Summary

Results-driven Snowflake Developer with 3.5 years of extensive experience in optimizing data warehousing solutions, achieving a 90% improvement in query performance and a 90% reduction in ETL load times. Skilled in complex SQL development, cluster maintenance, and proactive monitoring. Ready to deliver scalable, high-performance data solutions for client

Experience

- **Infosys Ltd** 14/06/2021 - Present
Snowflake Developer
 - Specializing in optimizing Snowflake data warehousing solutions for performance and scalability.

Projects

- **Snowflake Implementation**
Snowflake Developer | Client : Apple | 04/2022 - Present
Key Responsibilities
 - Data Warehouse Design: Implemented Snowflake warehouses for end-to-end data processes .
 - SQL Development: Created and optimized complex SQL queries and stored procedures for efficient data handling.
 - Performance Engineering: Engineered clusters to improve query response times by 90%, enhancing system performance.
 - Implemented and managed SnowPipe for continuous data ingestion, ensuring real-time data processing and integration.
 - ETL Optimization: Streamlined ETL processes, reducing load times by 90% and improving efficiency.
 - Created and maintained tasks and streams for automated data processing and monitoring.
 - Cluster Maintenance: Managed Snowflake clusters, reducing data size by 90% while ensuring high availability.
 - Managed data sharing and utilized Snowflake's Time Travel and Optimizer features to ensure data accuracy and performance.
 - Proactive Monitoring: Developed monitoring systems to significantly reduce downtime and ensure continuous operations.
- **Teradata Implementation**
Teradata Developer | Apple | 06/2021 - 03/2022
Key Responsibilities :
 - Optimized Query Performance: Fixed high CPU-consuming queries to enhance system performance.
 - Query Tuning: Improved query accuracy by adjusting statistics, skewness, and filters.
 - User Support: Provided recommendations to prevent future query issues.
 - Proactive Monitoring: Monitored and advised on long-running queries to maintain system efficiency.
 - Change Request Management: Reviewed and approved CRs to ensure alignment with project requirements

Skills

- Snowflake Tools: SnowPipe, SnowSQL, Tasks, Streams, Time Travel, Optimizer, Metadata Manager, Programming : SQL Data Warehousing: OLTP, OLAP, Dimensions, Facts, Data Modeling

Education

- **RGPV Bhopal** 2020
B.E
8.12 CGPA
