

Kiran Kumar Kandula [H1B Approved]

9705257973|kiran90429@gmail.com|linkedin: <https://bit.ly/2Cs2TDZ>

CAREER OBJECTIVE

Data Scientist and Full Stack Developer with 10+ years of experience working across web, mobile and data science projects. Expert in Data Science, Machine Learning, Big Data, Computer Vision, Deep Learning, Generative AI, UI Development (Angular JS, Typescript JS and React JS), Reinforcement Learning and Quantum Machine Learning.

CORE COMPETENCIES

- Data Analysis, Feature Engineering, Big Data, Pyspark
- Python, R, Java, .Net, SQL, hive, tensorflow, keras
- Quantum Computing, Cloud Solutions, Reinforcement Learning, Generative AI (PE), Computer Vision
- Quantum Machine Learning, LLM, Langchain, Prompt Engineering, Lang Graph, Graph Neural Networks.
- Machine learning Engineering, AWS Techstack including sagemaker, Azure techstack inc AiML, GCP techstack inc vertex ai models. Docker, Kubernetes. React JS, Angular JS, TypeScript JS.
- Programming Languages: c++, rust, Julia, java, .net
- High Processing Computation: cuda tool kit, numba, cython, apache arrow, cpu acceleration libraries, gpu computation.
- Machine Learning optimization, Constraint Optimization, open vino based model optimizations.
- Machine Learning, Deep Learning
- Mathematics, Statistics and Probability

ACHIEVEMENTS AND CERTIFICATIONS

- Cleared IIT JEE.
- Applied and published multiple patents in the area of Data Sciences and Machine Learning Engineering.
- Post Graduate Program in Machine Learning and Data Science from University of Chicago(Graham School).
- Master's in software systems from Birla Institute of Technology (BITS) Specializations in Cloud computing and Machine Learning
- Certified by IBM on artificial Intelligence, deep learning and cognitive computing with Watson.
- Certified by Jigsaw on application of advance analytics models with in the big-data environment.
- Certified Machine Learning and Deep Learning Programmer with 6+ certifications in different areas.
- Certified in NLP and Computer Vision with Deep Learning from Analytics Vidya.
- Part Time Faculty, Teaches DS (Computer vision and Reinforcement Learning), Cloud AWS, Data Structures for IIM I, IIM A, IIT R and IIIT D (week-end programs).
- Published Papers in different areas in machine learning and deep learning.
- Qualified in Arena Aptech Programming Examination with Distinction.
- ISO 9001-2008 certified programmer in Image and Signal Processing.
- Certified Animator and Developed many 2d animations in flash and also build audio and video galleries in flash with action script 3.0
- Certified Android App Developer with hands-on experience on GPS tracking projects,2d graphics, SMS texting and Bluetooth (Inc Adaptors)
- Guest Lecturer for more than 50+ colleges across India.

PROFESSIONAL EXPERIENCE

MICRON Hyderabad, IN

Principal Data Scientist, Oct 2021 – present

- Quantum Machine Learning suite for variation identification in the semiconductor manufacturing process.
- Code Assistant Tool (Intelligence Tool) for building E2End Data Science Applications.
- Reinforcement learning based Engine for Tool Trouble shooting in Semiconductor Fabrication Process.
- Built advanced statistics/data-science models for identifying variability which in turn enhances the productivity or yield gain. Computer Vision Gyan based model identifying defect patterns.
- Leads a team of data scientist to help them build and design Enterprise Data Science Solutions.

GEP SOLUTIONS Hyderabad, IN

Data Scientist, Aug 2019 – Oct 2021

- Built NLP based supplier intent identifier, sentiment detector from news feed data.
- Built a text summary extractor from news feeds and duplicate news detection.
- Built promotional modelling for demand planners which is included in NEXXE (GEP product).
- Built a large-scale Demand Planning and Demand Sensing pipeline for the Sales data which runs with different time series models including hierarchical time series-based models. The pipeline also takes external parameters like traffic/weather/holidays into consideration. (Patented this idea)
- Built an optimized hierarchical time series model which runs on py spark with 2000 items in 5 min span.
- Built a spend forecasting pipeline with different time series algorithms.
- Built a Hybrid Time Series Model for Forecasting Commodities and Sales Data.

HIGH RADIUS PVT LIMITED, Hyderabad, IN

Data Scientist, Jul 2017 – Aug 2019

- Proactively built and automated the claim extraction process from pdf templates by using deep learning and NLP (spacy) with in-turn saved 80% expense to company on manual extraction.
- Implemented GANs, Semi Supervised GANs for check/remittance identification/classification instead of labeling for each data point.
- Customer Segmentation model for high radius Cash App customers.
- Implemented “HiFreeda” Wake word detection model for high radius chat bot FREEDA.
- Implemented Noise Detection GANs for the noise removal from images.
- Built and implemented deduction validity predictor for P&G, also automated the deployment of validity predictor which increased 60% of P&G revenue on deductions.
- Implemented auto regex generator which gives regex by using pattern in the data.
- Implemented and created many feature engineering techniques, designed new algorithms for Oversampling analysis for imbalanced data and ML (Pseudo Random Forest which works better than RF in ML).

BITMIN INFO SYSTEMS, Hyderabad, IN (Merged with High Radius)

Data Scientist and Full Stack Developer, April 2016 – Jul 2017

- Being Full Stack Developer, developed apps, worked on the back-end and front-end enabling the existence of features and application development.
- Being Data Scientist, created Machine Learning-based tools for the company, such as Employee Iteration Rate prediction, Payment Date Prediction, Fraud Detection Analytics.

- Built a webservice in .net which extracts the payments from quick books, also worked on building a proximity distance app (ceechat) in android.

PIXENTIA SOLUTIONS, INDIA

Software Engineer-I Feb 2015 – Mar 2016

- Collaborated with team members to create applications system analysis based upon client requirements. Created tools like resume parser, Developed digital badge online representation of a skill.

GYAN DATA Pvt. LTD, Chennai

Software Engineer Trainee, Nov 2012- Feb 2014

- Developed and hosted apps like remote scilab for computations in chemical engineering labs remotely, worked on enterprise level applications like sandman (java based product) with machine learning as core.

EDUCATION

IIT Madras, Chennai, IN

B. Tech in chemical engineering with minor in data analytics, Jun 2014.

- GPA:7.1/10

UNIVERSITY OF CHICAGO GRAHAM SCHOOL Chicago, US

Post Graduate program in Data Science and Machine Learning (PGPDM), May 2019.

- GPA: 3.5/4.0

Birla Institute of Technology and Science, Pilani

M. Tech in software systems with specialization in Data Sciences and Cloud Computing, Jun 2021

- GPA: 7.5/10

ACADEMIC PROJECTS:

- Developed a machine learning project for Predicting prepayments and defaults for privatized banks.
- Wake word detection model for the custom word HIFREEDA
- Build a CNN based image classifier, which will be able to distinguish between different handwritten Devanagari characters.
- Distinguishing between Hillary Clinton and Trump tweets.
- Developed a streaming analytics application to analyze movie recommendations.
- Music Generation using Deep Learning.
- Built and implement and machine learning NLP based project which computes sentiment for an incoming review in amazon online website.

PERSONAL PROJECTS:

- Designed an Algorithm called as Pseudo Random Forest Which works better than Random Forest algorithm.
- Implemented and invented a new technique for oversampling.
- Designed TIC-TOC game machine with Reinforcement Learning.
- Persona based custom feed recommendation engine.
- Chat bot with RNN.

PATENTS AND RESEARCH PAPERS:

- Demand Sensing and Forecasting
US 17/110,992
<https://drive.google.com/file/d/1nvOsIO00G8Dwt5cNJjWemTGwtgbVVF9J/view?usp=sharing>
- Psuedo Random Forest
<https://drive.google.com/file/d/1w7kwxIumpsqam3IcCTGeLmVAEUJI1m9Z/view?usp=sharing>
- Noise Detection and Removal
<https://drive.google.com/file/d/1h2EtSHWM1qaScPZ9eBScVoW39nEFi3j8/view?usp=sharing>
- Generative Sampling Technique:
https://drive.google.com/file/d/199Vm0aMKafgu_tzBE5hnt0OhcpehH4Ym/view?usp=sharing
- Automated Extraction of Entities from claim documents:
<https://drive.google.com/file/d/1w7kwxIumpsqam3IcCTGeLmVAEUJI1m9Z/view?usp=sharing>
- Semi Supervised Gyan
<https://drive.google.com/file/d/1h2EtSHWM1qaScPZ9eBScVoW39nEFi3j8/view?usp=sharing>
