EXPERIENCE

SOFTWARE DEVELOPMENT ENGINEER - AMAZON(CONTRACT)

Mar 2024 – Present

- Implemented a comprehensive framework for managing seller rewards, resulting in an increase in active participants by 25% over 3 months; utilized direct feedback mechanisms to identify key enhancement areas with significant impact potential.
- Created an automated data deletion solution using AWS Lambda, SNS, and SQS, triggered on account closure to ensure secure removal of seller data from DynamoDB and S3.
- Spearheaded the LPT to CDK Migration project, transitioning AWS service provisioning through code; streamlined deployment processes and improved efficiency by implementing 15+ aws resources through code.

SOFTWARE ENGINEER - SURE BRIGHT

Aug 2022 - May 2023

- Creating efficient REST APIs for the product, employing a tech stack that includes Spring Boot, Java, DynamoDB, AWS Elastic Beanstalk, AWS S3, and Shopify APIs
- Designed and developed 5+ backend applications, ensuring seamless integration with AWS services, leading to a 15% increase in system efficiency and scalability.
- Performed comprehensive testing of backend applications and REST APIs, conducting 20+ tests both locally and on servers, resulting in a 20% improvement in performance and system reliability.

SOFTWARE ENGINEER - ECLERX

Jul 2021 - Aug 2022

- Crafted 5+ Business Process Models using the Flowable Workflow Engine, improving workflow automation and increasing process efficiency by 25%
- Engineered robust REST APIs for the product using a tech stack including Spring Boot, MySQL, Flowable, and Angular, enhancing system functionality and reducing development time by 10%.

TECHNICAL SKILLS

Languages & Frameworks : Java, C++, Spring Boot, Hybernate, SQL, Typescript, AWS Cloud Services

Databases : SQL, NoSQL, AWS DynamoDB

Relevant Coursework : Data Structures and Algorithms, Design Patterns, MicroServices

Dev Tools : IntelliJ, Visual Studio Code, Git

EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY, MANDI

Bachelor of Technology

CGPA: 7.03

Jun 2017 – July 2021

PROJECTS

SELLER REWARDS PROGRAM (SINGAPORE) - AMAZON

- Built reward point validation logic to securely credit and redeem points based on seller eligibility, processing 100+ transactions daily.
- Constructed an automated solution using AWS Fargate to handle annual point expiration, ensuring accurate removal of expired points from 500+ seller wallets.
- Optimized the rewards lifecycle, enhancing program efficiency by 15% and increasing seller satisfaction.

CUSTOMER PORTAL (WEB APPLICATION) - SUREBRIGHT

- Established a comprehensive web application for 1,000+ Surebright customers to manage transactions and update profile information.
- Enabled seamless insurance policy purchases and secure payment methods, improving transaction efficiency.
- Implemented features for checking transaction history, ensuring a user-friendly and intuitive experience.

ADMIN DASHBOARD LOAN REQUEST PROCESS - ECLERX

- Formulated a flexible Business Process Model (BPM) using the Flowable framework to automate complex workflows, improving efficiency by 20%.
- Generated a full-stack web application using Angular, Spring Boot, Java, and MySQL for seamless user interactions.
- Streamlined loan application processes by automating approval, review, and rejection tasks, reducing processing time by 25%.

ACHIEVEMENTS

- Won two silver medals in the 53rd InterIIT Sports Meet.
- Recognized as "Extraordinary Performer of the Year 2019" in college.
