Experience

BankSathi

Bangalore, India

Software Developer

11/2022 - Present

Fintech platform offering unbiased information on banking or FI products.

- Engineered robust API integrations with financial institutions, banks, and payment gateways using Laravel and Java to ensure smooth, secure, and efficient transactions.
- Streamlined the payout mechanism by integrating lead payouts, GST payouts, and offer payouts into a unified system for users.
- Developed a lead capture system with profile verification and credit eligibility checks to boost customer acquisition, using ReactJS, Next.js, and Laravel to efficiently manage and store leads from multiple sources.
- Developed an automated push notification system with Laravel, OneSignal, and WebEngage, increasing customer engagement by 40% and delivering real-time updates.
- Optimized and enhanced the BankSathi mobile app backend for performance and scalability, while developing new features.
- Developed secure B2B APIs to streamline the entire lead process, covering profile creation, verification, OTP authentication, lead generation, and real-time status updates, etc.

BYJU'S

Bangalore, India

Software Engineer

12/2021 - 11/2022

Indian multinational educational technology company.

- Collaborated with development, testing teams, and project managers to deliver scalable, high-performance solutions, designing API-driven infrastructures and ensuring timely, quality delivery.
- Led the migration of pages from Core PHP to Laravel and React.js, improving performance and maintainability.
- Implemented an informational and registration module, with a center locator feature, deployed at Byju's Platform (<https://byjus.com/btc/>).

Siliconindia

Bangalore, India

Software Developer

06/2019 - 11/2021

Global media publishing company.

- Led a team of five in the technical design, planning, and implementation of a client portal, while managing deployments for 36 websites and delivering 10 end-to-end, leveraging HTML, CSS, JavaScript, Smarty, and Core PHP/Laravel to meet client expectations.
- Developed optimized landing pages with cross-browser compatibility, software integration, and a custom CMS, while improving website performance by 90% using advanced optimization techniques.
- Collaborated with the SEO team to integrate Amazon Alexa and Google Analytics, boosting website traffic by 60%.
- Implemented a server monitoring system with SMS and email notification alerts.
- Developed Java-based software to automate the drafting and sending of weekly newsletter emails to subscribers.
