About Me

2.5+ years of experience in Java, Springboot and web development using ReactJS. Background in Information Technology. With a solid understanding of both backend architecture and frontend interactivity, I bridge the gap between technical precision and delightful user experiences. I bring a commitment to write clean code, continuous strive to learn and apply the latest technologies to improve application performance.

Professional Experience

Systems Engineer | Infosys Limited

July 2022 -Present

- Developed and maintained RESTful APIs using **Spring Boot** for internal and client-facing applications.
 - Wrote clean, reusable, and maintainable code while adhering to best development practices.
 - Built dynamic user interfaces with ReactJS, improving user engagement by 25%.
 - Optimized application functionality and UI performance, focusing on speed and responsiveness.
 - Worked collaboratively in an **Agile** environment, contributing to sprint planning, stand-ups, and retrospectives.
 - Designed and implemented features such as role-based access control, state management.
 - Integrated **Formik** and **Yup** for efficient form handling and validation.
-

Education

Bachelor of Technology (BTech) in Information Technology

Guru Gobind Singh Indraprastha University | 2018 – 2022

- CGPA: 9.22/10

Senior Secondary (Class 12)

Kendriya Vidyalaya, Delhi | 2018

- 85.67%
-

Technical Skills

- **Back-End Technologies:** Java, Spring Boot, REST APIs
 - **Front-End Technologies:** React, Javascript, HTML, CSS, Bootstrap
 - **Database:** Microsoft SQL Server
 - **Version Control:** Git
 - **Development Methodologies:** Agile
 - **Tools:** VS Code, IntelliJ, Eclipse, Postman, JIRA, GitHub
-

Projects

User Management Portal

- Developed a web-based portal using Spring Boot and React for managing user roles and access control.
- Built and documented RESTful APIs for complete CRUD operations.
- Implemented real-time data updates, modular code structure and exception handling, improving security and user experience.

Modular Banking Backend Infrastructure

- Developed and deployed RESTful APIs using Spring Boot, integrated with MySQL, ensuring high availability across multiple services.
- Emphasized adherence to best practices.
- Collaborated with QA for big fixes, provided production support.

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
-
