EXPERIENCE

Amplifi Capital (Gojoko Tech)

Junior Software Engineer (Data)

Noida, India

Apr 2024 – Present

- **Responsible for the Company House Project:** Designed an algorithm to convert encoded data into a readable format, handling datasets with 50+ million records using Python. Designed complex SQL queries to efficiently process large-scale data while maintaining high performance.
- **Databricks and SparkSQL:** Developed scalable Databricks notebooks, optimizing data transformations and integrating complex analytical queries for financial data processing. Leveraged SparkSQL for distributed data query execution, ensuring high-performance results.
- **Data Migration and Integration:** Used SQL, Informatica IICS and Databricks SQL for seamless data migration between Databricks and RDBMS (OracleDB, MSSQL)
- **Big Data Technologies:** Utilized Apache Spark, Hadoop and Delta Lake for efficient big data processing.
- Integrated Kafka, Spark, and AWS EMR with Databricks for real-time streaming, optimizing ETL pipelines with Hive and SparkSQL.
- Actively participated in code reviews, providing constructive feedback to ensure high-quality, maintainable code while promoting adherence to best practices throughout the development process.

Amplifi Capital (Gojoko Tech)

Graduate Software Engineer (Data)

Noida, India

Jul 2023 – Apr 2024

- **ETL Pipeline Development:** Developed scalable ETL pipelines using Airflow, Python, and AWS Glue. Optimized data transformations and queries for financial data, handling millions of records using SQL and SparkSQL.
- **Cloud Solutions (AWS):** Implemented AWS solutions (EC2, S3, RDS, AWS Glue) for cost-effective data storage and processing, enhancing overall pipeline performance.
- **SQL Performance Optimization:** Optimized SQL performance for analytical queries across large datasets, ensuring fast and reliable data retrieval.

VEDA TRIP,

Advanced Development Intern

Noida, India

Jun 2022 – Jan 2023

- Migrated CRM features to AWS, improving performance and scalability by leveraging cloud-native architectures. Managed data pipelines and ensured smooth integration across services.

SAFARI TECH,

Software Engineering Intern

Italy

Jan 2023 – May 2023

- Developed AngularJS applications and integrated CI/CD pipelines with Docker and Kubernetes for seamless deployment automation.

PROJECTS

PayStream: Real-Time Payment System

Oct 2023 – Dec 2023

- Built a real-time payment transaction processing and reporting system using Databricks.
- Streamlined ETL processes with DBT and SQL, Integrated multiple payment methods (credit/debit cards, mobile wallets) ensuring efficient data handling and accurate transaction tracking.

Feedy App: Real-Time Food Donation

Mar 2022 – Oct 2022

- Developed a real-time food donation platform using Firebase and AWS, supporting 1,000+ users.
- Integrated Databricks and Kafka for real-time data processing and analytics.

Stock Market Predictor

Jan 2023 – May 2023

- Created a Python LSTM model for stock market prediction, deployed on AWS with Databricks integration.
- Automated data pipelines to enhance forecasting accuracy and scalability.

EDUCATION

VIT CHENNAI

B.TECH. IN COMPUTER SCIENCE

Jul 2019 – Jun 2023 | Chennai, India

SKILLS

- **Languages:** Python, SQL, PySpark, Shell Scripting, Java, Scala
- **Data Engineering:** Databricks, Delta Lake, Kafka, Airflow, Apache Flink, AWS Glue, Hadoop, Portainer
- **ETL Transformation:** Talend, DBT, Informatica, SSIS, Apache Spark, Datastage
- **Data Warehousing:** Snowflake, Redshift, BigQuery, Hive, Teradata
- **Cloud:** Azure, AWS, GCP (BigQuery, Dataflow)
- **DevOps:** Docker, Kubernetes, Jenkins, Git, Terraform, Ansible
- **Machine Learning:** TensorFlow, PyTorch, Scikit-learn
- **Data Visualization:** Tableau, PowerBI
- **Databases:** MySQL, PostgreSQL, MongoDB, Cassandra, Elasticsearch
- **Streaming Batch Processing:** Kafka, Flink, AWS Kinesis, Apache Beam
- **Job Orchestration:** Airflow, Azure Data Factory, Apache NiFi
- **Version Control:** Git, GitHub
- **OS:** Linux, Windows

CERTIFICATIONS

- **Airflow Fundamentals** - Astronomer
- **AWS Cloud Technical Essentials** - Coursera
- **ETL and Data Pipelines with Shell, Airflow, and Kafka** - Coursera
- **Python for Data Science, AI and Development** - Coursera
- **Relational Databases (RDBMS)** - IBM
