

Abdul Samad A

Aspiring Data scientist

📍 Bangalore | 📞 +91-7795738104 | [🌐 LinkedIn](#) | [🐙 Github](#) | ✉️ samad.ali.hulikunte@gmail.com

SKILLS

- Python, C++, SQL, llama-index, PyTorch, TensorFlow, YOLO, LLM, RAG, GANs, CNN, RNN, NLP, Deep Learning , AWS, Docker, Vectordatabase, OpenCV, keras, Image segementation , Object Detection , FastAPI, Hugging Face Transformers, Pandas , Numpy, Tableau, machine learning , MLOPs, Git/Github , CI/CD Pipelines

EXPERIENCE

Ai engineer intern

Feb 2024 - Present

omdena

- Developed AI solutions in healthcare, environment, and education, leveraging machine learning, NLP, and computer vision to tackle global challenges.
- Collaborated with a team of 50+ global AI engineers and domain experts to design customized AI models, improving health monitoring and sustainability outcomes.
- Designed and implemented AI chatbots for real-time mental health monitoring, increasing user engagement by 30% through personalized interactions.
- Applied deep learning models (RNNs, CNNs) to enhance disease detection and monitoring systems, achieving a 25% improvement in accuracy and efficiency.

AI/ML Intern

Apr 2024 - Aug 2024

USEReady

- Enhanced LLMs by fine-tuning and employing prompt engineering, improving performance by 15% across various generative tasks.
- Integrated external knowledge sources using Langraph and Retrieval-Augmented Generation (RAG) methods, successfully solving real-world engineering challenges with AI solutions.
- Deployed scalable AI and machine learning models on AWS, utilizing SageMaker, EC2, and Lambda
- Managed and queried large-scale embeddings for ML-driven engineering applications using vector databases like Pinecone and FSSAI, improving data retrieval speed.

PROJECTS

Sales support bot

🔗 <https://github.com/samadali-ai/Build-a-Retrieval-Augmented-Generation-RAG-based-LLM-assistant-using-Streamlit-and-Snowflake-Cortex->

- Built an AI-driven sales support bot leveraging Large Language Models (LLMs) for automatic call summarization from large transcripts, enhancing sales insights.
- Integrated CrewAI agents for lead scoring, data analysis, and customer interaction automation, streamlining the sales workflow.
- Utilized MongoDB to store and manage large-scale transcript data efficiently, ensuring quick retrieval for summarization tasks.
- Deployed the entire system using Docker for containerization, enabling seamless development and scaling across environments.
- Implemented FastAPI for backend services and Redis for task management and asynchronous processing, improving system performance.

Integrating Deep Learning and IoT for Rapid Diagnosis and Precision Treatment.

🔗 <https://github.com/samadali-ai/yolo-object-detection--mobile-app>

- Developed autonomous plant disease detection systems using CNNs, YOLOv8, and ResNet for accurate image classification.
- Integrated IoT devices for real-time monitoring of crop health and environmental conditions to facilitate early disease detection.
- Implemented deep learning algorithms for precision treatment in agriculture, enabling targeted interventions with automated spraying.
- Designed and developed an autonomous wheeler robot for plant disease diagnosis and treatment using object detection models.
- Leveraged Deep Learning and IoT technologies to revolutionize precision agriculture, improving crop resilience and yield.
- Contributed to data-driven decision making for farmers by analyzing large plant image datasets for improved disease detection.

ACHIEVEMENTS

- Generative adversarial networks-Coursera
- Deep learning specialization-Coursera
- AWS Cloud Technical Essentials - Coursera

EDUCATION

Scaler

2024

Specialized in Data Science & Machine Learning

Coursework: Python, Deep learning, Machine learning, MLOps, Statistics, Computer vision, NLP, mathematics for ML, SQL, Tableau

Reva University

2023

BE/B.Tech/BS in Electronic and Communication Engineering (ECE)
