AREAS OF EXPOSURE

- Software Development
- Programming Fundamentals
- Database Management
- Web Development
- Software Testing & Debugging
- Version Control
- Technical Support & Troubleshooting
- Cross-Functional Coordination
- Documentation & Reporting

TECHNICAL SKILLS

- .Net Framework, C#, ASP.Net MVC
- SQL , .Net Core
- jQuery, JavaScript
- Knockout.js
- Ajax, Unit Testing
- GitHub

PERSONAL DETAILS

Date of Birth: 4th October 1999
Languages Known: English, Kannada
Address: Bengaluru

PROFILE SUMMARY

- **Recent MCA graduate** with a solid understanding of **software development concepts** and **methodologies**, acquired through coursework and hands-on projects.
- Experience in designing and implementing **software solutions**, demonstrating the ability to write clean, efficient code and perform debugging tasks effectively.
- Familiarity with **database management** and **data structures**, enabling efficient **data handling** and **storage solutions** in projects.
- Knowledgeable in **web development fundamentals**, including **front-end and back-end integration**, contributing to creation of responsive & user-friendly applications.
- Exposure to **software testing practices**, including **unit testing** and **debugging**, ensuring the delivery of **high-quality software products**.
- Understanding of **agile methodologies** and **project management processes**, facilitating participation in **iterative development cycles** and **team collaboration**.
- Practical experience in developing and maintaining documentation for **software specifications** and **user guides** to support project **transparency and usability**.
- **Eager to apply technical skills in various roles**, including software development, system analysis, and quality assurance, to support organizational goals.
- Effective communicator with excellent interpersonal skills; strong analytical, problem-solving, and organizational capabilities with a detail-oriented attitude.

WORK EXPERIENCE

Vegam Solutions, Bengaluru

September 2022 Onwards as **Software Engineer – Development**

Key Result Areas:

- Developing and maintaining backend systems using .NET Framework and C# to ensure seamless integration with frontend components and optimal performance.
- Utilizing jQuery and Knockout.js to enhance user interface interactions, delivering a responsive and dynamic user experience while optimizing system performance.
- Collaborating with frontend developers and other teams to integrate backend services with user-facing applications, ensuring data flow and system functionality.
- Developing unit tests to ensure the reliability and functionality of backend systems.
- Optimizing database queries to improve application performance & reduce latency.
- Assisting in the design and architecture of scalable backend systems, contributing to system improvements and enhancements.
- Creating and maintaining comprehensive documentation for backend systems, APIs, and integrations to facilitate knowledge sharing among team members.
- Identifying and resolving issues in the software development lifecycle, providing effective solutions to enhance system performance.
- Implementing performance monitoring tools and practices to track system performance metrics and identify areas for improvement.
- Working with cross-functional teams, including QA, product management, and UX/UI designers, to align development efforts with business objectives.
- Researching and evaluating new technologies and industry trends to recommend improvements and innovative solutions.
- Overseeing the deployment process of applications and updates, ensuring minimal disruption to existing services.
- Collaborating with stakeholders to conduct user acceptance testing (UAT) and gather feedback for continuous improvement.

EDUCATION

Master of Computer Applications | Mount Carmel College | **2020 – 2022**

Bachelor of Computer Applications | PES Institute of Technology | **2017 – 2020**
