PROFESSIONAL EXPERIENCE

Data Analyst

The Affordable Organic Store

05/2024 – present
Hyderabad, India

- Led a team of 2 data analysts to enhance data processing and reporting capabilities.
- Integrated and managed Zoho Inventory Management API to streamline inventory operations.
- Developed a comprehensive dashboard for tracking damage coupons and processing refunds, improving financial accuracy and operational efficiency.
- Maintained form-based websites, ensuring optimal functionality and user experience.

Data Analyst Intern

The Affordable Organic Store

08/2023 – 04/2024
Hyderabad, India

- Conducted data collection, analysis, and interpretation from various sources to support decision-making across the organization.
- Analyzed large datasets using statistical techniques, identifying trends, and patterns, and supporting decision-making across the organization.
- Utilized data analysis tools and programming languages, including Python, Google Looker Studio, and Google Analytics.
- Generated regular reports to monitor key performance indicators(KPIs) and data collection processes.
- Created Data visualizations (charts, graphs, dashboards) to communicate findings effectively to stakeholders.

CERTIFICATIONS

Google Data Analytics Certification.

Google

Hyderabad, India

- Developed proficiency in data cleaning and organization techniques.
- Mastered spreadsheet functions for detailed analysis and calculations.
- Acquired SQL skills for database queries and manipulation.
- Attained programming skills in R for statistical analysis and data manipulation.
- Created compelling visualizations using Tableau and advanced features in R.
- Demonstrated effective communication of data findings through dashboards and presentations.

Machine Learning

Internshala

Hyderabad, India

- Acquired a comprehensive understanding of machine learning concepts, algorithms, and their practical applications.
- Applied machine learning algorithms to real-world scenarios, gaining hands-on experience in model development and implementation.
- Attained proficiency in programming with Python, a fundamental language for machine learning, enhancing the ability to implement algorithms and analyze data.

SKILLS

- Web Scraping
- Machine Learning
- Data Analytics
- Power BI
- Python
- JavaScript

EDUCATION

Bachelors In Technology <i>BV Raju Institute of Technology</i>	10/2020 – 05/2024 Narsapur, India
Intermediate - MPC <i>Sri Chaitanya Junior Kalasala</i>	06/2018 – 03/2020 Hyderabad, India

PROJECTS

Smart Meter Data Analytics • Developed and implemented a predictive model for energy consumption using machine learning algorithms. • Utilized real-time energy consumption data from smart meters in London for short-term load forecasting. • Applied a range of machine learning algorithms, including KNN, SVM, Decision Trees, Linear Regression, and Random Forest. • Identified Random Forest as the optimal algorithm, achieving the lowest RMSE and MAPE for accurate load predictions. • Contributed to the efficiency of smart grid systems, providing valuable insights for effective energy planning and consumption management.	09/2023 – present
Email Spam Classification using Machine Learning. • Developed machine learning models (Naive Bayes, SVM) for email spam classification. • Collected and preprocessed diverse email datasets, emphasizing feature engineering. • Implemented evaluation metrics (precision, recall, F1 score) for model performance assessment. • Deployed the classification model in a production environment for real-time filtering. • Achieved a notable reduction in false positives, enhancing email filtering accuracy. • Demonstrated proficiency in data preprocessing, model selection, and deployment.	09/2022 – 01/2023
