Work Experience

Quality Assurance Engineer

Dream Trawell Destination DMC

Mumbai

Dec, 2023 – Current

- Develop and execute test cases manually and with automation.
- Maintain automated regression test suites using Selenium WebDriver.
- Use JIRA for defect logging and tracking to ensure timely bug resolution.
- Conduct Unit Testing, System Integration Testing (SIT), and User Acceptance Testing (UAT) for multiple projects.

Quality Assurance Engineer

Indica Industries

Noida

May, 2019 – July, 2022

- Developed detailed test plans, test cases, and test scripts based on functional and technical specifications.
- Designed and implemented test strategies for database systems, ensuring thorough coverage of all scenarios.
- Created and executed complex SQL queries to validate data transactions.

Quality Executive

GT Cargo India

Greater Noida

May, 2017 – Feb, 2019

- Implemented quality control processes for ship cargo handling components.
- Conducted inspections and audits, including steel grade testing and furnace checks.
- Collaborated with production teams to enforce quality assurance procedures.
- Managed documentation of standards, findings, and corrective actions.

Cost Analyst

LeasePlan India

Gurgaon

Dec,2014 – Apr-2017

- Analyzed accessory pricing structures.
- Conducted market research on trends and competitor pricing.
- Collaborated with procurement and finance for cost accuracy.
- Developed pricing adjustment recommendations based on analysis.

EDUCATION

- DAC (Development in Advance Computing)
CDAC (New Delhi)
- Bachelor of technology
Hindustan College of Science and Technology (Mathura)

CERTIFICATES

- **MySQL**
Professional Working Proficiency
- **Selenium with Java**
Professional Working Proficiency
- **Cucumber BDD Framework**
Professional Working Proficiency

PROJECTS

1. Project Name: Client Management System

- Client: Dream Trawell Destination DMC
- Technology & Tool: Selenium with java, Manual Testing & MySQL.

Description:

The Dream Travel Destination DMC Booking System is dedicated to transforming your travel experience. By streamlining data processing through a secure online platform, we create personalized itineraries that reflect your unique preferences. With a focus on security and efficiency, we ensure that every journey is tailored to you, allowing you to create unforgettable memories and connect with the world in a meaningful way.

Roles and Responsibilities:

- Conducted a comprehensive review of business requirements, functional specifications, and design documents to ensure alignment with project goals and technical feasibility.
- Developed and updated test plans, creating detailed test cases and scenarios for functional modules. Utilized SQL for data validation, ensuring data integrity and consistency.
- Analyzed requirement documents to derive relevant test cases and verify data mapping between source and target systems.
- Ensured data integrity by checking that tables and fields were accurately copied and that auto-generated keys were correctly created.
- Verified the precision and accuracy of numeric fields to maintain expected

format and scale.

- Executed Smoke, Functional, Compatibility, and User Interface Testing to validate system functionality and user experience.

2. Project Name: Distributor Management System

- Client: Indica (Inhouse) and MSIL
- Technology & Tool: Selenium with java, Manual Testing & MySQL.

Description:

A Distribution Management System (DMS) is an advanced platform that optimizes supply chain operations between manufacturers and distributors. It integrates and automates retail activities, inventory management, invoicing, G8D processing, and competitive intelligence, ensuring seamless coordination and data-driven decision-making throughout the supply chain.

Roles and Responsibilities:

- Conducted a comprehensive review and analysis of Business Requirements, Functional Specifications, and Detailed Design documents, to ensure alignment with project objectives and assess technical feasibility.
- Developed and maintained test plans; authored detailed test cases and scenarios for assigned functional modules, leveraging SQL for robust data validation and ensuring data integrity and consistency.
- Analyzed requirement documents to derive relevant test cases, validating accurate data mapping from the source system to the target system to ensure effective data transformation and integration.
- Ensured data integrity by verifying the accuracy of all tables and corresponding fields copied from the source to the target system. Confirmed proper creation of auto-generated keys and appropriate handling of null fields.
- Conducted precision and accuracy checks on numeric fields to validate data values against expected formats and scales.
- Executed comprehensive testing methodologies, including Smoke Testing, Functional Testing, Compatibility Testing, and User Interface Testing, to validate system functionality, performance, and overall user experience.

3. Project Name: Indica-Bombardier Services

- Client: Indica (Inhouse) and Bombardier (Canada)
- Technology & Tool: Selenium with java, Manual Testing & MySQL.

Description:

Indica-Bombardier Services is an in-house product developed by Indica Industries, designed for use by Bombardier and its direct subsidiaries. It facilitates New Product Development (NPD), enhances logistical awareness, manages inventory control, and addresses product-related issues. The platform enables real-time communication and data sharing, ensuring streamlined operations and improved decision-making.

Roles and Responsibilities:

- Conducted thorough reviews and analyses of Business Requirements, Functional Specifications, and Detailed Design Documents to ensure comprehensive test coverage and alignment with project objectives.
- Developed and maintained detailed test scenarios for assigned functional areas, utilizing MySQL queries for accurate data validation and integrity checks.
- Executed and validated test cases across multiple environments, ensuring thorough testing and verification of software functionality.
- Performed end-to-end testing, encompassing Unit Testing, System Integration Testing (SIT), and regression testing to ensure seamless interaction between components and overall system reliability.
- Conducted extensive UI testing, functional testing, and database verification to assess system stability, user experience, and adherence to performance benchmarks.
