Skills

- Java | SQL | Machine learning | Python | CSS | Scikit-learn | Pandas | GIT | Numpy | java script | Solidity
- Pycharm | Jupyter Notebook | Visual Studio | IntelliJ IDEA | Unreal engine
- Presentation | Report Building | Research | Team collaboration

Experience

Tech Intern

Rouge International

06/2024 - present

Currently leading the end-to-end development of a new company website, *Future Engine*, from scratch. This involves:

- **Planning:** Develop project plans, timelines, and deliverables.
- **Researching:** Analyze industry trends and competitor websites..
- **Development:** Use HTML, CSS,Java Script and Python to create a responsive, user-friendly site
- **API Integration:** Incorporate Crunchbase API for enhanced functionality.

Intern

Codsoft

05/2024 - 06/2024

- **Model Development:**Developed and deployed machine learning models with an average accuracy of 92%, addressing real-world application needs..
- **Algorithm Expertise:** Mastered a broad spectrum of machine learning algorithms, including linear and logistic regression, decision trees, support vector machines, k-means clustering, and neural networks.
- **Validation:** Applied rigorous validation techniques and performance tuning to ensure model robustness, reliability, and scalability in production environments.

Extern HP tech venture

Extern

04/2024 - 06/2024

- Exploring startup metrics, industry data, team, and business models
- Determining product differentiation and strategy across startups
- Constructing market maps across various startup sectors
- Managing data using data cleaning methods and tools such as Open Refine
- Calculating and analyzing data using Excel and SQL to find summary values and trends

Education

Bachelor of technology

GLA University

Mathura, India 08/2021 - 12/2024

- Major in Computer Science

Diploma

GLA University

Mathura, India 08/2018 - 12/2021

- Major in Computer Science

Projects

WORKSHOP PORTAL

Developed a platform enabling students to access information on the latest workshops and seamlessly register for participation.

- PHP
- Bootstrap
- HTML and CSS

Crypto Kid

Developed and implemented a Smart contract in remix by using solidity on ethereum block chain allowing secure parental investments with withdrawal restrictions until age 18.

- Solidity
- Meta mask

Others

- **Completed Cisco's Ethical Hacking training**, covering cybersecurity fundamentals, hacker strategies, common attacks (phishing, DDoS, malware), and techniques to enhance digital security.
- **Completed Udemy's Ethereum and Solidity** course, learning blockchain basics, writing smart contracts, and developing *Crypto Kid*, a prototype investment platform for future projects.
