PROFESSIONAL SUMMARY

IT Professional with 3+ years' experience in DevOps/Azure Software Configuration Management, which includes Build Automation, Continuous Integration, Continuous Deployment, and Continuous monitoring using Automation Tools, Azure DevOps (CI/CD), Containerization (Docker), GIT, JSON, Source Control Management Tool (azure repo), SDLC, YAML

Skills

- Azure DevOps (Continuous Integration & Continuous Deployment)
- Docker (Containerization)
- Azure (Cloud Environment)
- Kubernetes (Container orchestration)
- Jira (Ticketing Tool)
- Confluence
- GIT, GITHUB (Versioning Tools)

EXPERIENCE Profile: HCL TECH

February 2021 – Till Date

I am working as a DevOps engineer and my responsibility is to manage the complete project cycle from requirements analysis to systems research, build and release management, testing, debug using automated code deployment using Azure DevOps, YAML, TFVC and deploy via Docker in an Azure environment using AKS. Experience in Azure IaaS - virtual networks, virtual machines, cloud services, traffic managers, VPN, load balancing, application gateways, auto-scaling, Usage alerts Azure Monitor, Terraform, Azure active directory, and provide valuable insights into user experience using agile methodologies.

Education

Degree: Bachelor of Technology

Graduation Year: 2020

College Name: Audisankara institute of technology

PROJECTS Cricket Australia (CA)

February 2021 – Till Date PROJECTS:

- Client: Cricket Australia (CA) **Role:** DevOps Engineer.

Tools: Azure DevOps, GIT, Microsoft Azure Cloud, FastLane, GitHub, New Relic (Monitoring tool), Docker, Terraform, Linux.

Description: - Cricket is Australia's one true national sport with a men's and women's team that capture the nation every Summer along with two of the biggest domestic competitions in Australia

- Automated Continuous Integration builds, nightly builds, deployments and unit tests across multiple different environments (DEV, QA, UAT, PROD) in different types of servers (DB, App, Web) and different number of servers of each type (for load balancing and such) using Azure Build, Power Shell, and MS Build, MS Deploy.
- Hands on Experience in Azure DevOps hands(ADO Repo, ADO pipeline, Artifactory, ADO Secrets), BitBucket, Code analysis, Sonarqube, Linux shell scripting, Release Management (Maintaining a release tracker and Raising CR ticket in SNOW by maintaining release ADO Work items, workflows) Implemented branch policies on master and automatic activation of PR's to merge code and propagate changes from one branch to another and Configured deployment triggers pre/post-deployment approvals and automated code deployment using Azure DevOps pipeline, TFS and automation and Azure dashboards
- Automatic deployment of iOS and Android apps running through fastlane scripts in CI & CD. App Store and Play Store configured with Slack, Teams for notifications

- Container Orchestration and security, docker swarm
- Ensuring adequate resolution with customer satisfaction
- Following escalation matrix/ process as soon as a resolution gets complicated or isn't resolved
- Troubleshooting and performing root cause analysis of critical/ repeatable issues
- Auto Scale up and scale down various services like VMs, SQL Servers (DTUs).
- Experienced working with Paas, Azure Administration(Azure IAAS), Azure Networking, VMs, Storage Accounts, Load Balancer, Web Apps, SQL Db, Traffic Manager, Application Gateway, CDN, Auto Scaling, Alerts using Azure Monitor, Application Insights, Log Analytics, Firewall, Service Bus, blob storage, load balancing, NSG, Application gateway, backup, DB deployment.
- Building/Maintaining Docker container clusters managed by Linux, Bash Scripting, GIT, Docker
- As part of my work primary role is to ensure effective Design, Development, Validation and Support activities, to assure that our clients are satisfied with the high levels of service in the technology domain.
- Gathering the requirements and specifications to understand the client requirements in a detailed manner and translate the same into system requirements. s
- Knowledge of design principles, fundamentals of architecture, performance engineering, quality processes, estimation techniques, Logical thinking and problem solving skills along with an ability to collaborate
-

CERTIFICATIONS

- Microsoft Azure Administrator– (AZ-104)
- Microsoft Azure Fundamentals– (AZ-900)
- Edureka – DevOps Engineer
