Summary

Software Developer with two years of experience, skilled in designing APIs, data transformation, and integration. Proficient in various programming languages and platforms, known for a collaborative approach, strong problem-solving abilities, effective communication, adaptability, and commitment to delivering efficient solutions. Dedicated to contributing to impactful projects and continuously enhancing technical skills.

Education

Bachelor of Technology in Electronics and Communication Engineering

R.V.R & J.C College of Engineering, Andhra Pradesh, India.

Aug 2018 - May 2022

CGPA: 9.52/10.00

Relevant Courses: Data Structures and Algorithms, Problem-Solving, Introduction to C, Java, Python, Computer Networks, Database Management Systems.

Technical Skills and Tools

- **Programming Languages:** Python, Java, C, Apex.
- **Technologies & Frameworks:** Lightning Web Components (LWC), Anypoint Platform, MuleSoft DataWeave, Anypoint Studio, REST APIs, Integration Patterns, HTML, CSS, JavaScript, Object Oriented Programming (OOPs).
- **Software & Tools:** Git, Postman, Filzella, Control-M.

Professional Experience

Systems Engineer | Tata Consultancy Services, Hyderabad

May 2022 - Present

- Designed and implemented MuleSoft integration solutions for Moody's, focusing on efficient data processing and seamless system communication.
- Collaborated closely with Moody's technical and business teams to gather integration requirements, ensuring alignment with business objectives and reducing project delivery time by 15%.
- Developed RESTful to optimize data flow, resulting in a reduction in processing time.
- Utilized MuleSoft DataWeave for data transformation, ensuring 99.9% data accuracy and standardization.
- Implemented data mapping strategies to align Moody's data structures with external systems.
- Established robust error handling mechanisms and comprehensive logging practices for effective issue identification and resolution.
- Acted as a liaison between Moody's technical and business teams, facilitating effective communication and improving project coordination by 20%.

Projects

Lightning Web Components (LWC) Project Suite | LWC, Apex, Lightning Design System

- **BMI Calculator:** Developed a BMI Calculator using LWC that computes Body Mass Index based on user input. Utilized Apex for calculations and Lightning Design System for a user-friendly interface.
- **Weather App:** Created a Weather App with LWC to retrieve and display real-time weather conditions and forecasts. Integrated with external APIs to provide dynamic weather updates.
- **Alarm Clock:** Designed a customizable Alarm Clock application using LWC, allowing users to set, edit, and manage alarms. Implemented using Apex for backend functionality and Lightning Design System for the interface.
- **Travel Approval Process:** Implemented a Travel Approval Process using Salesforce Trailmix, involving custom object creation, validation rules, flow development, and approval setup. Demonstrated expertise in Salesforce administration.
- **Account and Contact Management:** Developed a Lightning Web Component for managing account and contact information, featuring two interactive cards for displaying and editing data. Utilized Apex and Lightning Design System for a seamless experience.

Certifications

1. Mulesoft Level-1 Developer certification.
2. Salesforce Certified Associate.
