Technical Skills

Languages: Python, C, Java(basics).

Database Management: MySQL , PostgreSQL, BigQuery.

Operating Systems : Windows , Linux.

Cloud Platform : Azure , Google Cloud Platform (GCP).

Deployment Automation : Docker, Apache Airflow.

Generative AI: LLM's, Prompt Engineering, Langchain, AutoGen, Hugging Face, Pinecone, Streamlit, Fine Tuning process
Vertex AI pipelines, Text to video Generation Models, micro tuning .

Experience

Revature

Jan 2024 – Present

Generative AI Developer

chennai, India

- Designing, Developing, and Implementing Generative AI Models.
- Demonstrated proficiency in LLMs, LangChain, Vertex AI, and GCP services.
- Developed and deployed an Agent Assist AI chatbot, enhancing customer interactions through real-time assistance.
- Built and deployed Vertex AI Pipelines, automating ML workflows and managing artifacts efficiently in GCP.
- Designed and optimized LLM-based conversational AI for improved response accuracy and contextual understanding.

Projects

Agent Desktop/Agent Assist | LLMs, Fast API, Prompt Eng , RAG

- * Developed an AI-powered agent assist platform to enhance customer support efficiency.
- * Integrated LLMs for summarizing customer queries, extracting intents, and presenting actionable recommendations.
- * Implemented real-time data processing pipelines with Vertex AI for intelligent decision-making and support automation.

Vertex AI Pipeline | GCP, Kubeflow, BigQuery

- * Built a scalable pipeline for data ingestion, processing, and vector embeddings storage.
- * Enabled parallel worker nodes for efficient processing and integration with Redis for document retrieval.
- * Enhanced pipeline resilience and minimized data loss during parallel execution.

AI Chat Bot | OpenAI LLM, Langchain, Agents, VertexAI, RAG, Pinecone

- * Chat Interface will be provided by Streamlit The core functionality will be achieved via LangChain Agent, an open-source LLM equipped with tools.
- * Some tools will retrieve further information and provide additional context to LLM for generation. One of the tools will be retrieving information from the vector embeds stored in a vector database.
- * The Agent will have a memory of the chat and can recall earlier conversations had the user in the current session. Vertex AI AutoML for finetuning a classification model.

Resume Shortlister | Assistant API, AutoGen, Streamlit, SMTP Email notification

- * Resume Shortlister is a powerful application designed to streamline the resume shortlisting process for companies. Leveraging advanced algorithms, it intelligently matches resumes to job descriptions, saving time and effort in the recruitment process..
- * Resume Shortlister, companies can quickly identify top candidates whose skills and experiences closely align with their specific job requirements..

Education

Bachelor of Technology

Sreyas Institute of Engineering and Technology

06/2018 - 08/2022

Electronics and Communication Engineering

Intermediate (12th Standard)

Narayana Junior College

06/2016 - 04/2018

Mathematics, Physics, Chemistry

10th Standard

Liberty High School

06/2015 - 04/2016
