WORK EXPERIENCE

Senior Technical Program Manager

Walmart Global Technology (Retail) (Bangalore) (Jul 2021 - Jun 2025)

Led strategic initiatives and data projects within Walmart Global Technology, focusing on AI-enabled, cloud-optimized business solutions.

- Directed the end-to-end lifecycle for multiple AI/ML-enabled products, managing a \$10M+ budget and leading a global team of 60+ professionals across engineering, data, and product domains.
- Partnered with supply chain stakeholders (Logistics, Procurement) to gather data requirements and deliver analytics solutions, including dashboards, reports, and what-if models.
- Designed and deployed automated data pipelines and SQL/Tableau-based reporting tools to improve metric visibility and operational responsiveness.
- Enabled GenAI and AI/ML-powered decision support by integrating predictive insights into supply chain dashboards and operational workflows.
- Led stakeholder communications with Program Managers (PgMs) and functional leads to align project timelines, manage constraints, and ensure delivery transparency.
- Applied FinOps methodologies to optimize cloud infrastructure costs while aligning technical solutions with governance and efficiency objectives.
- Developed and delivered training materials, documentation, and webinars to promote self-service analytics via Cloud Supply Chain and Data Organization (CSCD) standards.
- Championed Agile-driven process improvements, achieving year-over-year reductions in delivery time and increases in operational efficiency.
- Oversaw data engineering roadmaps and cross-functional program dependencies across core business-critical initiatives, ensuring timely and risk-mitigated execution.

Achievements:

- Drove year-over-year growth in user engagement and revenue by aligning analytics solutions with core business KPIs.
- Formalized and scaled program management best practices for large-scale data initiatives, enhancing customer experience and accelerating business growth.
- Achieved significant cost avoidance, infrastructure efficiency, and performance gains through AI/ML-driven analytics and automation.
- Delivered critical project milestones on time and within scope, maintaining full leadership visibility into timelines, risks, and budgets.
- Contributed to measurable cost savings and improved system performance through predictive data models and FinOps-based cloud optimization.
- Successfully delivered complex analytics programs using structured Agile planning and proactive stakeholder communication.

Manager (On Contractual Role)

J.P Morgan and Chase (Financial Service) (Bangalore) (Feb 2020 - Jul 2021)

Serve as a Manager delivering Agile Transformations and Business agility.

- Championed agile adoption and promoted business value delivery through-out the organization. Coached, mentored teams employees and stakeholders on agile mindset and practices including scrum.
- Served as a Scrum Master for multiple distributed development teams across regions, enhancing or improving team practices and effectiveness.
- Addressed and resolved dysfunctions within teams, enabling continuous learning and knowledge dissemination through workshops.
- Experienced in teaching continuous delivery practices like test driven development.
- Implemented Agile and Scrum practices for both onshore and offshore teams. Guided organizations through framework transformations.
- Possesses in-depth knowledge of Agile methodologies (e.g., Scrum, Kanban, Lean).

Achievements:

- Improved team performance and effectiveness in Agile practices in developing teams across regions.
- Passionate about continuous learning and knowledge dissemination through workshops, classes, and Agile events

Senior Scrum Master/ Agile Coach (On Contractual Role)

Target Corporation (Retail) (Bangalore) *(Jan 2019 - Feb 2020)*

Serve as Agile Coach and Scrum Master to drive business agility and transformation.

- Implemented Agile and Scrum methodologies for onshore and offshore teams in an Agile Coach and Scrum Master role.
- Developed business plans for application development to boost revenue.
- Mentored teams for technical growth, improving processes, and implementing new software development methodologies.
- Managed vendor relationships from negotiation to implementation.
- Focused on resource planning, understanding and communicating key business objectives and strategies, and selecting productivity metrics for scrum teams.
- Guided teams on Agile/Scrum practices, driving continuous improvement, supporting and educating product owners, and facilitating scrum planning.
- Promoted quality practices and drove continuous integration.
- Managed process changes and enhancing Agile processes for the benefit of the organization.

Achievements:

- Successfully developed and implemented Agile and Scrum methodologies for both onshore and offshore teams, driving efficiency and productivity.
- Helped drive new and existing projects by effectively managing team setups and enhancing Agile processes.

Scrum Master and Product Owner.

Unisys (India) Private Limited (Child Welfare) (On Contractual Role) (Bangalore) *(Jul 2018 - Jan 2019)*

Led Agile and Scrum methodologies in mobile app projects. Served as both Scrum Master and Product Owner on Mobile App Projects

- Served as both Scrum Master and Product Owner, managing product backlog, prioritizing user stories, creating acceptance criteria, and facilitating backlog grooming.
- Acted as a liaison between Product Management and development teams, working closely with program management and leadership to support new business.
- Supported and empowered cross-functional teams, including UX designers, developers, and domain specialists, while providing key performance metrics to leadership on change implementations.
- Specialized in mobile platforms (iOS, Android, Windows), playing a role in customer engagement and Scrum Master responsibilities for complex projects.
- Led the implementation of Agile and Scrum practices for both onshore and offshore teams, and coached teams in Agile principles, process improvements, and value-based prioritization.
- Focused on process improvements, resource planning, and monitoring work-in-progress items for various teams (Scrum, Kanban, Scrumban) to eliminate waste and ensure efficiency.
- Managed vendor relationships from negotiations to implementations, developed business plans for revenue growth, and facilitated go-live activities.
- Provided status reports, burn down charts, velocity, and business value charts to business and product owners, ensuring transparent and effective communication on progress.

Achievements:

- Maximized development team productivity and ensuring successful delivery by effectively managing product backlog and prioritizing user stories.
- Provided key performance metrics to leadership on change implementations.

Proxy Product Owner and Scrum Master

Wipro Ltd (Bangalore) *(Jan 2016 - Mar 2018)*

Served as Key Interface between Product Owner and Scrum team. Facilitated Agile and Scrum Methodologies

- Improved team delivery and capacity planning for sprints, facilitated Agile retrospectives, and enhanced performance through leadership guidance.
- Proactively escalated issues to leadership for early resolution, leading to positive customer feedback.
- Resolved complex infrastructure issues by leveraging a professional network.
- Worked closely with product owners, system engineers, program managers, and other stakeholders to align on vision, define features, and support Agile processes.
- Acted as the voice of the customer, ensuring alignment with business perspectives and delivering value during development.
- Implemented issue tracking and improved team velocity through effective sprint planning.
- Ensured alignment with business perspectives and delivering value during development.
- Facilitating Agile retrospectives to continuously improve team processes and outcomes.

Achievements:

- Became a recognized expert in Version One.
- Enhanced team performance and customer satisfaction with strategic problem solving.
- Demonstrated Expertise in VersionOne tool for improving sprint planning.

Business Analyst and Proxy Scrum Master.

Wipro Ltd (Bangalore) *(Aug 2013 - Dec 2015)*

Serve as key interface and leader facilitating project needs as Proxy Scrum Master and Business Analyst.

- Prioritized and validated requirements with customers and product managers, facilitated communication between clients and IT, and worked closely with stakeholders to identify critical areas through JAD sessions.
- Coordinated an 8-person team for project completion, led Agile Scrum teams through the transition from waterfall to Agile, and facilitated daily Scrum and retrospective meetings.
- Developed functional requirement specifications, created use cases and process flow diagrams, and performed cost-benefit analyses to support system and process changes.
- Collaborated with QA teams in reviewing and validating test plans, generated test plans from client requirements, and conducted multiple levels of testing to ensure the application met client needs.

- Removed team impediments, protected team members from distractions, and continuously improved team processes through analysis and retrospective follow-ups.

Achievements:

- Successfully coordinated an 8-person project team, facilitating the achievement of project objectives and goals.
- Successfully drove the transition from Waterfall to Agile as the Proxy Scrum Master for development projects.

EDUCATION

Bachelor of Engineering in Applied Electronics and Instrumentation. (2009 - 2013)
West Bengal University of Technology, Kolkata, West Bengal
