Feb 2019 – Oct 2020 | Hyderabad, TG

ROLES AND RESPONSIBILITIES

- **Developed REST APIs and Implemented OAuth:** Successfully developed over 20 RESTful APIs, enabling seamless integration with third-party applications and enhancing data exchange efficiency by 40%.
- **Integrated SMS and Payment Gateways:** Integrated SMS gateways and multiple payment gateways (including Twilio, Razorpay and Stripe), increasing transaction success rates by 25% and improving user communication reliability.
- **Customizable Widgets and Page Builders for CMS:** Created and implemented customizable widgets and page builders within a Laravel-based CMS for university management. This feature empowered front-end developers to construct websites 50% faster.
- **E-commerce Application Development:** Spearheaded the development of an e-commerce platform that handled over 10,000 transactions per month, incorporating a secure payment gateway that reduced checkout abandonment by 15%.
- **Business Analytics Dashboards:** Developed interactive dashboards with integrated data tables, graphs, and Google Maps to display user routes, enhancing data visualization for clients, improving decision-making speed by 30%, and reducing route calculation time by 35%.
- **APIs for Mobile Applications:** Built and maintained APIs to support mobile applications, enabling real-time data exchange and improving mobile app performance by 20%.
- **Automation of Asset and Facility Management Systems:** Automated asset and facility management systems with comprehensive dashboards, reducing manual work by 90% and cutting asset assignment time by 70%.
- **WordPress Development and Maintenance:** Developed and maintained over 30 websites using WordPress CMS, achieving a 99% client satisfaction rate due to timely updates and robust functionality.
- **E-commerce (WordPress & WooCommerce):** Enhanced and modified existing e-commerce applications using WordPress and WooCommerce, which led to a 20% increase in online sales.
