SUMMARY

AWS Cloud Engineer with a strong foundation in cloud technologies. Dedicated to optimizing software development processes through continuous integration and infrastructure automation. Equipped with hands-on experience in deploying and scaling applications on the Amazon Web Services platform.

EDUCATION

Sengunthar College of Engineering	May 2023
<i>B.E - Medical Electronics</i>	<i>Current GPA: 7.5/10.0</i>
Sri Ganga Hr Sec School (Higher Secondary Education)	April 2019
	<i>Percentage: 64%</i>
Sri Ganga Matriculation School (Secondary School Leaving Certificate)	March 2017
	<i>Percentage: 89%</i>

COURSEWORK

Courses: Linux, AWS, Devops

Certificates: Linux, AWS, Devops

SKILLS

Server Administration: Installation, Configuration, Maintenance, Security

Web servers: Nginx, Apache

Tools: Docker, Git, Github, Ansible, Jenkins, Terraform

Operating System: Linux Server (Ubuntu, CentOS)

Networking: TCP/IP, DNS, Firewall

Cloud Platform: AWS, GCP

PROJECTS

Web Application | *Hosting on AWS EC2 with Auto Scaling and Load balancing for high Availability* Dec. 2023

Description | *Deployed Web App on AWS EC2 with Auto-scaling and load balancing for High Availability*

- Provisioned EC2 instances on AWS to host the web Application.
- Configured an Auto Scaling Group (ASG) to dynamically manage EC2 instances based on traffic demand.
- Configured auto-scaling policies to dynamically adjust the number of EC2 instances based on traffic load.
- Implemented monitoring and alerting using AWS Cloudwatch to maintain optimal performance and availability.

AutoScaling group on the web application | *Auto-scaled with GCP MIGs based on traffic.* June. 2024

Description | *Implemented auto-scaling with GCP MIGs to dynamically scale instances based on traffic.*

- Designed and configured auto-scaling architecture.
- Integrated Google Cloud Load Balancer.
- Used Google Cloud Monitoring for performance tracking.
- Implemented IAM roles and firewall rules.

Technologies Used:

- Amazon web services (AWS)
- Amazon EC2
- Auto Scaling
- Elastic Load Balancing (ELB)
- Managed Instance group in GCP
- Compute Engine Instances
