www.linkedin.com/in/vamshi-naik-banoth-b90b6720a | Warangal, Telangana -

506314, India

OBJECTIVE

Highly skilled cybersecurity and AI enthusiast with hands-on experience in network security, data encryption, and deep learning applications. Proven ability to design and implement secure, scalable solutions, including biometric KYC frameworks and cyber-physical banking systems, integrating blockchain and advanced encryption for data protection. Known for driving efficiency through innovative AI models and proactive threat detection, I am excited to bring a passion for cybersecurity and deep technical expertise to a forward-thinking MNC, contributing to cutting-edge security solutions that safeguard data integrity and foster trust in digital ecosystems.

INTERNSHIP

- Company A** July 2022 - Nov 2022
Intern Hyderabad, India
MINING PROCESS internship at AICTE Through CELONIS and Gained experience in analyzing and optimizing business processes. Developed skills in data analysis, SQL, and Python. Learnt how to extract knowledge from event logs to enhance process efficiency and compliance.
- Company B** DEC 2022 - FEB 2023
Intern Remote
During my internship, I applied PyTorch to develop deep learning models for MACHINE LEARNING. Google Cloud AI Platform streamlined training and deployment. Matplotlib/Seaborn were essential for visualizing data and results, leading to [CLIENT REQUIREMENTS]
- Company C** march 2023 - may 2023
Intern:
Palo Alto Networks Internship – Cyber security:
Gained hands-on experience in firewall management and network security.
Developed skills in configuring and managing firewall gateways, enhancing cyber security measures.
Strengthened understanding of advanced networking concepts and practices.

EDUCATION

- VBIT** June 2022 - March 2024
CYBER SECURITY Hyderabad, India
◦ GPA: 8.4
- SRRS Govt polytechnic, Sricilla** 2019-2021
DIPLOMA In Civil Sricilla, India
◦ GPA: 7.6
- SHIVANI HIGH SCHOOL** 2018
Secondary Education Warangal, India
◦ GPA: 8.7/10

PROJECTS

Project A: Cyber-Physical Customer Management for AI Internet of Things-Enabled Banking Feb 2024 - may 2024

- Developed a deep learning-based framework to enhance inter bank KYC processes within AI-driven cyber-physical banking systems.
- Designed and implemented a **deep biometric architecture** for KYC modeling, enabling secure collection and anonymization of customer biometric data.
- Integrated a **symmetric-asymmetric encryption-decryption module** with a block chain network for decentralized, secure validation and transmission of biometric information.
- Proposed and deployed a **high-capacity fragile watermarking algorithm** based on integer-to-integer LSB for secure storage and transmission of banking documents.
- Engineered a secure web application for biometric data collection, embedding customer information as a watermark in bank documents to enhance data security and traceability.
- Achieved superior performance in embedding and securing biometric data compared to existing algorithms, validating the framework's efficiency and scalability.
- This project showcases expertise in biometric security, encryption, blockchain, and document protection algorithms tailored for high-security banking systems.

Project B: cyber bullying detection using machine learning (NLP)

1.Cyberbullying Detection System Using Machine Learning and NLP

Developed a robust cyber bullying detection system leveraging machine learning and natural language processing (NLP) to identify and mitigate online harassment and abuse. The project involved collecting and preprocessing large datasets of social media text, implementing advanced NLP techniques for feature extraction, and building classification models using algorithms such as logistic regression, SVM, and neural networks. Emphasized model evaluation through metrics like precision, recall, and F1-score to ensure accuracy and reliability. Successfully deployed the solution, integrating ethical considerations to safeguard user privacy and maintain platform integrity, demonstrating technical expertise in building AI-driven safety mechanisms.

Project C: Packet Tracking,Network monitoring by wire shark

Proficient in using Wireshark for real-time network traffic analysis, packet tracking, and troubleshooting. Skilled in identifying security vulnerabilities, diagnosing network issues, and optimizing performance by analyzing various network protocols and data flow, ensuring secure and efficient network operations.

SKILLS

- Cyber Security Technologies:**Network Security(Cisco ASA,Palo Alto),VPN and Proxy Configuration(IPsec,SSL/TLS)
End point Security system(Antivirus and EDR Solutions),IAM(Azure AD,Ping Identity)
SIEM,Penetration testing and Vulnerability Assessment,SOC
 - Programming Languages:**Python,C
 - Web Technologies:**JavaScript,HTML (HyperText Markup Language),Web Hosting and Deployment,Dev Tools
 - Database Systems:** SQL Databases: MySQL, PostgreSQL,NoSQL Databases: MongoDB, Firebase.
 - Data Science & Machine Learning:** Data Visualization (Tableu/PowerBI),Deep learning(PyTouch,CNNs)Big Data
 - Cloud Technologies:** Cloud Platform 1, Cloud Security,AWS,Azure,Aqua Security
 - DevOps & Version Control:** Power Shell, GitlabCI/CD ,QA, Security scans in CI/CD
 - Specialized Area:** FireWall management, Data Analysis, Python,Google cloud AI Platform
 - Mathematical & Statistical Tools:** Excel,Testing,
 - Other Tools & Technologies:**GCP,ETL processes,Apache Hadoop,Azure VMs
- Research Skills:** Vulnerability Analysis(NIST),Communication protocols,EDA,Algorith Research,Traffic Monitoring and Anomaly Detection: (NetFlow,wireshark)

HONORS AND AWARDS

- Certificate of Excellence – Cybersecurity Hackathon** **2023 ,Sep**
Vignana Bharathi Institute Of Technology
 - Honored for developing for a threat-detection system during College-level hackathon
- Completion Certificate – Palo Alto Firewall Training** **2022 Oct**
 - Successfully completed a training session on firewall management and security policies, gaining practical experience in network defense.

CERTIFICATIONS EXPERIENCE

Fundamentals of Cyber Security	(Cisco -2022)
AWS (Amazon Web Services)	(Amazon -2022)
Palo Alto (Cyber Security ,Networking)	(Palo Alto -2022)
IAM	(TCS-2024)
Data Analytics and Visualization	(accenture- 2024)
Security Operation Fundamentals	(cyber-2023)
TensorFlow Developer Certificate,	(TensorFlow – April 2024)
Infosys Spring Bord(OS,Networking,Big Data Analytics,Network Security Essentials)	(Infosys -2023-2022)

VOLUNTEER EXPERIENCE

- ABHEDYA VBIT** **2023 - 2024**
 - Documentation lead of Cyber Security Club
 - Skills developed Team Collaboration,Technical skills,Innovative,Entrepreneurial
- ECO-CLUB VBIT** **2022 -2024**
 - Hospitality Lead,Core Member
 - Skills developed Communication,Team-Oriented,Ethical,Customer Service

ADDITIONAL INFORMATION

Languages: English (Proficient), Hindi (Intermediate),Telugu(Advanced)
Interests: Spanish, French
