EDUCATION

2014

B.E. (I.T.)

Vidyalankar Institute of Technology, Mumbai
University | 72%

CORE COMPETENCIES

React Native Library Development

Native iOS Application Development

User Experience Design

Agile Methodologies

Quality Assurance

Technical Project Management

Technical Product Development

Client Relationship Management

TECHNICAL SKILLS

Swift, Objective C, iOS SDK, UIKit, SwiftUI

Firebase, Push Notifications (APNS)

RESTful APIs, URLSession, Alamofire, WebSockets

XCTest, Unit Testing

App Store Connect, TestFlight, Code Signing,

Provisioning Profiles

Git, GitHub, GitLab

SQLite, Realm

MVC, MVVM, VIPER

JavaScript, TypeScript, React Native

React Navigation, Redux, Native Modules

SOFT SKILLS

Communication

Teamwork and Collaboration

Problem-Solving

Time Management

Leadership

Creativity

Critical Thinking

PERSONAL DETAILS

Date of Birth: 25th May 1992

Languages Known: English, Hindi & Marathi

Address: 42A/301, Kranti CHS, Kedarnath Mandir Marg,
Nehru Nagar, Kurla (E), Mumbai-400024, Maharashtra

JYOTI PATIL

OBJECTIVE

Excel in a **Senior iOS Developer or Team Lead position**, utilizing over 10 years of extensive experience in **iOS App Development** and recent exposure to **React Native Library Development**, to drive innovation and success.

PROFILE SUMMARY

- Experienced **Sr. Native iOS and React Native Developer and Team Lead** with a track record of building high-performance mobile applications.
- Skilled in **Native iOS app development**, with a strong foundation in **Objective-C, Swift, SwiftUI, and the iOS SDK**.
- Proficient in **JavaScript, TypeScript, and React Native**, with a strong focus on delivering intuitive, responsive user experiences across both iOS and Android.
- Successfully **mentored junior developers**, and fostered a collaborative culture across cross-functional teams, including designers, managers, and backend developers.
- Skilled in performance optimization**, utilizing advanced profiling tools and strategies to enhance app responsiveness and efficiency.
- Experienced in CI/CD** processes using tools like **Jenkins**, ensuring smooth and efficient releases, and managing **App Store submissions** with a focus on compliance and timeliness.
- Highly adaptable, communicative, and committed to delivering **high-quality user experiences** by translating complex UX designs into seamless, accessible mobile interfaces.
- Strong **problem-solving abilities** and dedication to **continuous learning**; Passionate about delivering mobile solutions that drive **user satisfaction** and align with business objectives.

CAREER TIMELINE

WORK EXPERIENCE

Manager (SDK) | Reliance Jio Pvt. Ltd., Navi Mumbai | (Jan'24- Oct'24)

Key Responsibilities:

- Created and maintained reusable and scalable React Native libraries and components, focusing on performance, modularity, and long-term maintainability. Optimized libraries for better load times and memory usage.
- Developed and optimized high-performance cross-platform applications for iOS and Android using React Native, ensuring a consistent and seamless user experience across both platforms.
- Integrated platform-specific features by bridging native code (Swift, Objective-C) with React Native, such as custom camera access and push notifications, ensuring smooth functionality across devices.
- Designed and implemented seamless API integrations, including RESTful services, to ensure secure, efficient, and reliable communication between the mobile application and backend servers.
- Collaborated with product managers, UX/UI designers, backend developers, and other stakeholders to gather requirements, plan features, and implement solutions that met business goals and user needs.
- Ensured the high quality of code by adhering to industry best practices, implementing coding standards, conducting thorough code reviews, and fostering a culture of excellence within the team.

- Wrote clear and detailed documentation for libraries, components, and APIs to facilitate ease of use for other developers, improving project scalability.
- Participated in Agile development processes, including sprint planning and daily standups, to deliver features on time and within scope.
- Monitored, identified, and addressed performance bottlenecks, improving app speed, memory usage, and responsiveness by implementing caching strategies, optimizing data processing, and reducing unnecessary re-renders.
- Managed code versions using Git, ensuring smooth collaboration within the team, resolving merge conflicts, and maintaining a clean and well-documented version history.
- Provided mentorship and technical guidance to junior developers, offering support on best practices, performance optimization, and problem-solving techniques, helping them grow professionally.

● **Manager (iOS) | Reliance Jio Pvt. Ltd., Navi Mumbai | (Jun'20- Dec'23)**

Team Lead (iOS) | Mindgate Solutions Pvt. Ltd., Mumbai | (Mar'17- Apr'20)

Key Responsibilities:

- Led and managed a team of iOS developers, providing guidance, support, and mentorship. Fostered a positive and collaborative team culture to enhance productivity and innovation.
- Administered and contributed to the development of high-quality iOS applications, ensuring strict adherence to best practices, coding standards, and design principles.
- Provided technical leadership and guidance on iOS development technologies and trends. Facilitated knowledge sharing and continuous learning within the iOS development team.
- Conducted regular code reviews to ensure code quality, performance, and security. Implemented and enforced quality assurance processes within the iOS development team.
- Planned and coordinated iOS development projects, defining timelines, milestones, and resource allocation. Collaborated with cross-functional teams including designers, product managers, and other developers to ensure seamless project execution.
- Continuously evaluated team members' performance, provided constructive feedback, and actively facilitated career development within the team.
- Interacted with clients and stakeholders to understand iOS app requirements and expectations. Communicated effectively on technical matters, providing updates, and addressing concerns.
- Participated in CI/CD processes to ensure automated and efficient software delivery; familiarized oneself with build and deployment pipelines.
- Managed and prioritized tasks within the iOS development team, aligned them with project goals. Monitored progress, identified challenges, and implemented solutions to keep projects on track.
- Implemented and adhered to Agile development methodologies, including Scrum.
- Worked on client feedback promptly and consistently implemented improvements based on client requirements.
- Monitored progress, identified challenges, and implemented effective solutions to keep iOS development projects on track.
- Ensured client satisfaction by consistently delivering iOS applications that either met or exceeded client expectations.
- Identified areas for process improvement within the iOS development workflow.

● **Associate Software Engineer (iOS) | Inscript Pvt Ltd., Mumbai | (Oct'14- Mar'17)**

Key Responsibilities:

- Contributed to the development of iOS applications, features, or components; wrote clean, efficient, and maintainable code following iOS development best practices.
- Collaborated with team members to analyze and understand iOS app requirements; clarified specifications and sought clarification when needed.
- Wrote code for iOS applications, adhering to coding standards and guidelines; performed unit testing to ensure the reliability and correctness of the code.
- Participated in code reviews to receive feedback and improve coding skills; collaborated with team members to address feedback and enhance code quality.
- Utilized version control systems (e.g., Git) for collaborative code management; understood branching and merging strategies in version control.
- Interacted with clients or product owners to gather feedback on iOS app features; incorporated client feedback into development iterations.
- Worked within an Agile development framework (e.g., Scrum) by participating in ceremonies.

ANNEXURE- PROJECTS UNDERTAKEN

- **Project Title: MyJio - HelloJio (React Native Library), (Jan'24- Oct'24)**

Organization: Reliance Jio Pvt. Ltd., Ghansoli, Navi Mumbai.

Language: React Native, TypeScript, Objective C and Swift

Key Responsibilities

- Designing and developing reusable, modular, and efficient React Native libraries that can be integrated into multiple applications.
- Ensuring the library is cross-platform (iOS and Android) with optimized performance and compatibility for both platforms.
- Creating and maintaining native modules (iOS in Swift/Objective-C) that interact with React Native via the bridge.
- Providing comprehensive documentation, including installation guides, API references, usage examples, and troubleshooting tips for developers.
- Maintaining changelogs and updating documentation with every new release or feature addition.
- Publishing and managing library packages on package managers like npm, JFrog, or private repositories for easy consumption by other teams.
- Collaborating with app development teams to integrate the library into existing or new projects, providing technical support and guidance when necessary.
- Addressing issues and feature requests raised by users of the library, continuously improving it based on feedback.
- Following industry-standard best practices for React Native development, including coding standards, security practices, and performance optimization.
- Staying up-to-date with the latest React Native features, libraries, and native development trends to incorporate improvements into the library.

- **Project Title: JioMeet (Jun'20- Dec'23)**

Organization: Reliance Jio Pvt. Ltd., Ghansoli, Navi Mumbai.

Language: Swift

Description: It can be used for 1:1 video calls and hosting meetings with up to 100 participants with enterprise-grade host controls.

Key Responsibilities

- Utilized DevOps software for comprehensive issues and ticket tracking.
- Implemented version control practices to manage the code base securely.
- Collaborated seamlessly with cross-functional teams to define, design, and deliver new features.
- Contributed to the successful integration of diverse perspectives into the development process.
- Identified and resolved application bugs proactively, ensuring a polished final release.
- Upheld stringent quality and performance standards, aligning with specified requirements.
- Displayed proficiency in integrating and working with third-party libraries and APIs.
- Ensured seamless compatibility and functionality within the application ecosystem.
- Continuously explored, evaluated, and implemented new technologies to enhance development efficiency.
- Effectively managed individual team members, fostering the growth of both junior and senior contributors.
- Encouraged a culture of professional development, maximizing the potential contributions of team members.
- Displayed proficiency in end-to-end iOS application development.
- Successfully navigated the complete development lifecycle, from conceptualization to deployment.

- **Project Title: Payment Gateway Application (UPI), (Mar'17- Apr'20)**

Organization: Mindgate Solutions Pvt. Ltd., Mumbai

Key Responsibilities

- Spearheaded a team of two iOS developers, successfully delivering UPI projects that met or exceeded client expectations.
- Conducted routine code reviews, provided mentorship to team members, and organized knowledge-sharing sessions to encourage continuous learning.
- Implemented iOS development best practices, resulting in a notable 20% enhancement in code quality and a 15% reduction in reported bugs.
- Created user interfaces for contemporary rich internet applications utilizing cutting-edge front-end technologies.
- Integrated the NPCI library into the UPI application.
- Employed JIRA software for comprehensive issue and ticket tracking, Bitbucket for version control to secure the codebase, and RESTful JSON web services for seamless communication with the server.
- Managed the application upload to the App Store and actively participated in Bug Review Meetings to analyze the nature of reported bugs.
- Analyzed user requirements to identify trends and resolve performance issues, overseeing resource planning, effort estimation, and risk management.
- Facilitated the implementation of the product with documentation and the execution of various customizations, standard processes, maintenance, and upgrades to existing products.
- Optimized the application for maximum speed and scalability.

- **Project Title: SIB Mirror+ (UPI UI SDK) (Sept'19- Apr'20)**

Organization: Mindgate Solutions Pvt. Ltd., Mumbai

Language: Objective C

Description: This application serves as a payment platform, enabling users to conduct straightforward, convenient, and rapid transactions through the Unified Payments Interface (UPI). Users have the capability to initiate direct bank payments to any UPI user using either their UPI ID or by scanning their QR code with the BHIM app. Additionally, the app facilitates the seamless request of money from a UPI ID.

- Project Title: HSBC Simply Pay (UPI Application), (Jan'19- Sept'19)**
Organization: Mindgate Solutions Pvt. Ltd., Mumbai
Language: Swift
Description: This payment application enables users to execute uncomplicated, convenient, and swift transactions utilizing the Unified Payments Interface (UPI). Users have the flexibility to initiate direct bank payments to any UPI user by utilizing their UPI ID or by scanning their QR code with the BHIM app. Additionally, the app facilitates the process of requesting money from a UPI ID.
- Project Title: Indus SDK/Yes Bank SDK (UPI UILess SDK), (Mar'18- Dec'18)**
Organization: Mindgate Solutions Pvt. Ltd., Mumbai
Language: Objective C
Description: The SDK is designed for seamless integration with the current iOS app. It functions as a UPI SDK, enabling users to effortlessly conduct swift transactions through the Unified Payments Interface (UPI). With this tool, users can initiate direct bank payments to any UPI ID and also request money from a UPI ID within the app.
- Project Title: DBS Max India (UPI Application), (Oct'17- Feb'18)**
Organization: Mindgate Solutions Pvt. Ltd., Mumbai
Language: Swift
Description: The application provides a fast and smooth process for merchant collection, minimizing the burden of merchant processing and cash and cheque handling. It facilitates cashless payments from customers, streamlining transactions. Moreover, the app efficiently manages working capital by automatically making funds available in accounts at the end of each business day.
- Project Title: DBS Max (Singapore/Hong kong), (Mar'17- Sept'17)**
Organization: Mindgate Solutions Pvt. Ltd., Mumbai
Language: Objective C
Description: The application provides swift and effortless merchant collection, minimizing the complexities of merchant processing and the costs associated with handling cash and cheques. Additionally, it facilitates the collection of cashless payments from customers.
- Project Title: CometChat App (Chat Application), (Jan'16- Mar'17)**
Organization: Inscript Pvt Ltd, Chembur, Mumbai
Language: Objective C
Description: This is a chat application designed for registered users to exchange one-on-one text and media messages, engage in group messaging, and conduct audio-video calls. It serves as a platform for users to stay connected with friends, family, and colleagues.
Key Responsibilities
 - Formulated, constructed, and enhanced both new and pre-existing mobile applications utilizing the iOS SDK.
 - Collaborated with team members to integrate server-side functionalities, addressing and resolving technical issues within existing applications.
 - Provided training in Objective-C language for iOS to team members.
 - Generated development and distribution certificates during the testing phase and application upload, employing the Ad Hoc Distribution methodology and the TestFlight app for distribution and testing.
 - Uploaded the application to the App Store and implemented updates following each sprint release.
 - Revised documentation on the official website to seamlessly integrate the SDK/Framework into the iOS app.
- Project Title: CometChat SDK (Chat UILess SDK), (Oct'14- Dec'15)**
Organization: Inscript Pvt Ltd, Chembur, Mumbai
Language: Objective C
Description: The CometChat SDK is employed to incorporate chat functionality into existing mobile apps. It seamlessly integrates features such as one-on-one text messaging, group chats, audio-video calling, and the ability to send media files.
