

RISHABH NEGI

NSIT, Delhi | Master of Technology, Computer Science & Information Technology

rishabh.negi16feb@gmail.com | 9958878266 | [linkedin.com/in/rishabh-negi-58727a54](https://www.linkedin.com/in/rishabh-negi-58727a54) | github.com/rish1602

EDUCATION

Netaji Subhash Institute of Technology, Delhi

[Aug 2022 - June 2024]

- Master's degree, Computer Science & Information Technology
- Minor: Mobile Communication & Network Technology
- CGPA: 7.51/10.0

Universal Public School, Delhi

[April 2009 - April 2011]

- 10th (secondary)- 88.67 %
- 12th (senior secondary)- 77.67 %

EXPERIENCE

Amazon, Hyderabad | Analyst

[July 2016 - July 2019]

- **Objective-** Conducted **risk assessments** and **fraud detection** analysis on **Amazon** buyer accounts.
- **Approach-** Evaluated multiple parameters, including **IPV4** addresses, to identify and mitigate potential **threats**.
- **Impact-** Collaborated with software engineer to **automate fraud detection**, resulting in a **6.08 %** reduction in fraudulent activities and saving the company approximately **\$500,000** annually.

NSIT, Delhi | Postgraduate student & teaching assistant

[Aug 2022 - June 2024]

- **Objective-** Familiarize and be accessible to graduate students, with concepts of **computer science**.
- **Approach-** Facilitated targeted learning, focusing on **algorithms** and **OS** concepts for a batch of **50** graduate students.
- **Impact-** Increased student assignment completion rates by **20%** and improved overall class performance by **15%** through **continuous improvement & team efforts**.

PROJECTS

Finding DDOS attacking node in CLOUD and FOG network using chi-square test.

[Oct 2022 - Oct 2023]

link to project- github.com/rish1602?tab=repositories

- Project revolves around creating mathematical technical model to detect **DDOS** attacking node in the **centralized network**.
- Programing language used **OMNET++** & **C++** that resulted in a true positive of **99 % accuracy** in detecting attacking node.

Monte Carlo Simulation for generating uniform random numbers.

[July 2024 - Aug 2024]

link to project- github.com/rish1602/MonteCarloSimulation

- Aim of project is to use pseudo-random numbers that "emulate" random numbers to improve convergence rates of **Monte Carlo simulations**.
- Created mathematical technical project using **PARK MILLER** algorithm & **SCHRAGE** algorithm.

Algorithmic Trading Orderbook- for Market and Limit orders.

[Aug 2024 - Aug 2024]

link to project- github.com/rish1602/OrderBook

- Designed trading orderbook, a key component in trading systems, with programming in **C++ 17**.
- Included functionality to add, remove, store, maintain and display orders with visualization.

Development of toy 32-bit Operating System.

[Aug 2024 - Oct 2024]

link to project- github.com/rish1602/operating-system

- Programmed customizable **kernel**, **loader** and **linker**.
- OS displays basic texts in colors, when booted in system.
- Programmed in **X86 assembly**, **linker command language**, **C++**.

HONORS AND AWARDS

- Secured **ALL INDIA RANK-698**, (common list), among 1,13000 candidates in **GATE 2022**.
- **National Scholarship 2022-24**, awarded by **Government of India**.
- Reached **Specialist** on **Codeforces** (Handle- ric_hagsfd).
- Solved more than **200+** problems on **Leetcode** (Handle- rish_1602).

SKILLS AND EXPERTISE

- **Skills-** Data Structures, algorithms, Programing, Software development, Object oriented program
- **Programing Languages-** C, C++ 17, STL, HTML, CSS, Latex.
- **Platform/Tools-** Git, Linux, VS Code, Jupyter.
- **Familiarity with-** Postgres SQL, X86 assembly, CURL, Json, OMNET++, Javascript.

RELEVANT COURSEWORK

Operating system | Computer networks | Computer organization and architecture | System programming | Data structures and algorithms | Probability and statistics | Advanced calculus | Theory of computation | Fuzzy logic | Compilers | Artificial intelligence and data science | Advanced distributed systems | Cryptography | Software engineering | Cloud and fog computing | Cyber security.
