Email: naveenayalla60@gmail.com

Objective

To make contribution to the organization to the best of my ability and to develop new skills and share my knowledge while interacting with others and achieve new height.

Professional Summary

- 4 years of experience in Information Technology with proficiency in Designing, Development, Implementation and testing.
- Experience in working with Transformations using **DataWeave Operators, flow control expressions and filters.**
- Experience in consuming and exposing of Web Services (Both REST and SOAP).
- Experience in using RAML to develop APIs. {Developed the APIs using the RAML}
- Hands-on experience on connectors like HTTP, FTP, DB, JMS, KAFKA, JMS, SMTP SOLACE, and File. And also good at using multiple components like Transfer Message, Loggers, and VM.
- Developed Mule flows to integrate Data from various sources like **Message queues, Exchanges, Schedulers, HTTP** into cloud Database after some transformations at the integration layer.
- Hands on experience with **DataWeave Language (MULE 4)** to access payload, Message Attributes and variables in and across Mule Flows.
- Experience in building complex Mule Flows with **Scopes, Error Handling strategies, Message Filters, Router.**
- Good exposed in creating Munit test cases to validate Mule flows.
- Worked on the implementation of Basic, OAuth2 Authentication Policies to APIs.
- Proficiency in experience on Agile Scrum methodology implementations and Software Development Life Cycle (**SDLC**) including Requirement Analysis, Development, Testing and Deployments (**CI/CD**) of software applications.
- Provided technical production applications support and assistance to customers.
- A good team player with ability to quickly adapt to new technologies and having good interpersonal and analytical skills.
- Hands-on experience with open source tools such as GitHub, Maven.

Work Experience Summary

- Currently working with **Technosoft solutions** as **MuleSoft developer** from November 2020 to till date.

Educational Qualification

- Completed B.Tech from Sri Vasavi engineering college, Tadepalligudem (2017)

Certifications

- MuleSoft Certified Developer - Level 1 (Mule 4)

Technical Skills	
• Web Technologies	: REST, SOAP
• Connectors	: HTTP, Anypoint MQ, object store, scheduler, file etc...
• Operating system	: Windows, Linux
• Database	: MySQL, Oracle and Snowflake
• Software's	: Mule ESB, Eclipse IDE
• Other tools	: ServiceNow, Splunk, JFRONG, SonarQube
• Tools Used	: Anypoint Studio, Anypoint platform, JMeter
• CI/CD	: GitHub, Jenkins, Maven and Azure
• Message Transformations	: JSON, XML, CSV

PROJECTS

Project#1	: SFCC-NETSUITE INTEGRATION
Environment	: Mule 4, Any point studio, Anypoint Platform
Role	: MuleSoft Integration Developer
Client	: Hutchison

Description:

Hutchison is Australia's leading telecommunications and technology company, offering a full range of communications services and competing in all telecommunications markets. Mule will pull the Telecom customer data from SFCC and inserting into NETSUITE and the architecture pattern is pub sub

Roles & Responsibilities:

- Involved in requirement gathering session to understand the functional specifications and Business requirements.
- Designing Integration solutions tailored to an organisation need this Involves understanding business requirements selecting appropriate Mulesoft components and crafting an architecture that ensuring scalability, flexibility, and security
- Preparing Solution, Technical and SOP design document as per requirement.
- Implemented RAML files for different entity creations and respective associations.
- Created Mule interfaces for efficient implementation of integration scenarios using various connectors, filters, components, scopes with MuleSoft.
- Implemented parallel for each scope to process the common business functionalities and transformation on each objects in the fetched collections
- Performing performance testing internally based on Volumetric analysis
- Created HTTP inbound & outbound flows, routing, orchestration, transformations.
- Accessed various attributes, Payload and variables in and across Mule Message Flows to perform business operations like logging the error event.
- Implementation of Data Transformation using Dataweave, Routing and Data Validation
- Hands on in exposed & consumed REST full/ SOAP webservice in MULE ESB.
- Experience in Mule Soft AnyPoint Platform on designing and implementing Mule APIs.
- Developed Munit flows for unit testing and achieved 95 % of coverage throughout the project
- Implemented Mule 4 error handling.
- Involved in CI/CD Jenkins pipeline deployment.

Project#2	: SFCC-STORE INTEGRATION
Environment	: Mule 4, Any point studio, Anypoint Platform
Role	: MuleSoft Integration Developer
Client	: Colourbar

Description:

colourbar offers a range of products falling under the skin care, suncare, and makeup category. Our transformative range of cleansers, serums, and moisturizers address skincare needs for all skin types through leading-edge science and time-tested ingredients. An integration pattern is the method of communication the systems use to send data and/or receive data for ordering of beauty products in us and canada

Roles & Responsibilities:

- Involved in discussions related to migrations.
- Working as the Integration Technology Developer the adoption of Hybrid Integration or an iPaaS solutions with a particular focus on the Mulesoft Anypoint platform that includes API Designer, AP manager, and API studio
- Defining and delivering the Integration Technology aspects of the projects, including timely production of architectural designs and documentation
- Being a key contributor and advocate of Microservice, API Management, process automations, frameworks in projects and programs
- Checking the CloudHub logs for providing request data to different teams as on when required
- Involved in UAT testing from mulesoft end.
- Performing performance testing internally based on Volumetric analysis.
- Enabling debug logging and anypoint monitoring.
- Analyzing issues and providing solutions to different teams by debugging the applications.
- Involved in the manual and CI/CD deployment activities.
- Involved in discussions related to migrations.
- Raised a support case with mulesoft product team for production outage.
- Checking the CloudHub logs for providing request data to different teams as on when required
- Retriggering failed request and running scheduler in the time manner.

Project#3	: CONCUR-SMART EVENT INTEGRATION
Environment	: Mule 4, Any point studio, Anypoint Platform
Role	: MuleSoft Integration Developer
Client	: Salesforce

Description:

Concur to SE integration will allow the end users to access PINC functionalities with in Concur which will optimize the process steps and improvise the end user productivity. JDA interacts with MuleSoft using APIs and MuleSoft integrating with PINC using AWS SNS & SQS

Roles & Responsibilities:

- Identify, analyze and develop interfaces and integration flows using Mule ESB and Anypoint Studio
- Building the mule ESB flows using Anypoint Studio
- Involved in Mule soft API Development using RAML
- Involved in adding validation in RAML file.
- Implemented transformations using Dataweave Language (DWL)
- Implemented in MuleSoft Anypoint API platform on designing and implementing Mule APIs
- Consumed RAML based RESTful Web services, SOAP Web services for Mule ESB
- Extensively worked on Mule Connectors
- Worked with Database operations in oracle
- Extensively used error handling Catch Exception Strategy, Reference Exception Strategy, Choice Exception Strategy and rollback Exception Strategy
- Prepared Test cases and Testing Application using MUnit and SoapUI

Declaration:

- I hereby declare that the information furnished above is true to the best of my knowledge and belief.
