Wayanad, Kerala

JOB OBJECTIVE

Technology-driven professional specializing in iOS Development, targeting responsibilities in an esteemed organization, preferably in Bangalore, Kochi, Kozhikode, Krivandrum and remote roles to leverage cutting-edge projects in the Technology Sector.

CORE COMPETENCIES

End-to-End Application Delivery
Cross-Functional Collaboration
Version Control
Core Animation and Core Graphics
User Experience Design
App Performance Optimization
Project Management
Mobile Application Development
Agile Methodologies
Software Development Life Cycle
Continuous Integration & Deployment
Debugging & Troubleshooting
Memory Management
App Store Deployment & Distribution
Unit testing and UI testing

TECHNICAL SKILLS

- Swift
- Objective C
- UI Kit
- Core Data
- Combine
- Core Bluetooth
- Core PHP
- AV Foundation
- Swift UI
- iOS SDK
- AutoLayout
- Cocoa Pods
- FireBase
- Core Location
- Android
- Grand Central Dispatch

PROFILE SUMMARY

- Accomplished iOS Technology Lead with over 8 years of expertise in designing, developing, and deploying high-quality iOS applications, leveraging advanced skills in Swift, SwiftUI, and Objective-C to deliver exceptional user experiences in Taxi management, Hospitality, Enterprise, Social Media and Ecommerce domains.
- Proficient in utilizing SwiftUI, Combine, and Firebase Analytics to build robust applications with seamless user experiences, integrating analytics and crash reporting tools to drive continuous improvement.
- Integrated push notifications, Google Maps, and various third-party libraries into the project, managing dependencies effectively using CocoaPods and Swift Package Manager to enhance functionality and streamline development.
- Adept in employing the MVVM design pattern and multithreaded programming to ensure efficient, responsive, and maintainable applications.
- Successfully developed and integrated various features, including local notifications based on device location, data management SDKs, and single sign-on (SSO) solutions with major platforms like Facebook and Google.
- Demonstrated exceptional performance through accolades such as the Hall of Fame award for end-to-end app development, client appreciation for SDK implementation, and the Insta Award from Infosys for high productivity.
- Led end-to-end project development by analyzing requirements, designing and implementing functionalities, coding business logic, and executing UI designs.
- Conducted code reviews, unit testing, and handled test cases, while actively engaging with clients and participating in Scrum meetings to ensure continuous project improvement.

CAREER TIMELINE

WORK EXPERIENCE

Infosys Ltd. (PepsiCo), Mysore as Technology Lead Oct'22 - Present

- Working on a retail iOS application for client PepsiCo, developed in SwiftUI using Combine and clean architecture.

CERTIFICATIONS

- Infosys Global Agile Certification
- Infosys Certified iOS Swift Developer
- Infosys Certified Professional - Generative AI for All

EDUCATION

B.E. in Computer Science from St. Joseph Engineering College of | 2011-15 |

ACHIEVEMENTS

- Received the Insta Award from Infosys for outstanding productivity and contributions to the project.
- Achieved a successful release of the iOS app on the App Store, accessible at [More Cravings](#).

SOFT SKILLS

- Analytical
- Communication Skills
- Time Management
- Problem Solving
- Critical Thinking
- Collaboration

PERSONAL DETAILS

Date of Birth: 30th October 1993

Languages: English and Malayalam

- Collaborating with a cross-functional engineering team to spearhead end-to-end application delivery solutions.
- Harnessing SwiftUI and the Combine framework to elevate and streamline development processes.
- Utilizing Couchbase, a NoSQL database, for efficient data storage and management
- Architecting and deploying modular components as Swift packages, meticulously managed through Swift Package Manager.
- Identifying and resolving performance bottlenecks to ensure smooth and efficient application performance by optimizing code, memory usage, and resource management.
- Writing clean, maintainable, and well-documented code while adhering to best practices and coding standards. Conducting thorough code reviews and incorporating feedback to uphold high quality.
- Developed multithreaded functionality to ensure the application remains responsive and performs efficiently under varying loads.
- Implementing SSL pinning to ensure secure network communications, safeguarding against attacks from tools like Charles Web Proxy.
- Delivering comprehensive multi-language support and acquiring valuable experience in managing multiple targets within the application.
- Implemented Power BI within the application by embedding Power BI URLs, allowing for seamless integration of dynamic reports and visualizations directly in the app for real-time business insights.
- Utilizing tools such as Instruments and leaked view controller detectors to identify and resolve memory leaks, ensuring robust and efficient application performance.

Achievement:

- Led projects that significantly boosted user engagement by integrating advanced analytics tools, showcasing a strong commitment to performance optimization.
- Achieved a notable reduction in app loading times through targeted optimization efforts, thereby elevating overall user experience and satisfaction.

Timesworld Media and Technology Solutions Pvt. Ltd. as iOS Developer June'20 – Oct'22

- Worked on iOS applications for clients Marriott International, Inc. and Dubai Economy on behalf of the Government of Dubai.
- Integrating Firebase Analytics and Crashlytics to systematically collect and scrutinize performance metrics and crash reports for continuous enhancement.
- Crafting intuitive and visually appealing user interfaces that enhance user experience, ensuring responsiveness and adaptability across various device sizes and orientations.
- Designing responsive UI screens using Auto Layout and Storyboard, integrating RESTful APIs and JSON, and adhering to coding standards with SwiftLint and SOLID principles for maintainable, reliable, and testable code.

Infinite Open Source Solutions LLP as iOS Developer June'16 – Jan'20

- Worked on a comprehensive taxi management application featuring separate rider and driver applications
- Employed the MVVM design pattern to enhance unit testing capabilities through effective dependency injection.
- Utilizing Google Maps polylines and Firebase push notifications, the application effectively tracks and alerts users and drivers in real-time
- Acquired expertise in following Apple's development guidelines, including the creation of provisioning profiles and the deployment of applications.
