EDUCATION

- **Karunya Institute of Technology and Sciences** Coimbatore, India
Bachelor of Technology - CSE; *July 2020 - June 2024*
Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Networking, Databases

SKILLS SUMMARY

- **Languages:** GoLang, Python, JavaScript, SQL, Bash, JAVA
- **Frameworks:** Flask, NodeJS, React
- **Tools:** Kubernetes, Docker, GIT, PostgreSQL, MySQL
- **Platforms:** Linux, Web, AWS,
- **Soft Skills:** Leadership, Event Management, Writing, Public Speaking, Time Management

EXPERIENCE

- **ZOHO-EndPoint Central** on-site
Member of Technical Staff (Full-time) *May 2024 - Dec 2024*
 - **Ticket Resolution:** Addressed and resolved user issues.
 - **POC for Staging:** Developed a proof of concept for downloading, storing patches, and installing them on a scheduled basis for Window on linux.
 - **POC for Triggering Collection:** Created a proof of concept to trigger collection on time, regardless of the refresh cycle.
- **ZOHO-EndPoint Central.** on-site
Technical trainee *Dec 2023 - May 2024*
 - **Automation:** Developed a systemd script to efficiently log user login data, demonstrating strong skills in Linux system administration.
 - **Automation:** Created a versatile service management script capable of opening, disabling, reading, and deleting service-related files, as well as removing entries from cron tasks.
 - **Automation:** Implemented a user-friendly script for password resets that securely stores passwords locally and detects manual changes.
 - **GoLand:** Gained in-depth knowledge of Linux and the Go programming language, applying this expertise to enhance system scripts and automate tasks effectively.
- **SkillVertex.** Remote
Trainee *July 2023-Sep2023*
 - **AI Course Completion:** Completed a comprehensive AI course covering machine learning, natural language processing, computer vision, and robotics, demonstrating strong understanding and application of these concepts through active participation in lectures, discussions, assignments, and projects.
 - **Successfully developed two projects:** 0-1 Object Detection: Created a model for accurate binary classification of object presence in images. Multiclass Classification: Developed a model for categorizing data into multiple classes
- **Cisco AICTE Virtual Internship program.** Remote
Trainee
 - **Networking:** Successfully completed the Cisco Off-Campus Certification as part of the AICTE Virtual Internship Program, showcasing proficiency in Cisco technologies and a commitment to continuous learning.

PROJECTS

- **AnimeList [Link]:**
Developed an anime list web application with advanced search functionality and detailed anime information, utilizing Express, Node.js, EJS, HTML, CSS, and Bootstrap for responsive design and dynamic content rendering.
- **Project Management App [Link]:**
Technologies: Tailwind CSS, React, Node.js, HTML, CSS
Developed a dynamic project management app allowing users to add tasks with title, description, and due date. Utilized React state and refs for dynamic task addition and UI updates. Styled the interface using Tailwind CSS for a modern, responsive design.
- **Train Reservation System [Link]:** Designed and implemented a robust Train Reservation System for individual and group seat reservations, integrating multiple train routes and compartments for enhanced flexibility, and incorporating efficient search and deletion features using PNR numbers, demonstrating proficiency in system design, database management, and user interface development.

CERTIFICATES

- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy
- Complete DSA with Python – Udemy
- Complete DSA with JAVA –Udemy

VOLUNTEER EXPERIENCE

- **NSS Technical Staff**
 - *Conducted technical workshops for students via the National Service Scheme (NSS) to enhance their technology skills.*
