- Raipur, 492001

SKILLS

- UI Web Technologies:** HTML, CSS, Bootstrap, Micro Frontends
- Programming Languages:** Javascript, Solidity, Python
- Database:** SQL, MySQL, and MongoDB
- Framework:** React.js, Node.js
- Library:** web3.js, Ether.js
- Ethereum Tools:** Truffle, Ethereum Virtual Machine, Hardhat, Metamask
- IDE:** Visual Studio Code, Remix, Sublime Text

EDUCATION

S.S.I.P.M.T, Raipur

2015-2019

Bachelor of Engineering: Computer Science Engineering

LANGUAGES

- English
- Hindi
- Bhojpuri

OTHER SKILLS

- Adaptability
- Teamwork
- Agile frameworks
- Project Management

PROFESSIONAL SUMMARY

Experienced blockchain developer proficient in Ethereum and Solidity. Skilled in designing secure decentralized applications and implementing smart contracts. Detail-oriented, collaborative, and driven to deliver innovative solutions that leverage the potential of blockchain technology.

WORK EXPERIENCE

Blockchain Developer

2023-2024

Swapped Finance

- Developed responsive and scalable user interfaces for decentralized lending and borrowing platforms, enhancing user engagement and seamless interaction with smart contracts.
- Utilized micro-frontend architecture to modularize and scale dApp features, enabling independent deployment and better maintainability across project components.

IDEACODIFY

2020-2023

- Contributed to notable projects like Swapsicle, HokkFi, Kishu INU, Saitama, Lambda Dao, Clout Finance, Gambit Finance, Mikado, and more, focusing on smart contract development and front-end integration.
- Proficient in working with oracles (Chainlink, DIA), subgraphs (TheGraph), and EVM-based ecosystems, leveraging tools like OpenZeppelin, Truffle, Hardhat, and Remix. Released new SDKs on npmjs and implemented ERC20 and ERC721 standards.
- Built and maintained strategic relationships with investors and partners, while continuously ideating innovative solutions for blockchain applications.

Freelancer

2019 - 2020

Freelancer Developer

- Developed dynamic, responsive websites and web applications using React, focusing on optimal performance and user-friendly design.
- Built and maintained backend services with Laravel and Node.js, ensuring seamless integration with front-end interfaces and third-party APIs.
- Designed and managed relational databases (MySQL) and NoSQL databases (MongoDB) to support scalable, efficient data handling for web applications.
- Created and optimized RESTful APIs for smooth data exchange between client and server, enhancing the overall application performance.

- Collaborated with clients to deliver custom-built, informative websites tailored to their needs, ensuring high-quality design and functionality.
- Applied best practices in security and scalability to ensure robust and future-proof applications.

Software Developer Trainee

2019

Jain Softwares,

- Solved multiple bugs reported by the endclients to the support portal of the company.
- Worked on Database Management in week-to week basis to improve data quality, clean database and maintain consistency.

ACCOMPLISHMENTS

- Cleared two times Security audit by world's leading Blockchain Security Company, CERTIK.
 - Part of Two times Nervos Blockchain Grant winning team.
 - Employee of the month for two months consecutive.
 - Won few Fitness Competitions.
-
