, Cucumber, log4j)

ACADEMIC QUALIFICATION

Master In Computer Application, RGPV

University of Madhya Pradesh

2020 | First Class

Bachelor of Commerce, BU University of

Madhya Pradesh

2015 | First Class

Highly skilled QA Engineer with 3 years of experience in developing and implementing test automation strategies, resulting in a 50% reduction in manual testing time and a 30% increase in test coverage. Proven track record in collaborating with development teams to identify and resolve critical bugs, resulting in a 25% reduction in customer-reported issues and a 15% improvement in customer satisfaction scores. Exceptional skills in analyzing and reporting on test results, providing valuable insights to the product team and contributing to a 20% increase in product quality.

WORK EXPERIENCE

QA automation engineers

Rebid.co

2021--Present

- Dedicated and results-driven Quality Assurance Engineer with 3 years of hands-on experience in both automation and manual testing.
- Developed and maintained automated test scripts using Selenium WebDriver and Java, resulting in a 50% reduction in manual testing efforts
- Implemented TestNG test suites and integrated with Jenkins for continuous integration, improving testing efficiency and reliability.
- Conducted API testing using Postman and REST Assured to validate backend functionality and integration points.
- Collaborated with cross-functional teams to identify test scenarios, create test plans, and prioritize testing activities.
- Participated in Agile ceremonies such as sprint planning, daily stand-ups, and retrospective meetings to ensure alignment with project goals.
- Executed performance testing using JMeter to analyze system behavior under various load conditions and identify performance bottlenecks.
- Documented test cases, test scenarios, and test results for future reference and knowledge sharing within the team.

Achievement

- Automated testing of PDF-related test cases using the PDFBox library.
- Developed functionality to automatically generate Jira tickets by integrating with the Jira API.
- Implemented a pie chart based on test suite results, so that a report is automatically sent to Slack every time the suite completes.

Manual Testing:

- **Manual Testing:**
 - Performed manual testing for new features, identifying critical defects early in the development cycle.
 - Conducted thorough exploratory testing to ensure the overall quality and user experience of the applications.
- **Collaboration and Communication:**
 - Collaborated closely with developers, product owners, and business analysts to understand requirements and provide input on testability.
 - Actively participated in Agile ceremonies, contributing to sprint planning, daily stand-ups, and sprint reviews.
- **Defect Tracking and Reporting:**
 - Utilized Jira for defect tracking and project management, ensuring all identified issues were appropriately documented and communicated.
 - Generated and shared detailed test reports, highlighting test results, coverage, and potential risks.
