

Gowtham Aragonda

Data Engineer

Professional Summary

- Having 3.5 years of professional experience in IT industry in which 3.4 years involved in Azure with extensive usage of ETL tools like Azure Data Factory, Azure Data Lake Storage, Azure Synapse Analytics, Azure data bricks, Snowflake etc...
- Hands on Experience in Azure ADF data migration projects from On-Premises to Cloud.
- Designing dynamic Datasets, Pipelines as reusable Components to make Efficient
- Hand on experience on creating Data Frames for reading data from ADLS Gen2 applying business needed data operations writing data into ADLS Gen2 by using Azure DB with Pyspark, Spark Sql
- Building an Azure Data Factory and Azure DataBricks workflow for extracting, transforming and loading into desired destination (ADLS Gen2)
- Implemented Control flow activities: Copy activity, Pipeline, Get Metadata, If Condition, Lookup, Set Variable, Filter, For Each pipeline Activities for On-cloud ETL processing.
- Created Linked services, Datasets and pipelines to fetch the SAP data loaded into Snowflake Landing
- Developed a Mapping data flow used require transformations and populated into Curated layer.
- Experienced in relational database design, SQL queries, stored procedures, indexes, views, joins.
- Developed Azure Data Factory Objects - ADF pipeline, configuration, parameters, variables, Integration services runtime.
- Have knowledge and worked on RDBMS, DATA WAREHOUSE concepts, Star, snowflake schema, OLTP and OLAP concepts.

Work Experience

Altimetrik Pvt Ltd – Data Engineer (June 2021 to till date)

Projects Description:

1. Project Title : FUSION

Role : Data Engineer

Duration : March 2023 to Till Date

Description:

Arnott's is Australia's leading largest producer of biscuits and the second-largest supplier of snack food. Founded in 1865, it is a subsidiary of KKR that serves its customers in global and local markets. Arnott's are well known in Australia and internationally for producing several quintessentially Australian biscuits of their products and they manufacture and produce different varieties of the biscuits.

Roles and Responsibilities:

- Experience with developing complex data pipelines from scratch using Azure Data Factory and Snowflake.
- Involved in data modelling using Snowflake to build a platform for data migration for one of the top retail clients across Australia and New Zealand.
- Implemented Copy activity, Pipeline, Get Meta data, If Condition, Lookup, Set Variable pipeline Activities.
- Worked on enhancements and monitoring data pipelines to support production readiness with experience of integration such as mail triggers and logging functions.
- Monitoring the data pipelines in the various environments and prepared the recon reports for the data count.
- Able to prepare technical specification, ETL mapping and unit testing documents for developed pipelines.
- Involved with development of SCD implementation and deferred logic for dimension and fact load across different data layers such as Landing, Curated and Final.
- Experience with Azure services such as Azure Data Factory, Azure Storage Services, Azure Devops, Azure Functions, Key Vault, Azure Repos and Logic Apps.
- Configured and implemented ADF Triggers and Schedule the pipelines and configured the alerts to get notification of success and failure pipelines.

2. Project Title : Magnetic Marelli

Role : Data Engineer

Duration : May 2022 to March 2023

Description:

Marelli Europe S.p.A. (formerly Magneti Marelli S.p.A.) is a European subsidiary of Marelli Holdings which develop and manufactures the components for the automotive industry. The firm is headquartered in Corbetta, Italy, and includes 86 manufacturing plants, 12 R&D centresities.

Roles and Responsibilities:

- Create Data Engineering pipelines in Synapse and place the data in ADLS.
- Configured the logic apps to handle email notification to the end users and key shareholders with the help of web services activity.
- Implemented ETL activities using ADF pipelines to load data from on premise data store to ADLS Gen 2 and Azure synapse analytics.

- Create dynamic pipeline to handle multiple sources extracting to multiple targets
- Extensively used azure key vaults to configure the connections in linked services.
- Create Synapse Analytics/Create Dedicated SQL Pools and copy the data from On-premise to SQL Pools.
- Each application goes through the analysis, design, development, and testing phases. Later the code is migrated to QA environment and then to Production.
- Efforts are made to build the most efficient, optimized, and equivalent code.
- Created services and datasets for multiple source systems (Azure SQL, Blob, ADLS Gen 2).

3. Project Title : AAA F1 GENEVA 2(Novartis)

Role : Data Engineer

Duration : July 2021 to May 2022

Description :

Novartis AG is a Swiss multinational pharmaceutical corporation based in Basel, Switzerland. Consistently ranked in the global top five, Novartis is one of the largest pharmaceutical companies in the world.

Roles and Responsibilities:

- Implemented Copy activity, Pipeline, Get Meta data, If Condition, Lookup, Set Variable, Filter, For Each pipeline Activities to convert data into parquet format.
- Experience in creating copy data activities using Azure Data Factory.
- Configured and implemented ADF Triggers and Schedule the pipelines and configured the alerts to get notification of success and failure pipelines.
- Prepared the external tables, Dimensions and Fact tables in Azure synapse.
- Created the dynamic pipelines to copy multiple tables using parameters.
- Implemented ETL activities using ADF pipelines to load data from on premise data store to ADLS Gen 2 and Azure synapse analytics.
- Created services and datasets for multiple source systems (Azure SQL, Blob, ADLS Gen 2).
- Created ADF pipelines to migrate Blob data to Azure SQL. Created Linked Services, data sets.
- Performing monthly Data loads
- Debugging data pipelines, investigating issues, fixing failures etc.

Skills

- Azure data factory
- Azure databricks
- Azure Blob storage
- Azure Data Lake Gen2
- Azure SQL Database
- Azure Synapse Analytics
- SQL
- Pyspark
- Snow flake

Education

2017 – 2021 | Bachelor of Technology | Saveetha University.
