EDUCATION

**B.Tech in Electrical&Electronics
Engineering**

Aditya College of Engineering
2015 - 2019

Percentage: **73.09**

CERTIFICATIONS

- Automate the Boring Stuff with Python Programming
- Rasa developer certificate
- Oracle Cloud Infrastructure 2023 AI Certified Foundations Associate

TECHNICAL SKILLS

- Python programming
- Generative AI
- Rasa(open-source)
- HTML, CSS, Javascript
- Hugging face, langchain
- Amazon lex
- PostgreSQL
- API
- large language models (LLMs)
- Dialogflow, kore.ai
- Git
- NLP

PERSONAL DETAILS

- Marital Status: Single
- Nationality: Indian
- Languages Known: English, Hindi, Tamil & Telugu

PROFESSIONAL SUMMARY

Experienced Python Developer proficient in designing, developing, and deploying software solutions across domains. Skilled in utilizing Python libraries and frameworks for efficient applications. Strong problem-solving and communication skills for effective teamwork. Committed to continuous learning and staying updated on Python trends.

WORK EXPERIENCE

KGiSL Technologies Pvt Ltd

May 2021 - Present

Led the development of advanced generative AI projects, leveraging NLP/NLU, state-of-the-art LLMs, and machine learning techniques to deliver scalable, client-centric solutions.

Key projects include:

1. RAG-Based Knowledge Retrieval Application

- Developed a retrieval-augmented generation (RAG) application that dynamically pulls content from live websites, training the model to answer questions with high relevance and accuracy based on real-time data.

2. Voice Bot with Speech-to-Text (STT) and Text-to-Speech (TTS)

- Engineered a conversational voice assistant using OpenAI's Whisper for STT and Microsoft's SpeechT5 for TTS. This solution provided users with highly responsive, natural-sounding interactions, enhancing user engagement and accessibility.

3. Insurance Policy Purchase and customer support Assistant

- Built a conversational AI assistant for streamlined insurance policy purchase, automating steps from policy selection to purchase confirmation. This solution offered customers a guided, efficient experience for securing insurance policies directly through the bot.

4. Real Estate Property Search Assistant

- Developed a real estate conversational assistant to help users locate properties nearby. Utilizing location-based AI, this assistant provided personalized property recommendations, improving the search and selection process for prospective buyers.
- For each project, utilized a mix of supervised, unsupervised, and recurrent machine learning models, ensuring optimal model performance. Maintained a library of reusable components, setting development best practices, and regularly mentoring junior developers while driving innovation to meet evolving project goals.

Teleperformance, Hyderabad

March 2021 - May 2021

In my role as a data analyst, I focus on refining and converting raw data into valuable and actionable insights.

Trinity Transformers, Hyderabad

July 2019 - February 2020

During my tenure as a Graduate Engineer Trainee (GET), I obtained extensive insights into the manufacturing process of transformers, encompassing intricate details from the initial stages of production.
