WORK EXPERIENCE

Quality Assurance Engineer

Clarion Technologies.

08/2021 - Present

PROJECTS

Domain : (fintech) Core Banking & Finance services , Client :
HDFC Bank (03/2021 - 04/2023)

- followed **Agile methodology** with **Agile/Scrum ceremonies** (e.g. **sprint planning,retrospectives**)
- **requirement analysis** on **Confluence** by understanding **User story** and **Acceptance criteri**
- closely worked with development team throughout **SDLC & STLC** . Involved in **test design**, write testcases on **TestRail** , execution and **bug/defect tracking** on **JIRA, Javascript, and web driver io** .
- did **REST API testing** using **Postman, Soap UI** & worked for authentication types like bearer token, **Auth 2.0** etc.
- performed **API Automation** using **RestAssured**
- write **SQL queries** for **database testing** on MySQL server
- worked on **selenium with Java** for automation testing of web application
- execution of automation **test scripts** of **regression suite** in CI CD pipeline using **Jenkins** using **in-house framework** & refactoring test scripts to update locators using different **locator strategies** (i.e **xpath, CSS selectors** etc)
- **debugging** failed test scripts, used **log4j** for logging mechanism

Domain : healthcare , Client : Healthatm India private

- limited.(05/2023 - Present)

- end to end client **communication** for **test plan/planning**, test execution **reports**, testing status
- performed **functional testing** (i.e **smoke, sanity, retesting, system,integration,UAT, regression testing**) with in-sprint automation
- used **TestNG** for **parallel testing** and **cross browser testing**, **Cucumber** for behavior driven development and **maven** as build management tool
- design & developed **test automation framework** from scratch using reusable methods and Utilities(e.g. **Apache POI** for Excel data driven testing, **faker** for automated **test data** generation)
- used **Git** and **Github** for version control
- worked as **mobile tester** on hybrid framework for mobile automation/mobile testing using **Appium with Java** for **Android and IOS** platforms
- handling **setup** and configuration for **mobile app testing** using appium server, **inspector**, android studio, **Xcode**, ADB commands
- worked on POC for cross device testing and execution of mobile application testing on **cloud** platform using **browserstack**.

EDUCATION

B.Sc.(Computer science)

NMU University (Jalgoan)

04/2021

SKILLS

Manual Testing

Automation Testing

Java Script

Selenium WebDriver

Core Java

Maven

API Testing

Web Driver IO

BDD Cucumber

TestNG

Rest Assured

Appium

SQL

Jenkins

Git GitHub

Postman

Mobile Application Testing

framework development

ACHIEVEMENTS

Chess certificate of state level.

got achiever award in annual function of organization
