in Ankit Kumar

Education

Master of Computer Application

Chandigarh University, Punjab

2023-25

CGPA: 08.57

Bachelor of Computer Application

Dev Sanskriti University Haridwar, Uttarakhand

2020-23

CGPA: 08.20

Achievement or Coding Profile(Competitive Programming)

- **5 Star at CodeChef(Rating:2067)**
- **Knight at LeetCode(Rating:2023)**
- **5 Star at GeeksForGeeks(Rating:2023)**
- **Specialist at CodeForce(Rating:Max 1593)**
- Global rank 5 in Starter 156 at Codechef.
- Top 2.7 in Leetcode from Glac contestant.
- Top 0.68% on GeeksForGeeks in 27k+ contestant

Projects

Rakt Bank

[Github](#)

- Developed a Blood Donation Management System using Python, Express JS, TensorFlow, HTML/CSS/JavaScript, and MongoDB.
- Enabled users to register, manage appointments, and receive personalized health reports.
- Designed a comprehensive user profile management feature for tracking donation history and health insights.

Technology : Python, Express.js, MongoDB, TensorFlow, HTML, CSS, Javascript

Find My Metro[\[Demo\]](#)

[Github](#)

- A DMRC (Delhi Metro Rail Corporation) Route Planner utilizing Java Script and Dijkstra's algorithm for efficient route planning.
- Implemented the metro network as a graph data structure to enable quick traversal and optimized pathfinding.

Technology:- HTML, CSS, JAVASCRIPT, Data Structure and Algorithm(Dijkstra's algorithm)

Algorithm Visualizer[\[Demo\]](#)

[Github](#)

- Engineered an interactive algorithm visualization platform implementing **5+ sorting algorithms** (Bubble, Selection, Merge Sort) with dynamic array manipulation using JavaScript and HTML5.
- Architected full-stack Sudoku application featuring both solving engine and interactive gameplay utilizing backtracking algorithm, achieving 99% success rate in solving expert-level puzzles within 100ms; implemented automated puzzle generator supporting 4 difficulty levels creating 1000+ unique puzzles.

Technology:-HTML, CSS, JavaScript, Data Structure and algorithm (BackTracking and sorting algorithm)

Technical Skill

Languages: HTML+CSS, Javascript ,C,C++,PYTHON

Dev Tools: VScode, Git, Github ,Postman

Other's technology : Django ,Selenium Tool , MYSQL

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, System Design , Networking ,Statistics

Experience

Web Developer Intern

06-04-2023 TO 06-06-23

PHN TECHNOLOGY PVT. LTD , PUNE

- Developed and implemented responsive web designs using HTML5, CSS3, and JavaScript, resulting in a 40% improvement in mobile user experience across 5 client projects
- Collaborated with a team of 4 developers to optimize website performance, reducing page load time by 35% through code refactoring and image optimization techniques
