

PRASAD

RPA Developer

Hyderabad | +91 7981007950

| Email: mullapudiprasad304@gamli.com

Objective

To achieve and surpass professional and personal targets in the organization where, I work and to demonstrate my inbuilt to attain the highest level of success by performing to the best of my abilities.

Professional Synopsis

- Having Professional IT Experience of 5 years in RPA – Robotic Process Automation, using Blue Prism.
- Managing & leading software developments in Financial Service India's delivery centers in relation to software robotics process automation.
- Adept knowledge of Software Development Life cycle (SDLC) including Requirement gathering, Analysis, Design, Development, Testing, Deployment, Delivery and Support.
- Analyzing and understanding the business processes. Identifying and communicating the technical software requirements.
- Business Management insights with fair knowledge of Business Analysis, process analysis & discovery and Project Management and latest trends.
- Working with different roles like business analyse, developer, Process Administrator, and testing in RPA (Robotic Process Automation). Automated OS technology like Windows OS, cloud technology like Citrix & some more applications like Oracle Applications, sap applications etc.
- We had developed a automation workflow for (Domain: Banking) and Order Process (Domain: Finance) using Development Tool BLUEPRISM, which helps the clients & associates to just key in the data's given by the customers and the end results can be retrieved without navigating through any screen (manually).
- Beginning, Associates were manually processing orders via their applications. And this had been a tedious and complicated task, since they need to navigate through many screens of an application. Also, it takes more time to complete one case.
- Our task is to ensure that the environment developed by us shouldn't cause any deviation. Each and every task or object developed, needs to be tested under all circumstances before its being deployed for live functioning.
- Expertise in Black box testing, Functional testing, Regression testing, Integration testing & UAT testing in different stages of Software Development Life Cycle (SDLC).
- Good experience in Agile Scrum methodology.
- Experience in using different varieties of Issue and Ticketing Tools.
- Excellent problem solving skills with a strong technical background and good interpersonal skills.

Skills Snapshot
