PROFILE

Software Developer with over 2 years of software engineering expertise, specializing in Python , Spring Boot (Security, AOP, microservices) and Java/J2EE. Proficient in AJAX, JSON, and socket programming for modern web technologies. Strong knowledge in Android development with Java, MySQL integration, and web socket programming for high-performance solutions. Excited to contribute to dynamic teams and deliver high-quality software solutions.

EXPERIENCE

TVESAS Electric Solutions Pvt Ltd

Software Engineer

Mar '23 — Apr '24
Lucknow, India (Remote)

- Utilized expertise in Java, J2EE, and JavaScript to deliver innovative end-to-end solutions that meet business requirements, including setup on AWS infrastructure.
- Conducted thorough testing and troubleshooting to identify and resolve software issues promptly.
- Developed a refund module for customers with API integration for seamless transaction processing.
- Worked on implementing the OCPP protocol for communication with chargers using web socket technology.
- Developed an Android mobile app focusing on UI optimization and security implementation.
- Provided on-site training to clients upon completion of their solutions.

Quazma Techno Solutions Pvt. Ltd

Associate Software Engineer

Mar '22 — Feb '23
Indore

- Actively involved in crafting applications utilizing Node.js and Core Java technologies.
- Playing a pivotal role in augmenting company software solutions through the development of innovative features and tools.

SKILLS

Java , Python , Node.js , React , React Native , J2EE , Spring Boot , C/C++
MySQL , PostgreSQL
Eclipse , IntelliJ IDEA , Docker , Android Studio , AWS

SELF-PROJECTS

Quiz Application

[Github Link](#)

- Developed a microservice-based "Quiz Application" using Spring Boot, Hibernate, and MySQL. Implemented service discovery with Eureka and used an API Gateway for load balancing and routing. The system efficiently manages quizzes and questions across distinct services.

Dihari-Majduri Application

[Github Link](#)

- Developed the "Dihari-Majduri" system using Spring Boot, Hibernate, Spring Security, and AOP to manage farmer labor working days. Complemented the system with an Android mobile application, enhancing accessibility for farmers and ensuring secure, efficient management of labor records. Integrated MySQL for reliable data storage and retrieval.

Chess Application

[Github Link](#)

- Developed a sophisticated chess application with client-server architecture using Java socket programming for real-time multiplayer interaction. Employed AWT and Swing for the user interface, Gson for data exchange and MySQL for secure data storage. Implemented multithreading to handle simultaneous games and player management features.

EDUCATION

B. Tech (Computer Science and Engineering) , Ujjain Engineering College (CGPA: 7.64)

Jul '19 — Jun '23
Ujjain , Madhya Pradesh, India
