ACADEMIC QUALIFICATION

MCA

DR.B.V.Raju College,Bimavaram

2018 To 2021

B.sc

Sri Y.N College,Narasapuram

2013 To 2018

Intermediate

Sri.Surya j.r College,Narasapuram

2011 To 2013

SSC

ZPH High School,Masthyapuri.

2011

PROFILE SNAPSHOT

• Dynamic and diligent **Software Development Engineer** with **over 2.5 years** of IT industry experience in

• **Web and .NET Technologies**

• Proficient in **Microsoft .Net Technologies** and skilled in **Angular, Core, JavaScript, Ajax Handler, and jQuery**

• Extensive expertise in writing **Stored Procedures, Functions, and Triggers in SQL Server.**

• Familiarity with version control tools including **Microsoft Visual SourceSafe (VSS), Team Foundation Server (TFS), Git, and Azure**

• Demonstrated proficiency in designing and developing scalable **N-tier Architectures**

• Highly skilled in proficiently managing **APIs and Microservices**, prioritizing security as a key aspect

Extensive knowledge in front-end design utilizing **HTML, DHTML, CSS, Master Pages, Site Map, and JavaScript.**

Experience & versatility in working with various methodologies including **Waterfall, Scrum, and Agile**

TECHNICAL SKILLS

|                                 |                                                  |
|---------------------------------|--------------------------------------------------|
| Cloud Service                   | Azure Web, Lambada Function                      |
| Control Version                 | SNV,Git Hub,Source Tool,Bit Bucket, Architecture |
| ASPX,MVC, Repository, .Net Core |                                                  |
| Project Management Tool         | Jira,SVN,Git,Gitlab, Postman, Source Tree        |
| Other Skills                    | Spoken English, Excel,                           |

WORK EXPERIENCE

| Organization                          | Designation                  | Duration            |
|---------------------------------------|------------------------------|---------------------|
| Senwell Group Pvt Ltd Pune, India     | Software Developer           | Nov 2023 – Present  |
| Cognine Technologies Hyderabad, India | Associate Software Developer | May 2022 – Oct 2023 |
|                                       |                              |                     |
|                                       |                              |                     |

Cognine Technologies Hyderabad, India | ASSOCIATE SOFTWARE DEVELOPER

• Provide end to end solutions – right from Requirement gathering to Deployment & Support

• Bug fixing and Enhancements

• Supporting Deployment Activities (Manage CI & CD Pipelines)

• Designing and developing the new requirements

• Unit Testing (N-Test)

• Always ready to keep up to date with emerging technologies

• Responsible for managing team as well as Client Support

Senwell Group Pvt Ltd Pune, India | Software Developer

• Mange eliciting requirements, and analyzing & developing Design Document

• Plan, design, build, test, and implement applications withhigh-qualityty standards, integrating

• needs into client’s business processes and system environments

• Responsible for the design and implementation of Web APIs using .NET CORE.

• Monitor and update infrastructure and architectural frameworks with Azure & Azure DevOps

- Work with .NET frameworks including Microservices based framework
- Design & implement Application & Server Migration from on-premises to cloud for existing & underdevelopment apps
- Assisted in the development of ERP software design and coding
- Gathered information from consumers about program functionality
- Conducted deployment of code on User Acceptance Testing (UAT) environment on server process

## PROJECTS

**Name:** Buzops | USA

**Description:** Buzops is an Administrative portal which is used to manage customers and staff of particular

gym/Club. It can provide multiple subscriptions coupons with Buzops. They also provide online interactive sessions.

**Technologies:** C#, ASP.NET CORE, SQL SERVER, Web APIs, React JS

### Role & Responsibility:

- Implemented new Web pages based on their requirements.
- Implemented new Calculations for Tax.
- To make existing code run more efficiently.
- Responsible for coding and developing the required features.
- Preparing Impact Analysis and Deployment Document.
- Development of technical specifications and plans.
- Resolving technical issues faced by other team members.
- Participating in daily scrum meetings.
- Understanding & analysing the Production issues and fixing the same
- Deployed application in environments like Dev, Qa and Stage etc..

**Name:** GOFUNDRAIS | AUS

**Description:** GoFundraise is an innovative online portal designed to facilitate charitable donations, making it easier for individuals and organizations to support various causes. The platform streamlines the donation process, allowing users to connect with a wide range of charities and contribute seamlessly..

- **User-Friendly Interface:** Intuitive design that simplifies the donation process for users of all ages.
- **Variety of Charities:** A diverse selection of vetted charities, enabling donors to support causes that resonate with them.
- **Secure Transactions:** Robust security measures ensure that all financial transactions are safe and confidential.
- **Fundraising Tools:** Offers resources and tools for charities to effectively raise funds and engage with their communities.

- **Impact Tracking:** Allows donors to track the impact of their contributions, fostering transparency and trust.

**Technologies:** C#, .NET Core 6, SQL,Vue.js, AWS, Linear, N-Unit, LINQ, Azure function, .net MVC,WebApi

### Role & Responsibility:

- Design and implement features using the MVC architecture to ensure a scalable and maintainable codebase.
  - Develop and integrate new APIs to meet module requirements, facilitating seamless communication between front-end and back-end systems.
  - Write comprehensive unit tests using NUnit to ensure code reliability and performance.
  - Address SonarQube issues to enhance code quality and achieve optimal code coverage.
  - Utilize LINQ for efficient data manipulation and querying within the application.
- Collaborate with front-end developers to implement user interface requirements as needed.
- Manage database operations, including data retrieval, updates, and optimizations to support application functionality.
